

2012 NH IMMUNIZATION CONFERENCE

Wednesday, March 21, 2012
Radisson Hotel, Manchester, NH

ACHIEVE IMMUNIZATION EXCELLENCE

VACCINATE FOR LIFE!

Offered by:

NH Department of Health & Human Services
Division of Public Health Services
NH Immunization Section

CONFERENCE PROGRAM

Welcome to the Annual NH Immunization Conference!

Parking:

If you parked in the parking garage, please stop by the conference registration desk to have your parking garage ticket validated. Parking with validation is \$5 for the day (\$10 without).

Name Badges:

Please wear your name badge throughout the day so we can identify you as a conference attendee. At the end of the day, please recycle your name badge at the conference registration table.

Information, First Aid and Lost & Found:

If you have questions while at the conference or have a lost and found issue, the staff at the conference registration table can assist. There is also a first aid kit located at the table.

Attendance Certificates, Continuing Education Credit and Evaluations:

In order to receive credit for your attendance, you must complete and return your evaluation form. Please return it to the conference registration table at the conclusion of the conference. Your evaluation form is included in your registration packet that you received this morning.

Nursing Continuing Education

JSI Research & Training Institute, Inc. is an approved provider of continuing nursing education by the New Hampshire Nurses Association Commission on Continuing Education, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation. The NH Immunization Conference has been approved for a total of 5 contact hours.

In order to receive the full credit, you must attend the entire day. Nurses should only claim credit commensurate with the extent of their participation in the activity.

Continuing Medical Education (CMEs) for Physicians, Physician's Assistants and APRNs

This activity has been planned and implemented in accordance with the Essentials Areas and Policies of the New Hampshire Medical Society Council on Education through the joint sponsorship of Concord Hospital and the NH Immunization Program. Concord Hospital is accredited by the NHMS COE to sponsor continuing medical education for physicians.

The Concord Hospital Continuing Medical Education Program designates this educational activity for a maximum of **5 AMA PRA Category 1 Credit(s)**[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Medical Assistants

Medical Assistants will receive an attendance certificate for 5 contact hours to submit to their accrediting agency.

Handouts:

In order to reduce the amount of paper waste this conference generates, breakout session presentations are not available in a hard copy format at the conference. You may download all presentations from the conference website www.NHIPConference.com. Thank you for your cooperation.

