TAKE-AWAY DESSERT PACKAGING

Matthew Webber

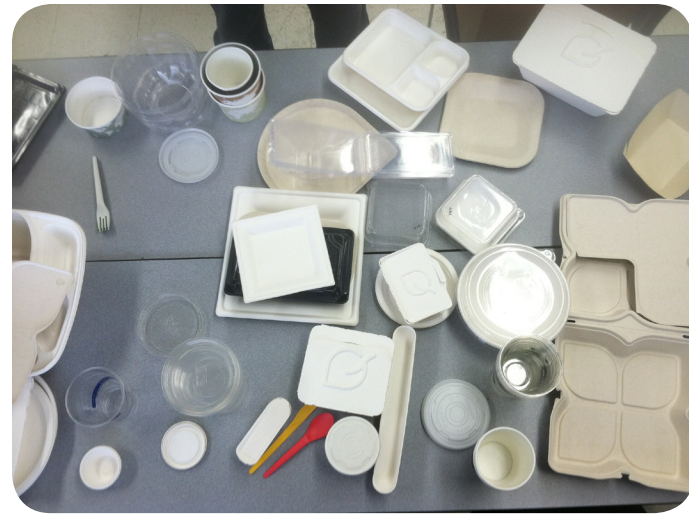

Every chef knows: the way something looks effects the way it tastes.

