

# Welcome to „Premium Carding Coaching“

Congratulations for becoming a member of this unique mentoring program!

Here is what you are about to learn within the next 3 days:

**Day 1:** How to set up your PC for safe carding

**Day 2:** 3 different methods on how to cash out

**Day 3:** How to card properly without killing the card (step by step process)

+ Where to get 100% valid CC (*1 Bonus FREE CC* included in this Coaching Program)

**Important:** Please follow every single step in this coaching program!

2/3 carder kill card in an instant because of a lack of patience and not strictly following certain rules!!

That is why you will NOT receive BONUS CARD unless you passed successfully day 1 and day 2!

**>> To receive BONUS card you must leave positive feedback on vendoraccount and send a message with your „*order number*“ and „*date of purchase*“ to vendor <<**

-----  
-----

## Day 1

Most of the time carding fails just because of the wrong setup. First day of this coaching is all about setting up your PC the right way.

Certain steps MUST be followed:

1. Change MAC address (if you are using public wifi)
2. Use socks5 (must reflect card holder city + state!)  
get socks: [gatherproxy.com/socklist](https://gatherproxy.com/socklist) / [free-proxy.cz/en](https://free-proxy.cz/en) / [live-socks.net](https://live-socks.net)
3. Check if socks 5 not blacklisted  
([check2ip.com](https://check2ip.com) / [whoer.net](https://whoer.net))
4. Change PC clock to card holders timezone!
5. Check if IP leaks ([whatleaks.com](https://whatleaks.com))
6. HIDE internal IP
7. Change system language to english if needed (if f.e. USA card)

Once you have figured out step 1 to 7 you are ready to go!

## Day 2

Today you are going to learn about 3 working methods on how to cash out on stolen CC's:

### METHOD 1: CC > SLL > BTC [SERVICE NO LONGER AVAILABLE!!!!]

The screenshot shows the VirWoX website, 'The Virtual World Exchange'. The top header includes the VirWoX logo and the tagline 'virtual world exchange'. The main navigation bar features the site name and user statistics: '1,267,592 users / 257,232,320,010 L\$ exchanged'.

**Customer Login:** Includes fields for Username and Password, a 'Login!' button, and links for 'Forgot your password?', 'Not registered yet?', and 'Signup as Partner!'.

**General Information:** Links to 'About VirWoX', 'Terminal Locations', 'Open Metaverse Currency', 'Developers', 'Questions & Answers (FAQ)', and 'Contact us'. Below this are flags for supported countries and logos for accepted payment methods: PayPal, Visa, MasterCard, American Express, Skrill, Klarna, paysafe card, and bitcoin.

**Security:** A 'Security provided by:' section with a 'PayPal VERIFIED' logo.

**OM€ Shop:** A section for buying OM€ (Virtual World Dollars). It includes a 'Buy OM€' button, a 'powered by VirWoX' logo, and a text box explaining the process: 'Do you find trading on the exchange too complicated? You just want to buy OM€ fast, simply, and securely? Just enter on the left how much you would like to buy, and how you would like to pay! No registration is necessary. The OM€ will be sent instantly to the specified avatar.' It also mentions that opening a VirWoX account is required for the best exchange rate.

**News:** A section with several news items:

- 2015-09-02: VirWoX expands to My Virtual Community** - Announces trading of MVC V\$ (MVC) on the platform.
- 2015-08-01: Linden Dollar withdrawals stopped.** - States that Linden Dollars can no longer be sent from VirWoX accounts to Second Life avatars.
- 2014-03-06: NETELLER no longer supported** - Apologizes for the discontinuation of NETELLER payments.
- 2013-12-07: SOFORTbanking now also available in France, Italy, Poland and Spain** - Announces a partnership with SOFORT AG for direct bank deposits.

**Users:** Displays 'currently online: 126' and 'registered: 1,267,592'.

**Trading Volume (SLL):** Shows volume for 24 hours (41,142,638) and 30 days (1,212,338,170), with a total of 257,232,320,010.

**Trading Volume (ACD):** Shows volume for 24 hours (4,128) and 30 days (1,741,563), with a total of 546,736,802.

**Current Rates:** A table showing Bid and Ask prices for various currencies:

	Bid	Ask
EUR/SLL	328.9	332.6
USD/SLL	283.0	292.6
GBP/SLL	352.0	379.6
CHF/SLL	285.0	291.5
EUR/ACD	756.1	975.0
USD/ACD	752.0	806.0
SLL/ACD	2.634	2.760
SLL/OMC	0.985	1.008
EUR/OMC	321.0	329.0
USD/OMC	285.0	291.0
BTC/SLL	2320501	2499999
EUR/MVC	274.0	286.0

**Rate Movement:** Four line charts showing the 14-day price movement for EUR/SLL, USD/SLL, GBP/SLL, and CHF/SLL. Each chart includes an average rate and volume for the period.

