KINETIC™ 

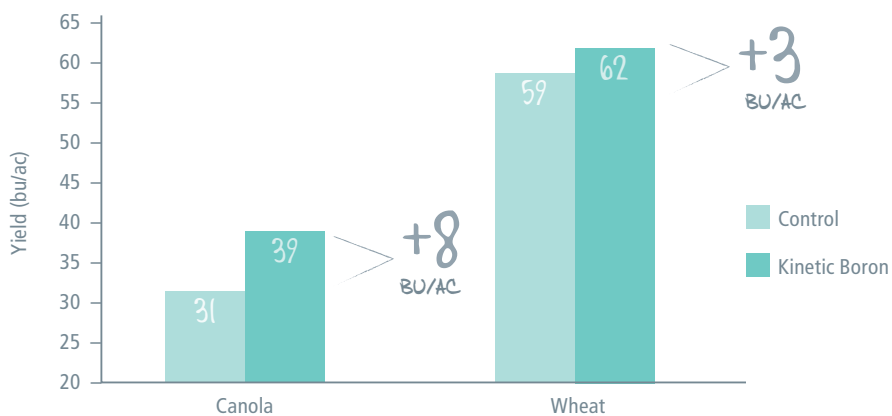

Foliar Micro

Kinetic is the premium line of foliar micronutrients designed to address and overcome specific micronutrient deficiencies in the plant.

- Four Foliar Micronutrients available to meet your plant's needs:
 - Kinetic Boron – Boron is essential for cellular strength, pollination and sugar movement
 - Kinetic Copron – Copper increases structural integrity and avoids pollen sterility
 - Kinetic Zicron – Superior zinc delivery to stimulate the production of natural growth hormones in the plant
 - Kinetic Manron – Manganese enhances photosynthesis and nitrate assimilation in the plant
- The Kinetic line is 100% plant available and crop safe
- Powered by two biostimulants – Transit S Technology and a Biological Activator
- Kinetic improves fertilizer use by increasing the mobility and uptake of the nutrient in the plant

BORON DRIVES POLLINATION = DELIVERS GENETIC POTENTIAL

Field Demonstration Western Canada Trials (2012, 2103).
Kinetic Boron applied at 0.5 L/ac at BBCH Stage 62 and 45 for canola and wheat, respectively.

Kinetic Product Family

Product	Analysis	Rate (L/ac)	Timing
Zicron	6.0Zn-1.0Mn-4S + Transit-S + BA	0.5-1.0	Foliar
Copron*	5.0Cu-2.5S + Transit-S + BA	0.5-1.0	Foliar
Manron	5.0Mn-3S + Transit-S + BA	0.5-1.0	Foliar
Boron	8.0B + Transit-S + BA + TE	0.5-1.0	Foliar

* The high rate of Copron may cause crop injury. Please consult with an ATP Nutrition technical representative before applying.