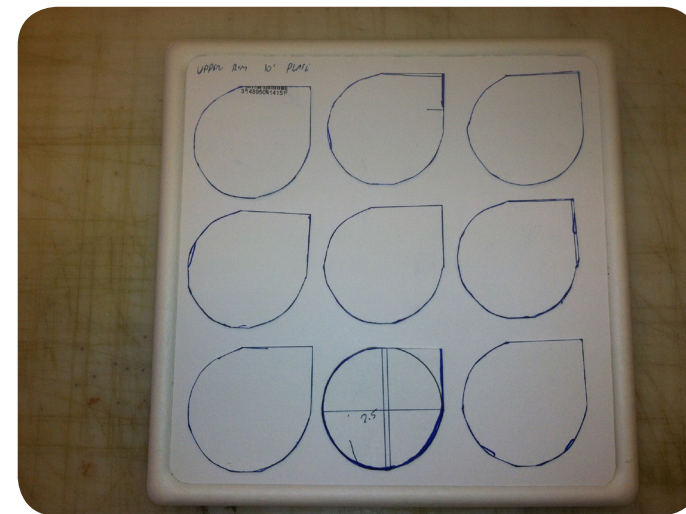

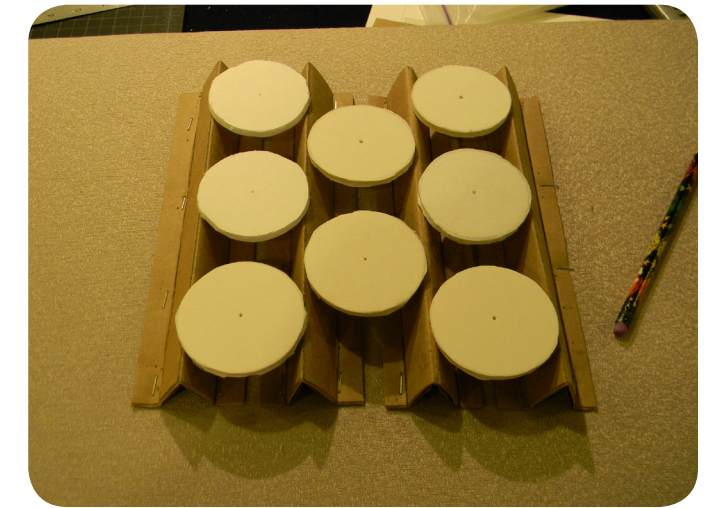

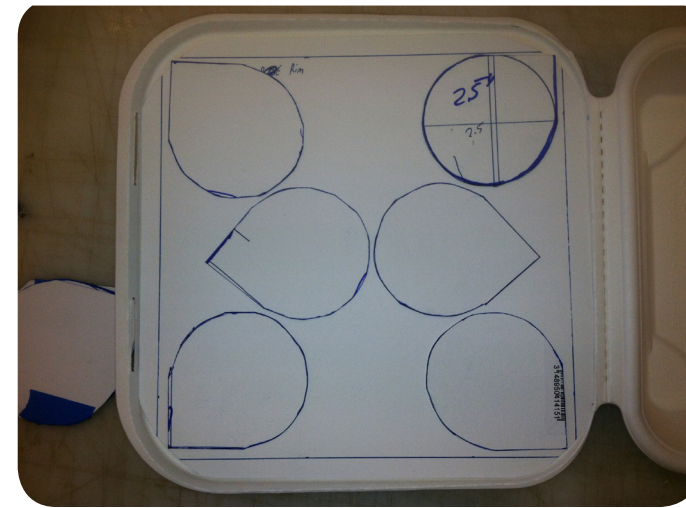

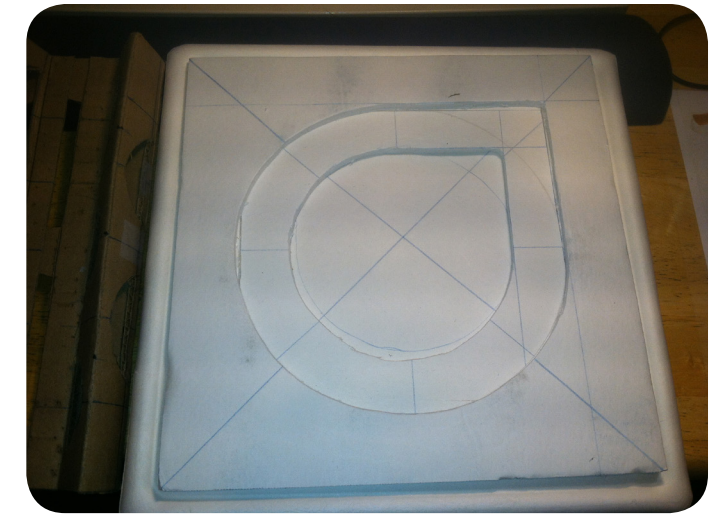

They also know that the X-factor is what your dessert look like when it arrives on the table.