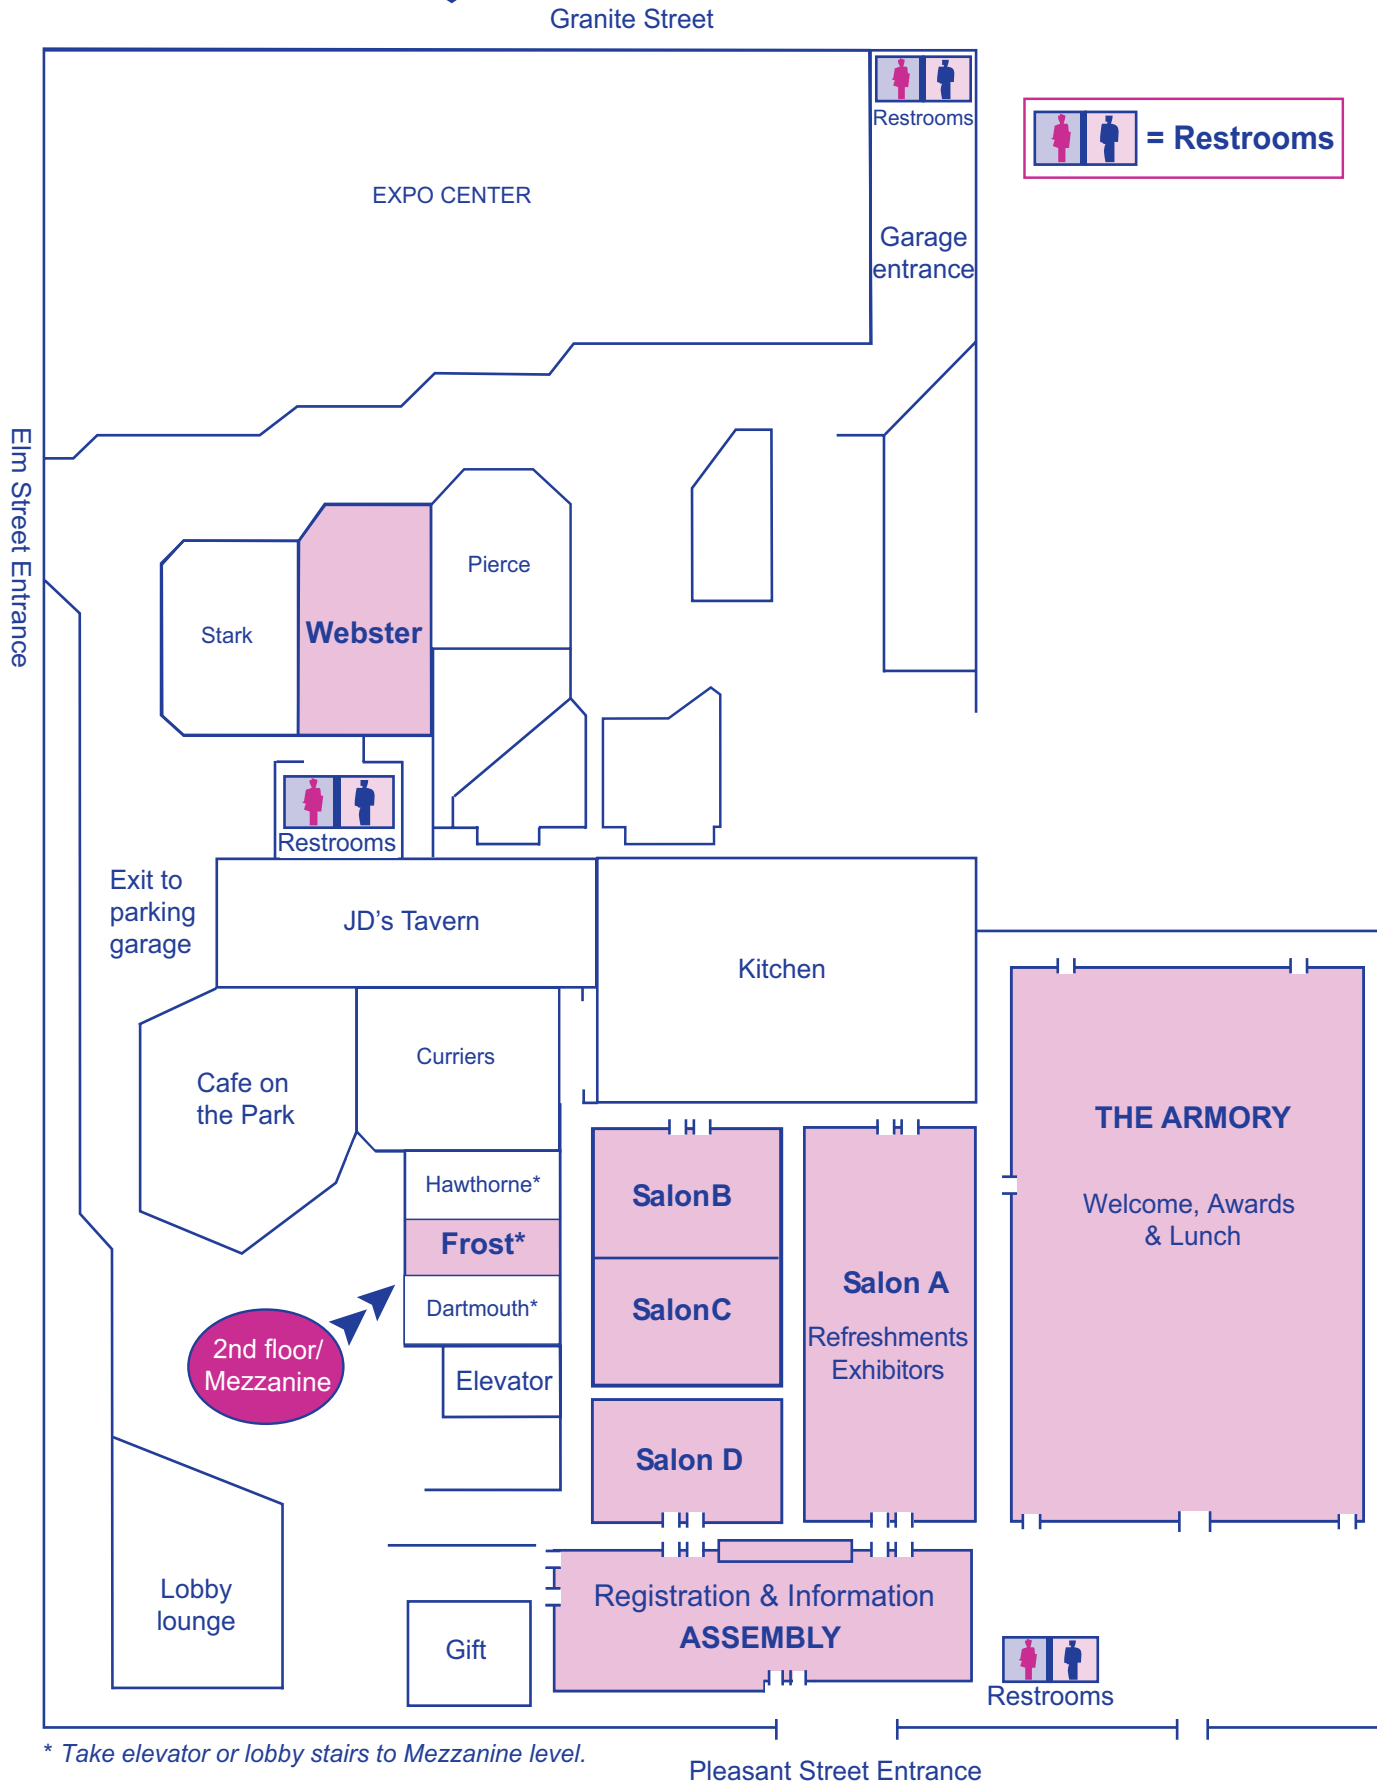

Agenda At-A-Glance

Time	Room	Agenda
7:30-8:15	Assembly & Salon A	Registration, Continental Breakfast & Exhibits
8:15-9:00	Armory	Welcome, Introductions & Awards <ul style="list-style-type: none"> ◆ Staff introductions ◆ Recognition of School-based Clinics ◆ Recognition of “Share Fun, Not the Flu” school bulletin board winners ◆ Recognition of Anthem Blue Cross Blue Shield - Granite State Immunization Partnership Influenza Initiative ◆ Excellence in Immunization Awards
9:00-9:30	Armory	State of the State
9:30-10:45	Armory	Immunization Update 2012 and Beyond: The Latest in CDC/ACIP Recommendations

CONFERENCE MAP

Full Agenda

7:30-8:15 Registration, Continental Breakfast & Exhibits

Assembly &
Salon A

8:15-9:00 Welcome, Introductions & Awards

Armory

- ◆ Staff introductions
- ◆ Recognition of School-based Clinics
- ◆ Recognition of “Share Fun, Not the Flu” school bulletin board winners
- ◆ Recognition of Anthem Blue Cross Blue Shield - Granite State Immunization Partnership Influenza Initiative
- ◆ Excellence in Immunization Awards

Marcella J. Bobinsky, MPH, Section Chief, New Hampshire Immunization Section, Division of Public Health Services, New Hampshire Department of Health and Human Services

Jose T. Montero, MD, Director, Division of Public Health Services, New Hampshire Department of Health and Human Services

9:00-9:30 State of the State

Armory
(Credit: .50)

Dr. Dionne-Odom, Deputy State Epidemiologist will review the past year of vaccine preventable disease surveillance data and immunization data. In addition, she will discuss the highlights of regional and state-wide efforts to increase immunization in targeted groups.

