

Information Discovery for High-Stakes Decisions, At Scale

Expose Supply Chain Risk Before It Becomes Reality.

AXE55 Technologies fuses proven intelligence tradecraft with Artificial Intelligence to expose hidden equity and digital supply chain risk, compress discovery time by 160X, and enable zero-exposure procurement.

YOU CAN'T DEFEND WHAT YOU CAN'T SEE

Hidden vulnerability exists beneath normal business activity: where third-party code, supplier ecosystems, ownership structures, procurement contracts, and strategic partnerships all become a placement and access risk within your supply chain.

The result is not just cybersecurity risk. **It is decision risk.**

HOW MUCH CAN YOU ACTUALLY SEE?

23%

organizations have full visibility into their dependencies.

Yet 98% of codebases run on third-party code.

WHAT IS OPERATING UNSEEN?

267

days, on average, to identify and contain a supply-chain breach.

HOW FAST CAN YOU FIND THE TRUTH?

160x

faster than manual discovery.

Our tool, Assured Discovery and Intelligence™ (ADI), compresses weeks of analyst work into minutes.

Discover the risk. Understand the risk. Act on the risk.

Discovery spans the full chain of dependency, where surface-level trust signals break down:

OWNERSHIP	SUPPLIER	SOFTWARE	PROCUREMENT	IDENTITY	PARTNERS
-----------	----------	----------	-------------	----------	----------

AXE55 TECHNOLOGIES - THE FUSION OF TRADECRAFT AND TECHNOLOGY

Our team is led by former intelligence officers and special operations professionals who bring time-tested tradecraft to problems that technology alone cannot solve: determining what is actually true beneath the signals leaders are asked to trust.

Human Tradecraft. Machine Speed. Trusted Outcomes.

"AXE55 excels at procuring the data and services that we require, demonstrating their expertise in navigating a myriad of technical and procurement challenges while ensuring the security of our supply chain."

Chief Information Security Officer (CISO) ★★★★★
MAJOR PRIVATELY-HELD DEFENSE CONTRACTOR

Don't wait for hidden exposure to become visible the hard way.

By the time risk surfaces in a breach report, audit finding, failed integration, or headline, the decision is often already made. AXE55 Technologies helps leaders uncover what is underneath before they commit capital, integrate systems, approve vendors, or rely on the wrong partner. ADI™ shows you where the risk is. Our Assured Procurement and Logistics (APL) framework lets you act without becoming the risk. **Resilience is built through action, not reaction.**

Private briefings available for enterprise, government, infrastructure, investment, and strategic-partner discussions.