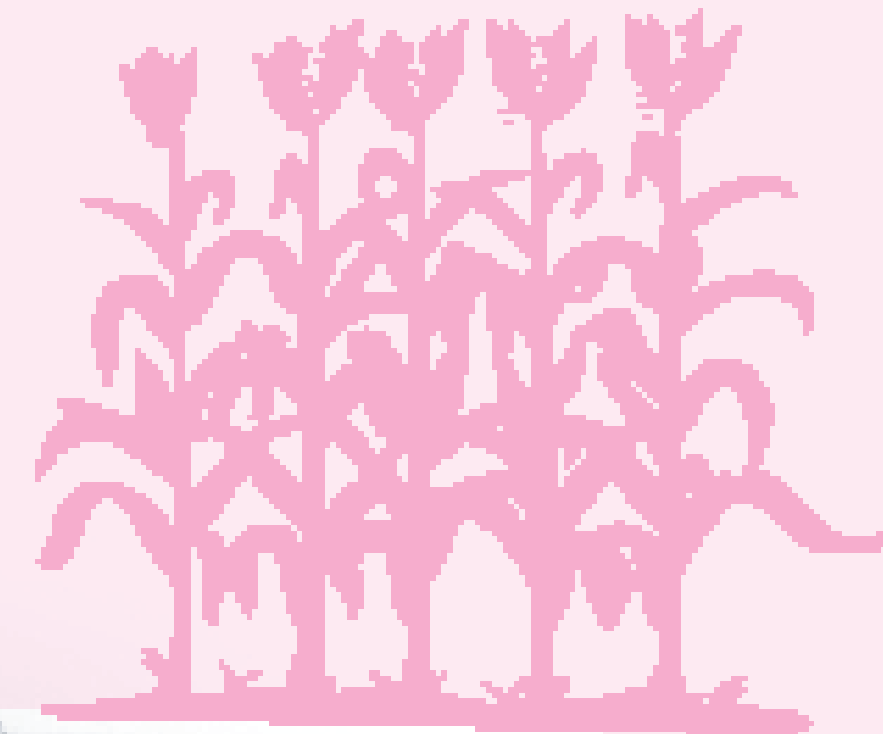

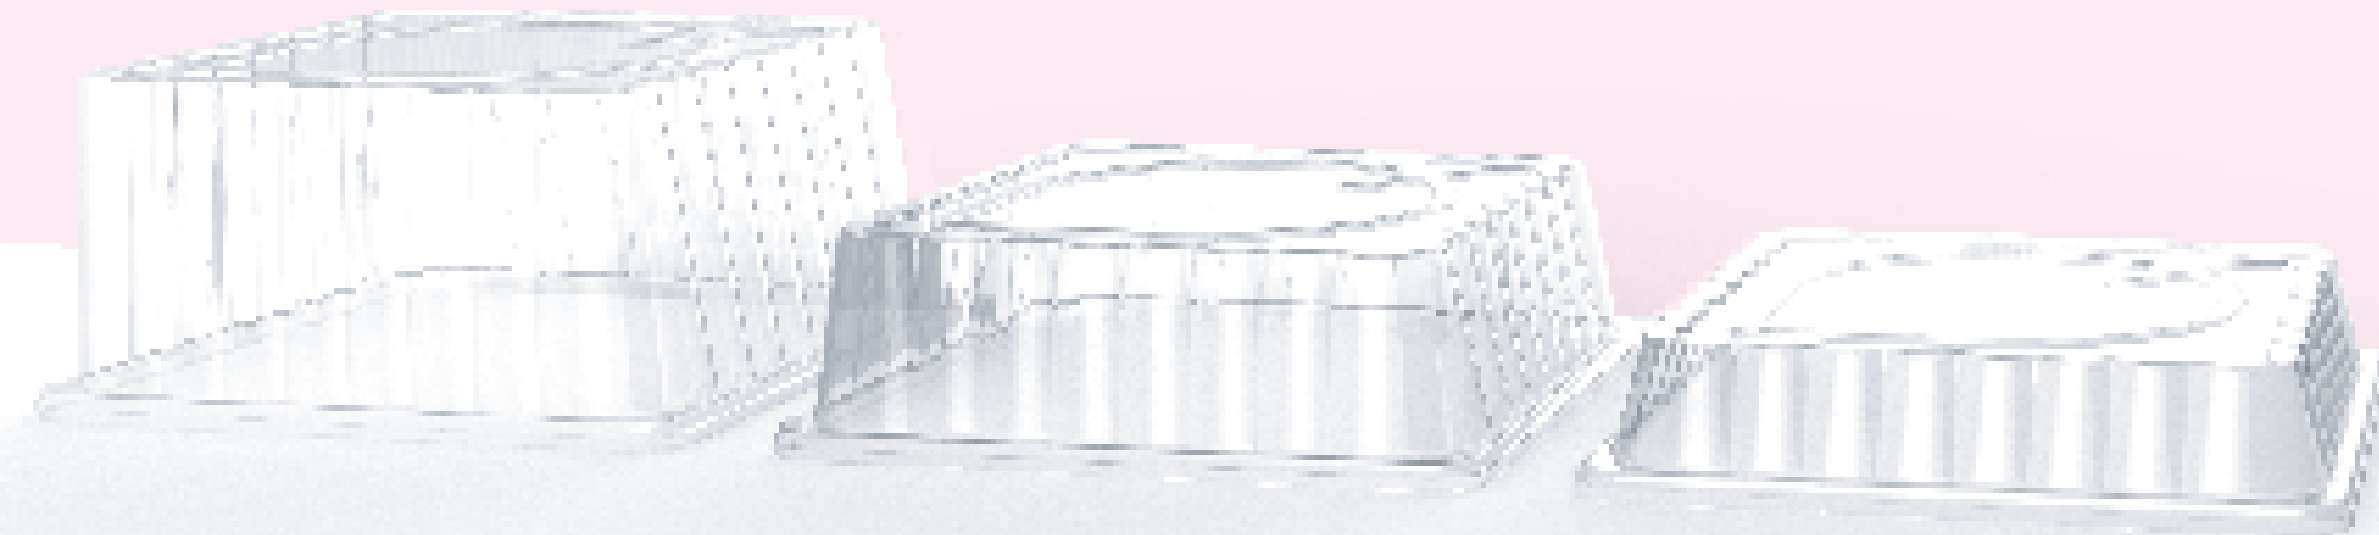

PATISSERIE

Initial work was based on designing inserts to adapt the existing product line, but soon it was realized that an entirely new product line was needed. With initial constraints removed, the design goals were expanded to create as expansive and universal a system as possible.

PATISSERIE

PLA, a corn derived plastic, is biodegradable, compostable and as strong as the petroleum based alternatives.

