

MINIMUM EQUIPMENT AND VEHICLE REQUIREMENTS:

The minimum requirement is a well maintained and thoroughly inspected 4x4 equipped for long distance overland travel over vastly varying terrain types. The perfect rig for a DestinationXtreme adventure should be able to safely handle everything from Highway speeds to navigating extreme terrain and everything in between. Reliability is key due to the extreme remoteness of some routes and destinations. Other requirements include but are not limited to:

- **Comms** - A hard mounted GMRS radio at 15watts or more with external antenna. Emergency satellite beacon such as Garmin Inreach or iPhone SOS capability.
- **Fuel** - A minimum fuel range of 400 miles including carried reserve capacity.
- **First Aid** - A basic emergency first aid kit
- **Nutrition** - Self reliant for water and food for the duration of the trip.
- **Recovery** - Front and rear hard points, 1 winch per convoy, full size matching spare, tire repair kit, basic trailside vehicle repair kit, and an adequately weight rated recovery kit.*
- **Visibility** - Rear high mounted chase lights amber or green in color and front mounted aux lighting.
- **Experience** - Participants should have experience living out of their vehicle for durations equal to or longer than the DestinationXtreme trip.
- **Travel Clearance** - Valid Passport and a clean driving record required for international travel.
