

# Glass Facial

## Reveal Glowing Skin with the Glass Facial

Dear Valued Patient,

We are excited to highlight an innovative treatment designed to give you the ultimate skin glow –the Glass Facial. This cutting-edge procedure combines the power of Botox, Hyaluronic Acid, and “VAMP” by Prolenium to rejuvenate your skin from within, leaving you with a flawless, hydrated, and radiant complexion.

### What is a Glass Facial?

A Glass Facial is a minimally invasive treatment that infuses your skin with a customized blend of Botox Cosmetics, Hyaluronic Acid, and “VAMP” by Prolenium, using microchanneling. VAMP™ is a topical, sterile bio-revitalizing solution enriched with a potent blend of vitamins, amino acids, minerals, and PDRN for skin rejuvenation. This innovative product improves skin tonicity, tightens pores, smooths wrinkles, and restores hydration, leaving skin with a renewed glow and improved texture. This process enhances hydration, improves skin texture, and reduces the appearance of pores and fine lines, giving your skin a smooth, luminous, and “glass-like” finish.

### The Benefits:

- ✓ Hydration & Plumping: Hyaluronic Acid deeply hydrates, restoring youthful volume and suppleness.
- ✓ Refined Pores & Smoother Skin: Botox reduces excess oil production, minimizing pore size and refining skin texture.
- ✓ Skin Rejuvenation: VAMP by Prolenium.
- ✓ Glowing, Radiant Complexion: Your skin will appear more even, refreshed, and naturally luminous.
- ✓ Quick & Minimal Downtime: This treatment is perfect for those seeking impressive results with little to no recovery time.

### Is the Glass Facial Right for You?

Whether you’re looking to achieve a fresh, dewy glow or improve skin tone and texture, this treatment is suitable for most skin types. Our expert team will tailor the procedure to your unique skin needs for optimal results.

Book your Glass Facial today and experience the skin transformation you deserve.