Following this session, participants will be able to:

- ◆ Discuss the achievements of New Hampshire immunization activities in 2011;
- ◆ Interpret the impact of immunizations on vaccine preventable diseases in New Hampshire during the past five years;
- ◆ Restate the current and future efforts to improve immunization rates in New Hampshire.

Presented by:

Jodie Dionne-Odom, MD, Deputy State Epidemiologist, Division of Public Health Services, New Hampshire Department of Health and Human Services.

Full Agenda

9:30-10:45 Immunization Update 2012 and Beyond: The Latest in CDC/ACIP Recommendations

Armory
(Credit: 1.25)

Never before in the history of immunizations have there been such widespread changes to the immunization schedule. This session will provide participants with the latest information regarding immunizations, updates and safety information pertaining to each vaccine.

Following this session, participants will be able to:

- ◆ Discuss the various changes to the 2012 Immunization schedule;
- ◆ Identify the 2012 recommended vaccinations and schedule;
- ◆ Discuss the benefits and side effects of the various vaccines;
- ◆ Develop an appropriate plan for improving immunization rates within the community.

Presented by:

Wendy L. Wright, MS, RN, APRN, FNP, FAANP, Wright & Associates Family Healthcare, and Anderson Family Healthcare

10:45-11:15 Break, Refreshments, Time for Exhibitors & Raffle Winner Announcements

Salon A

ATTENTION: Please take your belongings with you when leaving the Armory so the staff can set the room for lunch. Thank you.

11:15-12:30 Concurrent Sessions

The session that you pre-registered for is listed on the back of your nametag.

Communicating with Parents about Pediatric Vaccines: Should this be a painful topic?

Salon B
(Credit: 1.25)

Have you received questions from parents about their child's vaccines? Which ones are necessary and which are simply "recommended?" Concerns about the safety of childhood immunizations? Requests for altered immunization schedules? Over the years there has been a great deal of perceived controversy around the safety and necessity of pediatric immunizations. Everett Lamm, MD, FAAP of Core Physicians' Exeter Pediatrics practice will dispel the myths, answer questions, and provide current, reliable, evidence-based information and guidelines to help parents and guardians make informed decisions about this essential component of childhood preventative healthcare. You won't want to miss this opportunity to get the facts for dealing with parents and their concerns about pediatric vaccines.

NOTE:
This session is repeated in the afternoon however, the 11:15 session has an extended question and answer period.

Following this session, participants will be able to:

- ◆ Explain why childhood vaccines are offered;
- ◆ Analyze the controversies surrounding vaccines;
- ◆ Address parental concerns about vaccines;
- ◆ Explain the effects of parental reluctance to vaccinate.

Presented by:

Everett J. Lamm, MD, FAAP, Core Physicians' Exeter Pediatrics

Clinical Recognition of Vaccine Preventable Diseases

Salon D
(Credit: 1.25)

NOTE:
This session is repeated in the afternoon however, the 11:15 session has an extended question and answer period.

As the incidence of vaccine preventable disease decreases, both patient and clinician recognition of previously common infections becomes a difficult task. Without appropriate clinical acumen (including symptoms and signs of less common diseases), timely and accurate diagnosis becomes uncertain when breakthrough infections occur. As each vaccine becomes more effective, diseases decrease and the perceived threat of infection dissipates, challenging the ability to counsel patients and parents regarding the balance of benefits and risks of each vaccine. During this session, the successes of effective immunization programs will be reviewed along with ever recurring lapses in vaccine delivery. Also, specific symptoms and signs of vaccine preventable diseases will be discussed, including all diseases currently on the Advisory Committee on Immunization Practices (ACIP) schedule.

