Transit-S™ 

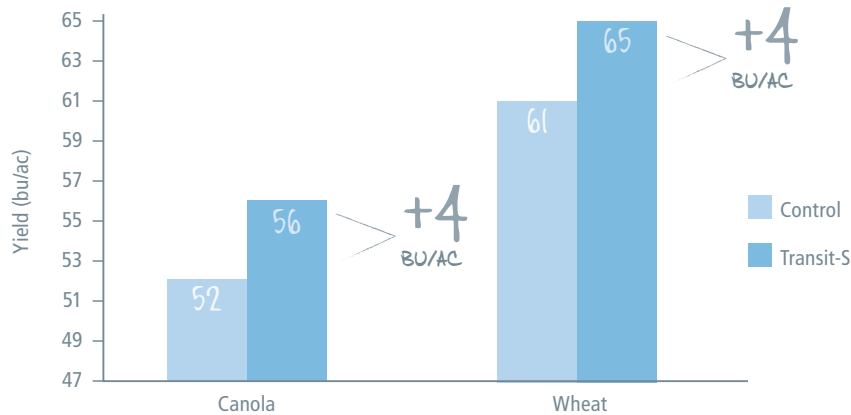

Soil Macro

Transit-S Technology, is a premium biostimulant, exclusive to ATP Nutrition. The patented technology works in the plant to drive respiration. Increased respiration helps to drive rooting, improve nutrient use efficiency and alleviate stress.

- Increases rooting
- Increases respiration and metabolism
- Superior uptake of applied nutrients
- Increases yield and backed by over 900 independent replicated trials
- Complementary and compatible with the entire ATP line of products.
- Formulated into PreCede, ReLeaf and the Kinetic line of products.
- Can be applied to a wide range of crops
- Backed by the Transit-S Technology Performance Guarantee

TRANSIT-S TECHNOLOGY = DELIVERS GENETIC POTENTIAL

Summary of 22 field trials in Western Canada.

Sources: Agri-Trend, Hammond Research, ICMS, AgQuest and WestWinds.

Transit-S applied at 200 ml/ac with banded fertilizer.

Application Details

Product	Analysis	Rate (ml/ac)	Timing
Transit-S	PPA	200	Soil
Transit-S	PPA	100	Foliar