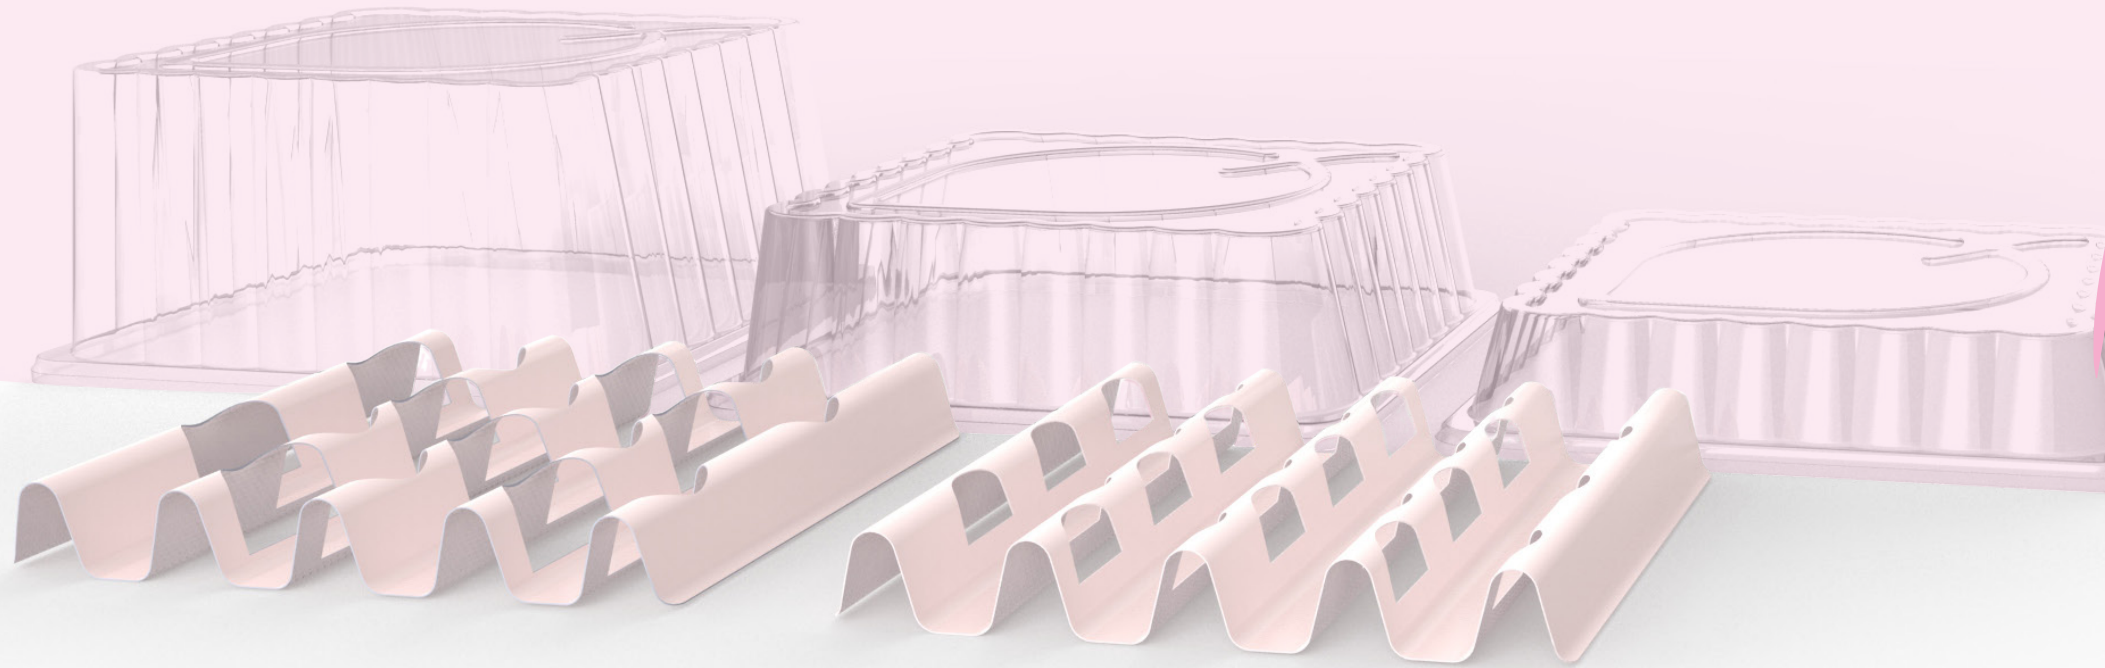

Available in 40, 90 & 150 mm heights.

