

WHAT ARE THE ADVANTAGES OF UPWARD™?

- Can provide benefits to soil health, food for microbial populations, and aid in nutrient uptake by the plant
- Designed to be paired with liquid phosphate sources or in the absence of fertilizer
- Aids in strong stand establishment by increasing seedling vigor as well as nutrient mobilization to support root and shoot development
- NET technology increases nutrient availability
- nCeption technology provides carbon sources that increase nutrient absorption
- NTake technology maximizes nutrient mobility to critical plant systems

WHAT IS UPWARD™?

UpWard™ is a customized humic acid base coupled with fulvic acid, spiked with complex carbohydrates, simple sugars and NET Technology designed for soil and foliar applications. **UpWard™** is engineered to enhance plant performance and vigor, improve phosphorus efficiency and availability, and root uptake.

APPLICATION RATES

In-Furrow or 2x2

2 qts (64oz) per acre

Foliar

1 qt (32oz) per acre

Transplant or Drench

2 qts (64oz) per acre
