PRECEDE[®]

Seed Nutrition

PRECEDE[®]

CONVEY[™]

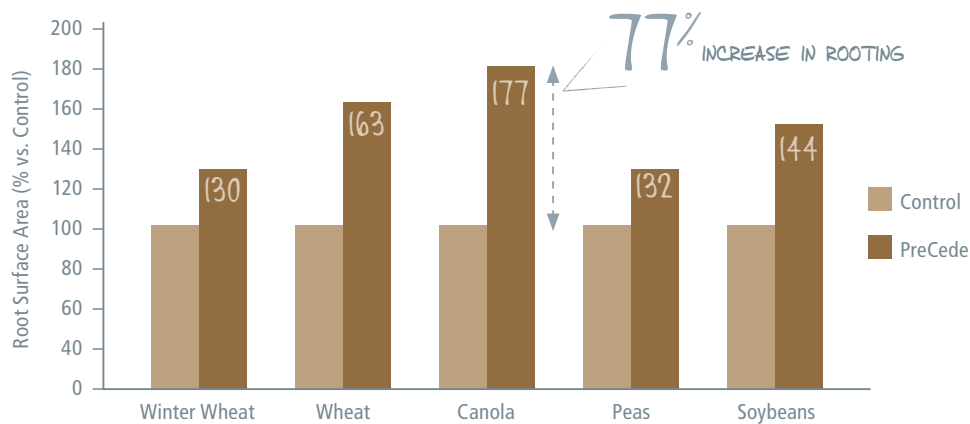

Transit-S

Biological Activators[™]

PreCede is the premium seed nutrient dressing designed and field tested to deliver the essential nutrients in the proper form and ratio to successfully cold start the crop. PreCede is Stage 1 in the System of Chemtrition[®]

- Designed specifically for each crop
- Powered by two biostimulants - Transit S and a Biological Activator (BA) to drive rooting and respiration
- Improves seedling vigour, rooting and the overall root architecture to support nutrient uptake by the plant
- Improves overall plant health to help overcome environmental and biological stresses
- Rhizobium friendly formulations designed for Nitrogen fixing crops to help drive nodulation

MORE ROOTS = DELIVERS GENETIC POTENTIAL

Summary of 33 replicated trials across Western Canada (2012-2015)
Root surface area measurements generated using WinRhizo[™] scans.

PreCede Product Family

Product	Analysis	Rate (L/MT)	Timing
Cereal	1-6-0-5.0Zn-2.5Mn-0.125B + Transit-S + BA	3.0	Seed
Wheat	0-7-1-4.0Zn-2.0Cu-1.0Mn-0.125B + Transit-S + BA	3.0	Seed
Canola	5-19-4-4.0Zn-1.0B + Transit-S + BA	6.0	Seed
Pulse	2Ca + Convey + BA + TE	3.0	Seed
Corn	2-28-3-4.0Zn-2.0Mn + Transit-S + BA	6.0-9.0	Seed
Soybean	Transit-S + BA + TE*	1.0	Seed

*TE - Trace Elements essential for optimum nodulation