RENEWABLE
COMPOSTABLE
BIODEGRADABLE

LIDS

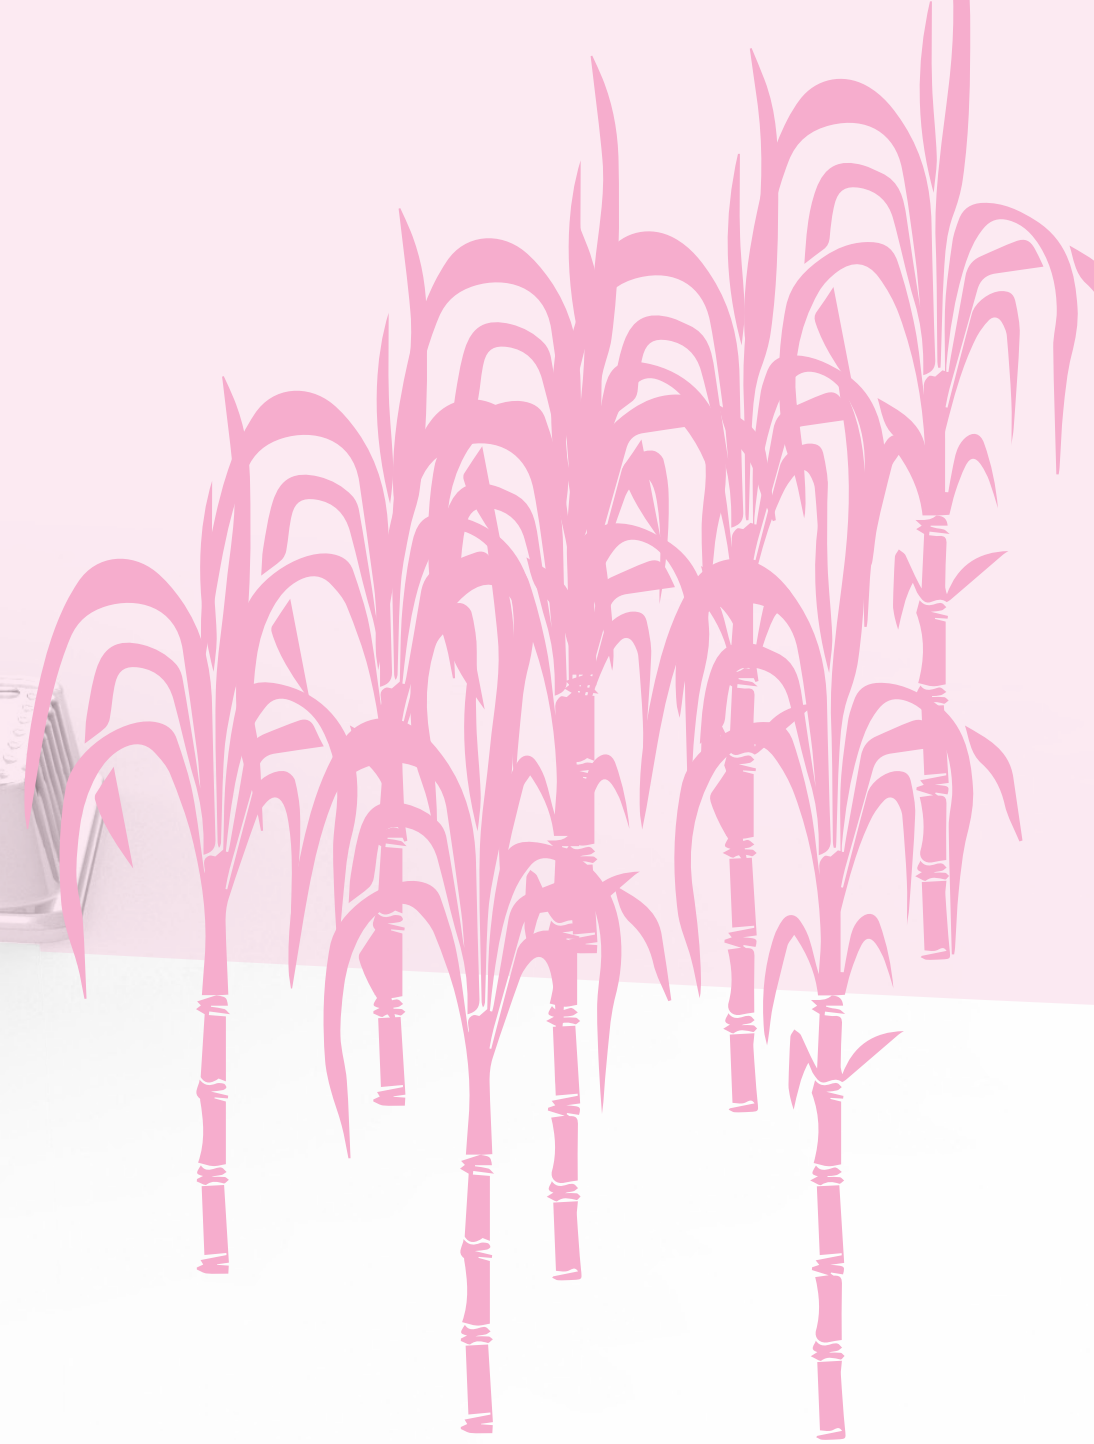

PÂTISSERIE

Large Insert holds 8

Standard Insert holds 12

