

Yukon-Kuskokwim Regionwide Survey

Strengthening the Yukon-Kuskokwim Region through data, transparency and collaboration

Calista Corporation is working with Future Elder, an Alaska Native-owned communications firm, to collect, summarize and share critical data that reflects the economic development, sustainability and well-being of communities across the Region.

This initiative will engage all 45 Alaska Native Village Corporations and 56 Tribal Nations to ensure every community's voice and experience are represented.

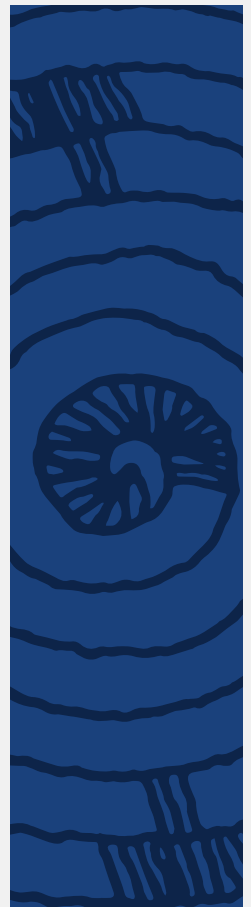

WHY THIS MATTERS

Reliable data helps Calista, Tribal Governments and Village Corporations:

- Track how 7(j) distributions are benefiting communities
- Identify local and regional challenges, priorities and opportunities
- Inform long-term planning and funding decisions
- Strengthen advocacy and self-determination across the Region

This effort helps identify needs, challenges and opportunities for locally driven development, sustainability and resilience.

WHAT WILL THE SURVEY FOCUS ON?

Village Corporations

- **ANCSA 7(j) Distributions:** How funds are used to benefit Shareholders through dividends, services or community programs

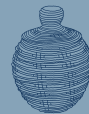

Tribal Governments and Village Corporations

- **Services Provided to Tribal Citizens:** Information about Tribal courts, social services, fuel programs and infrastructure (housing, energy, transportation systems, water and sewer, and broadband connectivity)
- **Challenges and Needs:** Data related to economic development, reliable energy, transportation, internet connectivity, education, workforce, safety and access to Traditional food systems
- **Transportation Infrastructure:** Information on trail systems, roads, runways, barge landings and other key facilities

HOW DATA WILL BE USED

- All data will be collected respectfully and securely.
- Individual community and corporation information will remain confidential unless otherwise agreed upon.
- Summarized, regional-level findings will be shared transparently with all participating entities.
- Results will support regional advocacy, planning, and funding efforts — not external reporting or compliance.

TIMELINE

- **Phase 1** (*now until the end of the year*): Survey design, outreach and initial data collection

Contact and Participation