Following this session, participants will be able to:

- ◆ Appraise the impact of vaccinations on all vaccine preventable diseases included in the ACIP vaccine schedule, emphasizing more uncommon infectious diseases that are often under-diagnosed;
- ◆ List at least three signs/symptoms/complications of vaccine preventable diseases, enhancing effective counseling for patients/parents relative to the benefits and risks of vaccinations;
- ◆ Identify at least two clinical manifestations of these illnesses affording participants improved and more timely diagnostic skills, especially relative to recent lapses in vaccination rates leading to recurrent disease.

Presented by:

David Fredenburg, MA, MD, Massachusetts College of Pharmacy and Health Sciences – Manchester/Worcester, School of Physician Assistant studies

Adult Immunizations & Travel Vaccines

Salon C
(Credit: 1.25)

This session on adult and travel immunizations will be an interactive discussion of the most current recommendations for routine adult vaccines and the recommended travel vaccines for persons traveling to other countries. There will also be an opportunity for questions and answers.

Following this session, participants will be able to:

- ◆ Explain and implement the adult vaccine recommendations with their staff and patients resulting in increased adult immunization rates;
- ◆ Assess what vaccines are recommended for travel to various countries;
- ◆ Determine when a patient should be referred to a travel clinic.

Presented by:

Elizabeth Talbot, MD, Associate Professor, Dartmouth Medical School

Full Agenda

Reminder/Recall

Webster
(Credit: 1.25)

Does your healthcare practice have a system for reminder/recall of patients? Are you interested in how other healthcare practices approach reminder/recall? Their systems, methods, results, and the positive and negatives to each?

This session will highlight different reminder/recall systems employed at three New Hampshire healthcare practices, and practical advice and guidance on how to get started with your own reminder/recall system.

Following this session, participants will be able to:

- ◆ State the effectiveness of reminder and recall strategies at a national level based upon review of the task force findings and data;
- ◆ Describe the process of the reminder/recall used on several age groups in a small and medium volume practice who have a paper charting system;
- ◆ Describe the process of the reminder/recall strategies used in a telephone recall system and how it can be implemented in your practice;
- ◆ Describe the process of the reminder/recall strategies employed in a practice with an electronic medical records (EMR) system.

Presented by:

Xan Gallup, RN, Triage Nurse, Newport Health Center/New London Hospital

Nikki Crean, RN, Clinical Supervisor, Dartmouth Hitchcock Pediatrics – Manchester

Becky L. Manter, Medical Assistant/Office Manager, Anderson Family Healthcare, PLLC

Community Immunity

Frost
(Credit: 1.25)

“Community Immunity,” often known as “herd immunity,” is a critical weapon in the fight against vaccine preventable diseases. This panel will discuss three reasons for achieving community immunity in New Hampshire based on epidemiology, community health and family experience.

Following this session, participants will be able to:

- ◆ Apply the concepts of epidemiology and how professionals are able to develop plans to prevent infectious disease with the concepts;
- ◆ Construct his or her own reason for on-time immunization based on the concept of community immunity;
- ◆ Describe the benefits of immunizing a school community against influenza, using school-based clinics as a vehicle;
- ◆ Explain the personal impact of community immunity on a family with children.

Presented by:

Elizabeth Daly, MPH, Infectious Disease Surveillance Chief, Bureau of Infectious Disease Control, Division of Public Health Services, New Hampshire Department of Health and Human Services

Terri Forsten, M.Ed., Assistant Superintendent of Schools, Laconia School District

Moderated by:

Marcella J. Bobinsky, MPH, Section Chief, New Hampshire Immunization Program, Division of Public Health Services, New Hampshire Department of Health and Human Services

Full Agenda

12:30-1:30 Lunch & Celebrations

Armory

Enjoy a delicious grilled chicken salad with mixed greens, cucumbers, tomatoes, croutons, your choice of dressing served with warm rolls and butter. Dessert is a surprise!

