**Facilities Management, Maintenance and
Building & Civils to the Rail and General
Sectors**

Jay Dee Management Ltd. specialises in Facilities Management and Maintenance, along with Building and Civil Engineering, with the Principals of the Company having many years of experience in this kind of work.

Our ethos is to deliver the best possible solution at the most competitive price, all with Health and Safety as our prime driving force.

To this end we hold the accreditations required to work in these sectors and we have an externally audited Integrated Management System which enables us to give traceability and auditability to our work.

Certificate No:348582020

Certificate No:348602020

About Us

Jay Dee Management Ltd. was formed to maximise the Facilities Management successes of our Contracting Company. It has grown rapidly into a respected FM business in it's own right and has now completely taken over as the main direction of our work.

Our Senior Personnel all have at least 30 years experience in this working environment (our MD has over 50 years).

This ensures that we have the contacts and experience to enable us to work knowledgably and respond quickly to provide solutions to the problems that frequently arise.

We are happy to become involved at an early stage of a Project to enable suggestions for Value Engineering to be made.

We are Approved Contractors for a number of Blue Chip Clients (Network Rail, London Underground, Siemens, Alstom, Balfour Beatty etc.).

Abilities

Jay Dee Management Ltd. can manage your Business and Domestic requirements from the acquisition of a site to ongoing security, cleaning and maintenance.

Whilst the list below highlights some of our capabilities it is by no means exhaustive as we bring in specialist trades to supplement our own capabilities when required.
