753100 53-54 FIREWALL KIT

This kit will handle small or big block engines easily.

753100 53-54 CHEVY FIREWALL (4 1/2" SET-BACK) 26" Wide

These references are to help you decide which firewall kit will best fit your particular application. There are many factors which will affect your choice of kits; engine set-back, radiator core thickness, air conditioning or super chargers. You need to determine the length of the engine package you intend to install & then figure out the distance you have from the back of the radiator core to the stock or existing firewall. To do this you will know how much extra room or set-back you will need. The firewall only fits in one place in the body, but your engine can be moved forward or backward as much as needed to obtain proper clearances. If you have any questions, please call our customer service dept. @ (928) 420-6346.

Mounting a battery in a street rod has always created problems, some major and some minor. Our battery box kits will solve most of the problems. The universal mounting brackets supplied with these kits allow you to choose the mounting method which best suits your application, including flush floor mounting, side mounting, or halfway through the floor for extra ground clearance. We offer three kits. The positive battery hold down, adequate ventilation & cable protection give added security to your battery installation.

BITCHIN

Our Cowl Vent Fillers are made from 18 Gage cold rolled steel & are a little larger than the Stock Cowl so they can be trimmed for a perfect fit. The edges are beveled so the weld area is below surface making it easier for a flush fit. Swap meet the original, & pocket the difference.
