BLOCKER™

Soil Macro

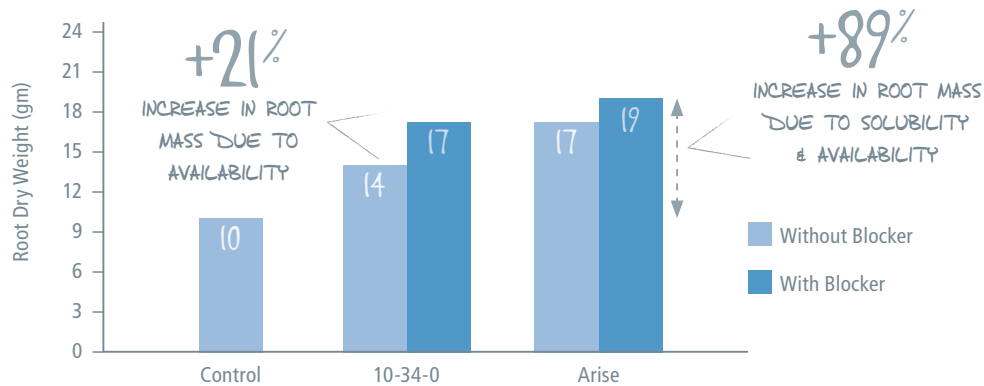

BLOCKER™

Biological
Activators™

Blocker maximizes the nutrient use efficiency of soil-applied phosphorus and other essential nutrients. The key to this proprietary product is the patented chemistry that complexes nutrients to keep them available in the soil for a longer period of time.

- Keeps the soil-applied phosphorus more readily available to the plant
- Strong complexer ensures nutrients stay in soil solution
- Seedling safe technology
- Complementary and compatible with Arise™ Micro-Che™, UAN, 10-34-0 and ATS

INCREASED P AVAILABILITY = DELIVERS GENETIC POTENTIAL

Rate of seed placed phosphorus was 20 lb P2O5/ac.
Summary of Independent Trials, Western Canada.
Blocker applied at 1 L/ac.

Application Details

Product	Analysis	Rate (L/ac)	Timing
Blocker	5-15-5 + BA	1.0	Soil
