## 9200 Performance Highlights

Firewall	Next Gen Firewall	Threat Prevention
60 Gbps	19 Gbps	6.6 Gbps

## AI-Powered advanced security and uncompromising performance, built for perimeter applications

Quantum Force 9200 data center firewalls deliver high threat prevention performance in a small 1 RU form factor to protect employees, networks, and data from cyber-theft. One network I/O slot can be configured to fit your network with a high port density of up to 8x1/10G or 4x10/25G port capacity.

### Comprehensive and Industry-Leading Security

- Next Generation Firewall
- Site-to-Site and Remote Access VPN
- Application and Web Filtering
- Intrusion Prevention
- Antivirus and Anti-Bot
- Advanced DNS Security
- Sandboxing with file sanitization
- Zero-phishing (no agent required)

### Highest Performance Threat Prevention

With the 9200, organizations can inspect encrypted traffic and prevent even the most evasive attacks without impacting internal network performance. Achieve 6.6 Gbps of threat prevention throughput or up to 80 Gbps of UDP 1518B firewall throughput with a single 1RU firewall.

### Modular, High Port Density 1RU Chassis

The 9200 offers the flexibility to fit your changing network requirements. Populate the network I/O slot with your choice of network cards: 8x1/10G, 4x10/25G.

### Power Efficient, Resilient Design

With a low power consumption per Gbps of threat prevention throughput, these large enterprise firewalls cut power costs in half when compared with similar firewalls from other vendors.

### Flexible, High Performance HTTPS Inspection

While commonly used for good, HTTPS traffic can also hide illegal user activity and malicious traffic. Businesses need the ability to inspect a broad range of encrypted TLS 1.3 and HTTP/2 channels while also excluding inspection of sensitive regulated industry traffic, such as Health Care and Financial. Check Point makes it easy to fine-tune HTTPS security using customizable dynamic security policies.
