Mega Trend 2025

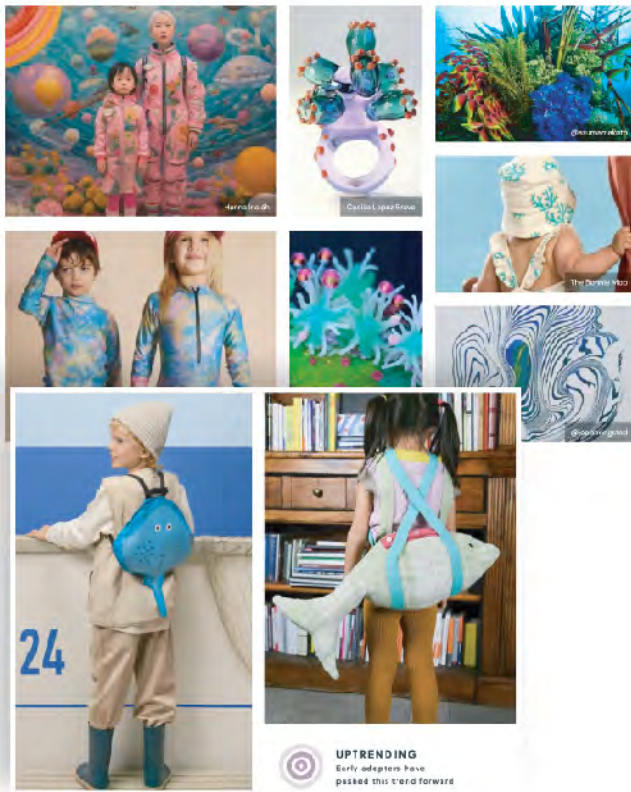

Ocean Wonders

Our aesthetic for Spring Summer '25 focuses on the wonder of our seas and oceans. Watery painterly styles represent the delicate flow of the sea. Pretty mermaid motifs and deep sea exploring in the cutest submarines, encourage an inventive narrative for our curious little ones. Endangered sea creatures such as the turtle and the shark are featured in our artwork, underlining the importance of protecting the environment for our kids and embedding our ethos of sustainability and responsibility into our design and development practises.

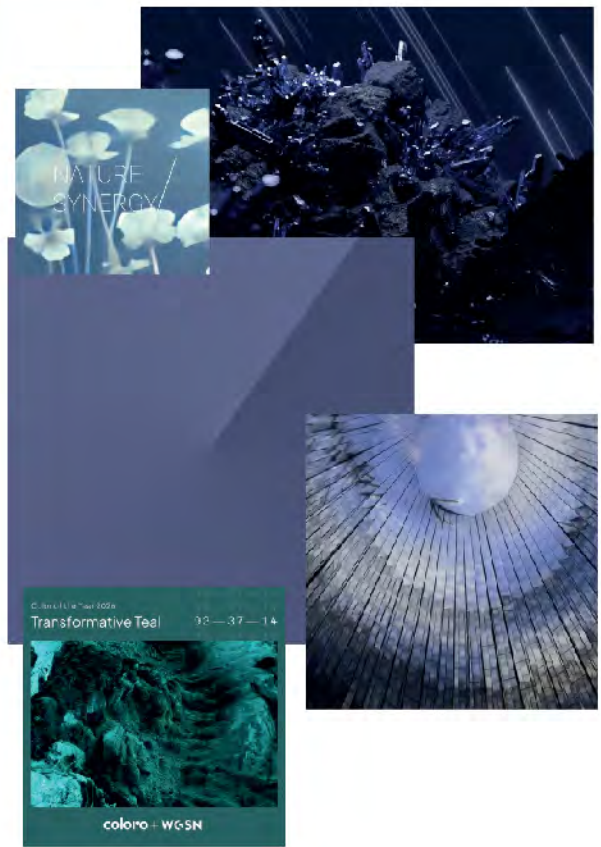

1. We take a look at trend agencies such as WGSN and The Better Trend Company, who create predicted trend forecasts based on future and historical consumer data, pop culture, political events, films, theatre and exhibitions which will be released in the coming years.
2. We read reports from Pantone, Coloro and visit trade fairs such as Premiere Vision to check colour trends.
3. From these reports, we dive deeper into the trends and aesthetics to make them perfect for the Loulou Lollipop brand.

Our Sustainability Promise

LOULOU LOLLIPOP Apparel Collection

At LOULOU LOLLIPOP, we believe in creating a better world for our future generations, and that's why we're making an effort to ensure that we are as sustainable as possible, from beginning to end.

Tencel™ - We use TENCEL™ Lyocell fibers, extracted from sustainably grown eucalyptus wood using a unique closed-loop system that recovers and reuses the solvents used, minimizing the environmental impact of production. Unique physical properties lead to their high tenacity profile, efficient moisture management, and gentle to baby's delicate skin.

Quality - Our clothing is OEKO-TEX STANDARD 100 certified; you can be confident that every component of this article, i.e., every thread, button, and other accessories, has been tested for harmful substances, that the garment, therefore, is harmless to your baby.

Organic cotton - We use 100% certified organic cotton that's gentle to your baby's skin and kinder to the environment. Organic cotton is grown without harmful chemicals, leaving the soil, air, and water free from contaminants that cause harm. Organic cotton produces around 46% less CO₂e compared to conventional cotton. It also uses far less water to grow since organic cotton growers typically utilize rain far more than irrigation.

Packaging - We use GRS-certified 100% recycled plastic. When we use recycled plastics to make new plastic products, we conserve more than materials. We can reduce energy usage by 66%. Plus, for every ton of plastic we recycle, we save the equivalent of 1,000–2,000 gallons of gasoline. We also use FSC-certified paper for all our hangtags and paper packaging.
