The Set-Back Information Provided on This Page Is For your Information

These references are to help you decide which firewall kit will best fit your particular application. There are many factors which will affect your choice of kits; engine set-back, radiator core thickness, air conditioning or super chargers. You need to determine the length of the engine package you intend to install & then figure out the distance you have from the back of the radiator core to the stock or existing firewall. To do this you will know how much extra room or set-back you will need. The firewall only fits in one place in the body, but your engine can be moved forward or backward as much as needed to obtain proper clearances. If you have any questions, please call our customer service dept. @ (928) 420-6346.

740111 COWL VENT FILLER
1941-48

When Bitchin Parts designed our firewall, we also built a new smoothie kit to replace the lower body supports. These are great for when the body support brackets below the firewall collect a lot of moisture & rust out. They give a much smoother look. The 1941 brackets are made of 16 gauge steel & the 1942-48 are 12 gauge steel.

The rocker panel area on these cars have a tendency to rust out or to have sustained damage through the years from rocks or curbs. We offer rocker box kits for Coupes, Convertibles, 2-Door Sedans & Sedan Deliveries. This panel is not just an outer skin, it is a complete box assembly. There are (2) kits. The front kit extends from the cowl post all the way back to approximately 1" behind the door opening. The rear kit goes from the rear of the front kit to the rear wheel well. These are smoothie kits. There are no pre-punched holes for mounting moldings or running board rubber. The boxes are made out of 16 gauge cold rolled steel & come complete with new body mounts, instructions for easy installation.