Celebrations

Join us in celebrating the **50th Anniversary of the Vaccine Assistance Act or Section 317** of the Public Health Service Act and the **10th Anniversary of the New Hampshire Vaccine Association!**

Enacted in 1962, the Vaccine Assistance Act or Section 317 was initially designed to purchase polio, diphtheria, pertussis, tetanus, and measles (added in 1965). As more vaccines have become available, the program has been used to purchase all vaccines recommended by the Advisory Committee on Immunization Practices (ACIP).

The State of New Hampshire presently purchases all vaccines recommended under the US Childhood Immunization Schedule. They are purchased for all resident children, regardless of insurance coverage or income, through the age of 18. The New Hampshire Vaccine Association was formed as a cooperative undertaking among the New Hampshire Department of Health and Human Services, the New Hampshire Insurance Department, and the insurance industry. RSA 126-Q was adopted by the New Hampshire legislature effective June 17, 2002.

1:30-2:30 Deadly Choices: How the Anti-Vaccine Movement Threatens Us All

Armory (Credit: 1.00)

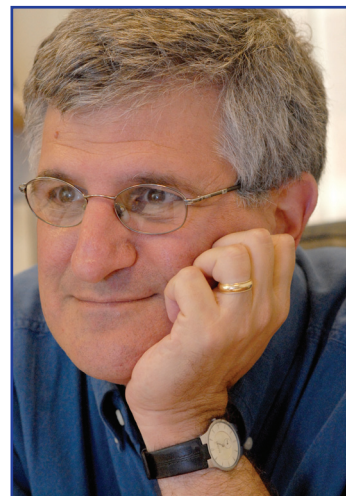

Throughout the history of vaccines, a number of individuals have decried vaccines as harmful. Their cries have often been picked up by the writers and reports of the day based on their ability to generate fantastic news stories, not scientific treatises. Today, proponents of vaccine struggle against powerful and omnipresent anti-vaccine material that is not based on scientific truth. How we speak about vaccines has become a critical skill for healthcare providers.

Following this session, participants will be able to:

- ◆ Describe the best method to educate the media about the science of vaccines;
- ◆ Explain how individuals who are strictly opposed to vaccines dismiss science as a method of insuring vaccine safety;
- ◆ Discuss why current day media are so important in the spread of vaccine hesitancy and refusal.

Presented by:

Paul A. Offit, MD, Chief, Division of Infectious Diseases, The Children's Hospital of Philadelphia, and Author

Full Agenda

2:30-3:00 Break, Refreshments & Time for Exhibitors

Salon A

Armory

Dr. Offit book signing for those that won his book in the raffle.

3:00-4:00 Concurrent Sessions

The session that you pre-registered for is listed on the back of your nametag.

Communicating with Parents about Pediatric Vaccines: Should this be a painful topic?

Salon B
(Credit: 1.00)

NOTE:
This session is a repeat from 11:15 however it has a reduced question and answer period.

Have you received questions from parents about their child's vaccines? Which ones are necessary and which are simply "recommended?" Concerns about the safety of childhood immunizations? Requests for altered immunization schedules? Over the years there has been a great deal of perceived controversy around the safety and necessity of pediatric immunizations. Everett Lamm, MD, FAAP of Core Physicians' Exeter Pediatrics practice will dispel the myths, answer questions, and provide current, reliable, evidence-based information and guidelines to help parents and guardians make informed decisions about this essential component of childhood preventative healthcare. Following this session, participants will be able to:

- ◆ Appraise the impact of vaccinations on all vaccine preventable diseases included in the ACIP vaccine schedule, emphasizing more uncommon infectious diseases that are often under-diagnosed;

Full Agenda

Clinical Recognition of Vaccine Preventable Diseases (Continued)

- ◆ List at least three signs/symptoms/complications of vaccine preventable diseases, enhancing effective counseling for patients/parents relative to the benefits and risks of vaccinations;
- ◆ Identify at least two clinical manifestations of these illnesses affording participants improved and more timely diagnostic skills, especially relative to recent lapses in vaccination rates leading to recurrent disease.