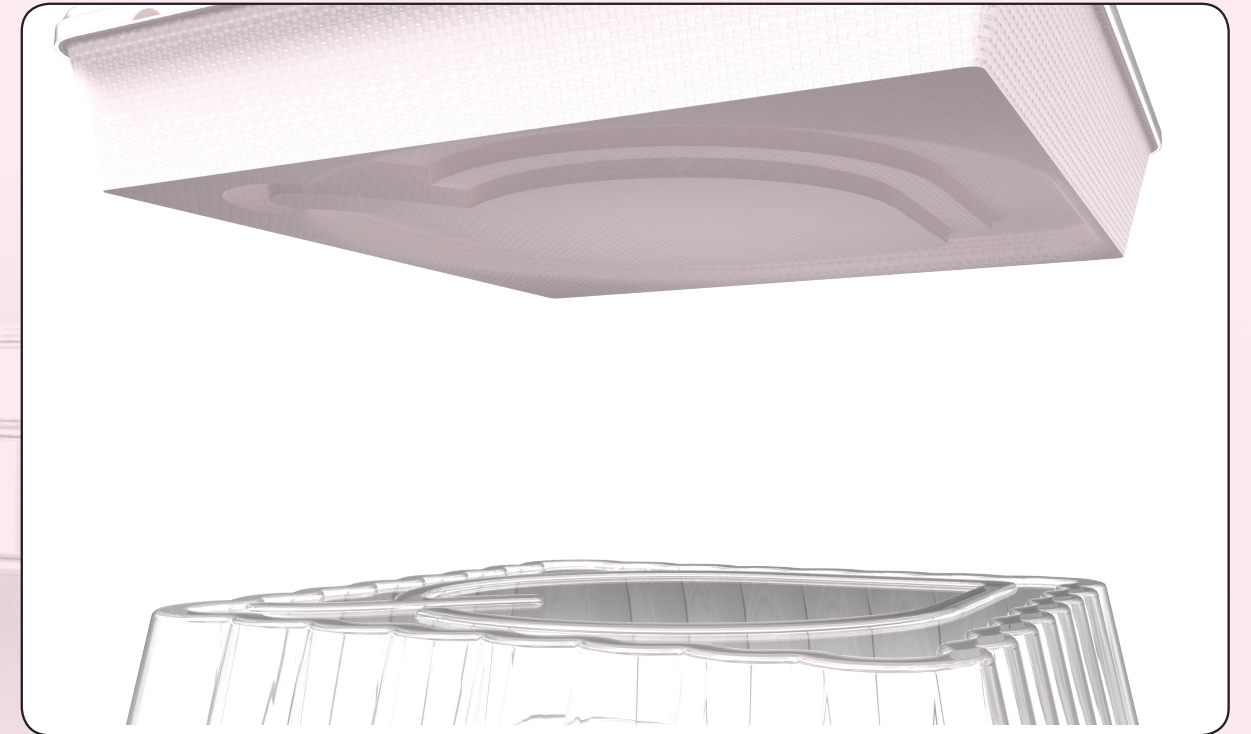

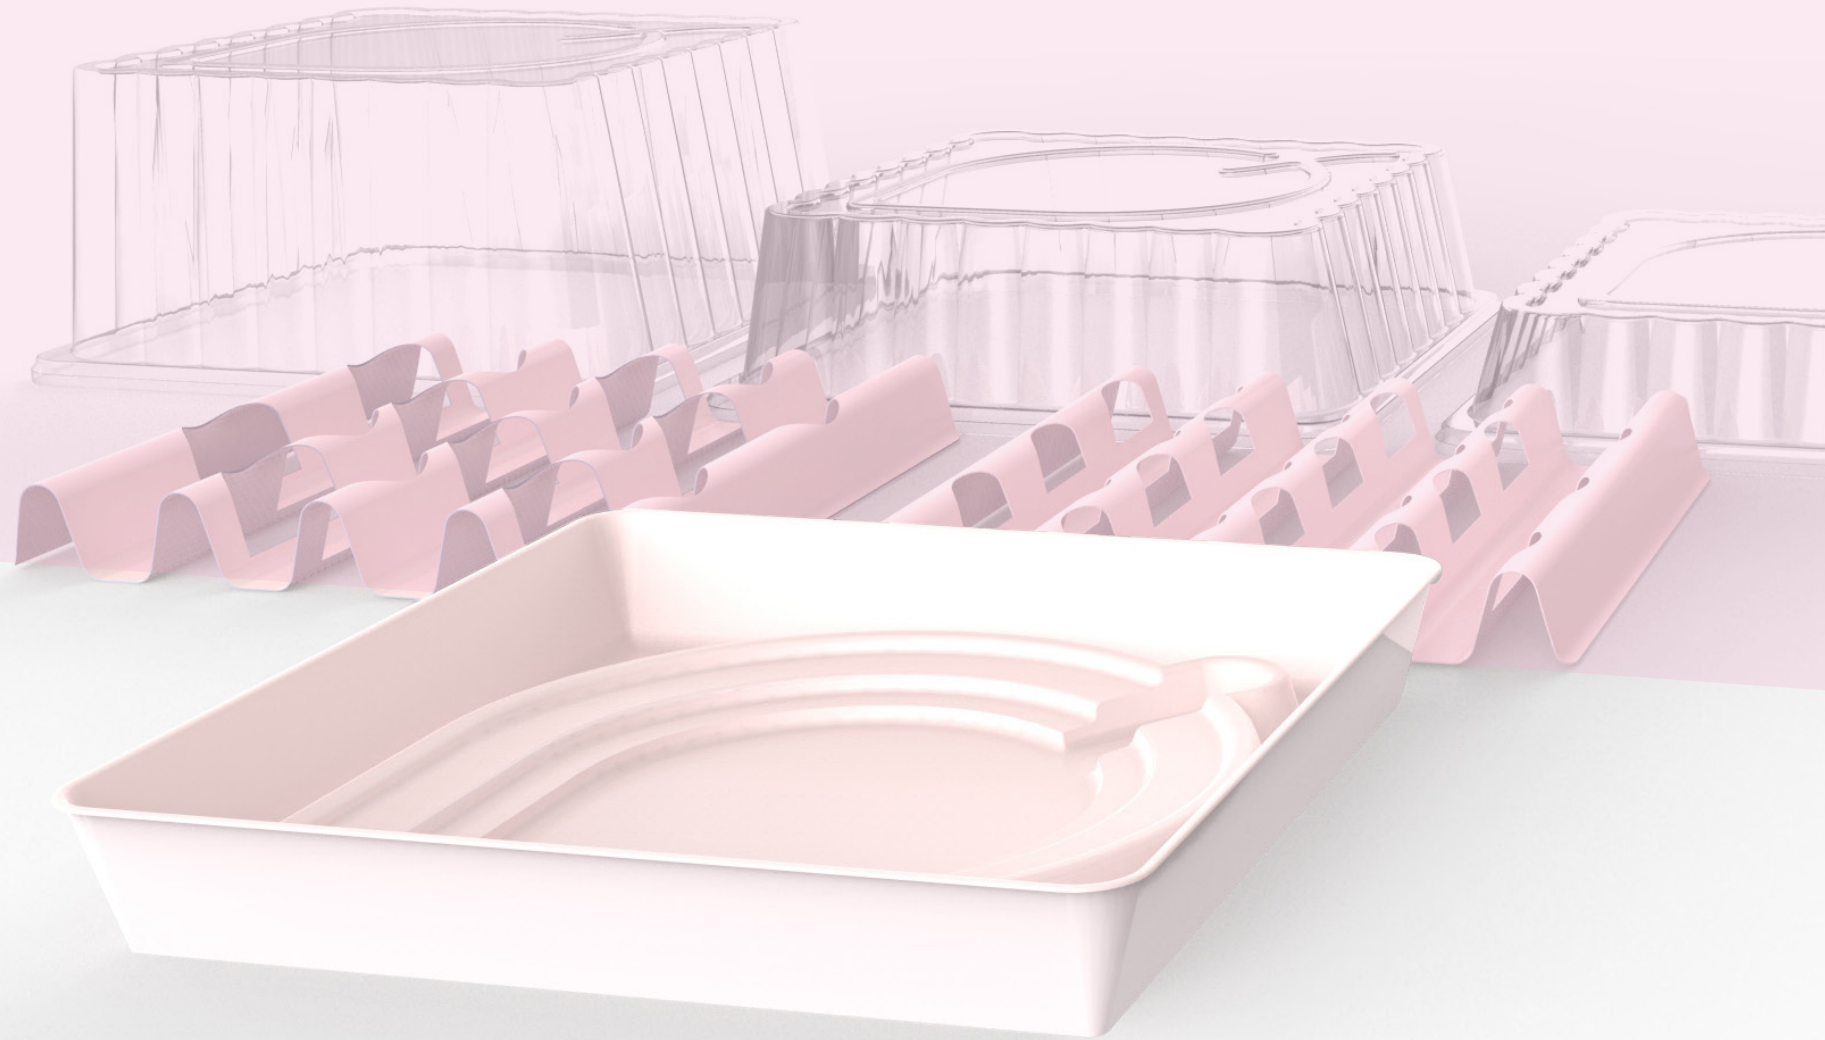

Both keep delicate and frosted individual desserts safe and separate for the ride home.

Bagasse, is a biodegradable and compostable sugar cane byproduct that would otherwise be burned as waste.

INSERTS

PATISSERIE

Embossed logos on base and lids enhance stackability and eliminate shifting.

Molded base secures 6*-12" cake rounds, 7-10" pie tins and loose desserts that don't require separation.