What you need?

- Valid CVV (any country will do)
- Clean Socks5 proxy as close as possible to cardholder's address

- Good DNS setup  
Ok lets get started. You'll need an email account. Go create a new one at yahoo/ gmail /whatever ..... doesn't matter which (I wouldn't use tormail for this.....too much of red flags). Go to [www.virwox.com](http://www.virwox.com) and create a new account using the email you just set up and the name on the CVV. Just make up a fake SL and you don't need to validate it. You will then have to confirm your avatar – new account by retrieving the temp password from your email. First thing to do in VirWox is change your password in the “Change Settings” tab on the left.
- —> Now we're ready to do some carding. Click "deposit" and scroll down to the Skrill (Moneybookers) option. Then enter the max amount for the currency of 1 your card (currently \$56 for USA cards) and click the Moneybookers logo.  
If you have NoScript installed you will

have to temporarily allow all this page. Enter the details you have for the CVV and make up a fake date of birth if you don't have a genuine one. If all goes well, you will then be taken back to the main page with your USD/EUR/GBP balance filled.

On the exchange menu left of screen chose USD/SLL to convert to Linden \$\$, then BTC/SLL to convert to bitcoin

Now withdraw. Easy Profit.

**Note:** Typically VirWox hold funds for 48 hours before releasing. You can process payments a total of 3 times with each card – one transaction every 24hours.

## **METHOD 2: CC > Moneygram > BTC**

If you have fullz (ssn, dob, etc) you can try cashing out through Moneygram. To do this,

just go to site and sign up for an account under the cardholders name. Be sure to change a regional socks5 with your VPN connection so you appear to be from the same country that the cardholder is in. Select Same Day service. It will prompt you for the card details, dob, and the last 4 digits of the ssn. I would suggest running this name through a background check (any background search site will do) in case you have to answer a security question to send the funds over. Don't try to send over too much. If you accidentally go over the limit or try to send a suspicious amount you risk flagging the account. No more than \$300 from each CC. If everything goes smoothly you can try exchanging through [www.bestchange.com](http://www.bestchange.com) for bitcoins.

BUY BITCOIN NOW

Using gift card as a "new body" for stolen credit card (this information is received from the source working for one of the major payment brands).

The stolen track data is encoded into the plastic decorated as a gift card (or even original gift card is re-encoded with stolen track data). Most gift cards do not have any customer identification information and physical protection features of credit cards, so there is no way for store attendant to authenticate the cardholder. At the same time, gift cards are processed automatically by most point of sale systems in a way similar to credit cards.

To turn giftcards into BTC go to [www.paxful.com](http://www.paxful.com) and find a buyer. You can easily sell e-giftcards for BTC.

There are plenty of sites where you can buy e-giftcards. Create an account on paxful and search for a proper buyer. Buy the giftcards he demands and sell them to him

Send BTC to your wallet. Repeat!

Day 3

Gametime! You are ready! Go get your first fresh CC from your vendor by sending him following infos: ,date of purchase' + ,order number'. Mandatory: You must leave positive feedback on vendors profile first in order to get the CC!

After deciding which method to use and getting the right setup we are ready to cash the shit out! Now we have to concentrate and focus on following steps to be successful.

Once you have figured it out and made your first purchase you are one step closer to financial freedom. Maybe you will fail the first couple of times but if you stick to it and give it more tries you will be successful one day!

Just do the following and you will succeed with a very high chance on your first attempt:

Once you get asked for CC details while payment process:

- 1. DO NOT copy paste CC number. Type in digit for digit!**
- 2. Create email address with card holders name for payment**
- 3. Use anonymous SIM CARD for account validation or a generated phone number (use online generator)**
- 4. MAKE PAYMENT** (don't use the whole current balance - can kill card- I recommend making max. 200-300\$ payment at once. If succeeded just repeat till CC is dead)
- 5. Delete browser cache and history!**
- 6. Get some more cards, repeat and get rich!**

If you fail here, most of the time it is because of not being concentrated. If you screw up one little thing you can fuck up the card and your chance is gone!!!

## **Where to get valid CC's on mass:**

**Attention:** There are more CC/CVV scammers out there than legit vendors. People run into scams easily on darkweb. Before ordering any CC please make sure that you are using a well known marketplace.

ONLY use links from ,dark.fail' to find the right marketplaces

DO NOT use any other links. There are a lot of phishing sites that steal your passwords and deposits!

Good luck!