Presented by:

David Fredenburg, MA, MD, Massachusetts College of Pharmacy and Health Sciences – Manchester/Worcester, School of Physician Assistant studies

Communicable Diseases & Office Procedures

Webster
(Credit: 1.00)

How do you protect your well patients from potential communicable diseases while in your waiting room? Learn practical procedural points on infection control measures for outpatient environments and how to protect patients, staff and visitors against the potential transmission of communicable diseases, recognize disease syndromes to determine if testing is appropriate, and how to practice appropriate testing procedures.

Following this session, participants will be able to:

- ◆ List at least two reasons for using appropriate infection control practices when dealing with communicable disease in the office setting;
- ◆ List at least two disease syndromes that could be considered communicable based on symptomatology;
- ◆ Identify at least three basic elements of a Communicable Disease Action Plan in the office setting;
- ◆ List two appropriate testing procedures for several vaccine preventable diseases in the office setting;
- ◆ Describe the steps used to implement an infectious disease action plan in your own facility.

Presented by:

Xan Gallup, RN, Triage Nurse, Newport Health Center/New London Hospital

Darlene Morse, RN, M.Ed., CHES, CIC, Public Health Nurse Program Manager, Bureau of Infectious Disease, Investigation Section, Division of Public Health Services, New Hampshire Department of Health and Human Services

Full Agenda

Adolescent Immunizations

Salon C
(Credit: 1.00)

Vaccines for adolescents present new challenges to medical provider offices. This session will explain the importance of teen vaccination and the risk of teens contracting HPV, meningitis or pertussis.

Following this session, participants will be able to:

- ◆ Explain the importance of vaccination against pertussis, meningococcal disease and human papillomavirus;
- ◆ Express the need to develop a plan to remind parents that teen vaccinations are important to their child's health;
- ◆ Employ data that demonstrates the rates of diseases that are preventable with the vaccines recommended for teens.

Presented by:

Jodie Dionne-Odom, MD, Deputy State Epidemiologist, Division of Public Health Services, New Hampshire Department of Health and Human Services

Accountability: Your Vaccine Management Plan

Frost
(Credit: 1.00)

This workshop will address overall vaccine management. It will include segments on vaccine storage and handling, tier ordering, and eliminating vaccine wastage. It will review vaccine management protocol requirements, required documentation for vaccine administration, and explain the Vaccine for Children (VFC) screening requirements.

Following this session, participants will be able to:

- ◆ Explain appropriate management and storage of your vaccine supply;
- ◆ Identify at least two strategies to eliminate vaccine wastage;
- ◆ Describe how to complete a Vaccine Management Protocol;
- ◆ Explain the roles of a Vaccine Manager and an Assistant Vaccine Manager;
- ◆ State the VFC screening documentation requirements.

Presented by:

Sandra Kelsey, BS, Vaccine Quality Specialist, New Hampshire Immunization Section, Division of Public Health Services, New Hampshire Department of Health and Human Services

4:00 Evaluation/Adjourn

Assembly

Please return your completed evaluation form to the conference registration table in exchange for your CEU/CME/attendance certificate.

Disclosures

NH Immunization Conference *Achieve Immunization Excellence* Vaccinate for Life

Wednesday, March 21, 2012 ~ Radisson Hotel, Manchester, NH

In accordance with the Standards for Commercial Support and the Essentials of ACCME the following disclosures are being provided:

Presenter's Disclosures

Immunization Update 2012 and Beyond: The Latest in CDC/ACIP Recommendations
Wendy L. Wright, MS, RN, APRN, FNP, FAANP, Wright & Associates Family Healthcare, and Anderson Family Healthcare

- ◆ GlaxoSmithKline, Merck, Novartis Vaccines and Diagnostics, and Sanofi Pasteur – Honorarium received for speaking engagement.

None of the remaining speakers, nor their spouse or partner, of today's Conference have disclosed any relevant financial relationships with any proprietary entities producing health care goods or services, with the exemption of non-profit or government organizations and non-health care related companies, within the past 12 months beyond their employment affiliations noted. This includes any Commercial Supporter(s) of this activity
