Extra

Structura de bar este scheletul care confera forma si integritatea barului, asigurand si imbinarea uniforma intre zona de lucru din spatele barului si zona de design / arhitectura perceputa de client.

Ea a fost creata respectand standardele si normele internationale in domeniu.

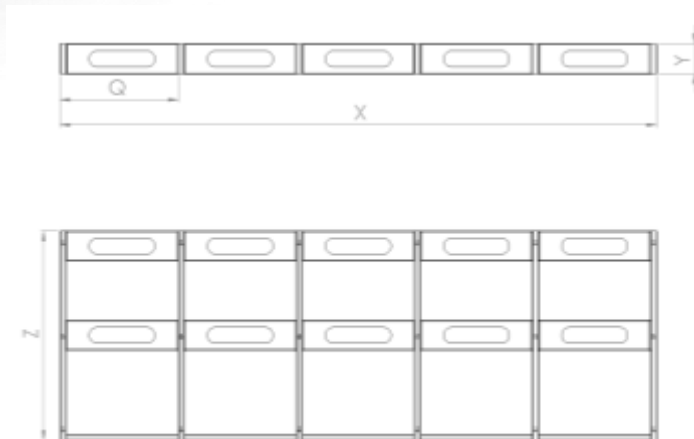

Avantajele structurii de bar:

1. **Zona tehnica** prin interiorul structurii ce permite trecerea partii electrice, alimentare si scurgere apa, etc.
2. **Modularitate** – fiind gandita pe segmente, se pot face pe orice lungime, ulterior putand fi modificata dupa dorinte.
3. **Rezistenta** – aceasta structura nu are nevoie de alte console sau elemente de sustinere care pot incurca utilizarea zonei interioare a barului.
4. **Montare usoara** – fiind gandita sa se intervina cat mai putin la locatie, aceasta structura se monteaza foarte usor, neavand nevoie de sudura, vopsire, unelte speciale. Montarea se poate face chiar si daca restaurantul/barul isi desfasoara deja activitatea.

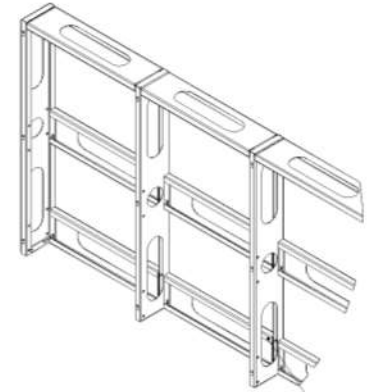

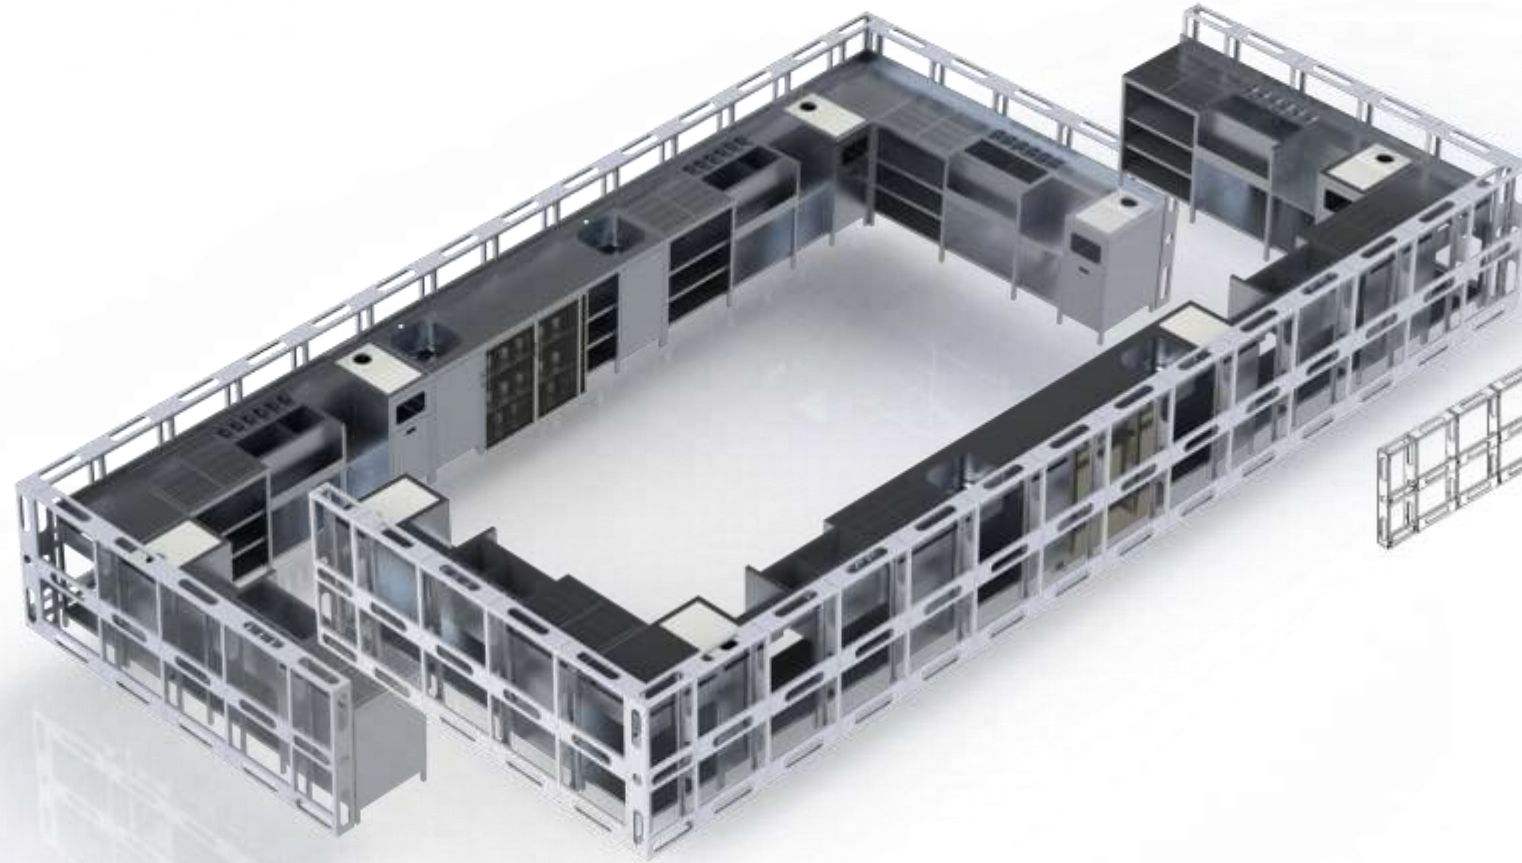

Structura Bar - Model 1 (N/STR)
