OLG

Aug 2014 - Jun 2020

- Delivered expertise in the administration of neuromodulators and dermal filler implants, enhancing patient satisfaction and outcomes.
- Executed aesthetic sclerotherapy treatments, effectively addressing vascular concerns and improving skin appearance.
- Performed superficial and medium-depth medical grade chemical peels, contributing to skin rejuvenation and patient confidence.
- Demonstrated proficiency in laser and light therapies, including IPL, BBL, NdYag, Diode, and Fraxel technologies, optimizing aesthetic results.
- Administered radiofrequency treatments, specifically utilizing Thermage technology, for skin tightening and contouring.
- Provided training and mentorship for new nursing and mid-level provider hires, fostering a collaborative and knowledgeable team environment.
- Offered client education and follow-up support, ensuring ongoing care and satisfaction with aesthetic treatments.

Registered Nurse Medical Surgical/ ICU Apr 1999 - Dec 2008
UPMC Beaver Valley/ Aliquippa Hospital

- Admitted and evaluated acute and critical care patients from the emergency department, ensuring thorough assessments and prompt interventions.
- Delivered patient care across multiple units, including ICU, PACU, ER, medical-surgical, and step-down units, addressing a wide range of medical needs.
- Reviewed and administered medications per physician directives, ensuring accuracy and compliance with protocols.
- Showcased expertise in ventilatory management, including handling BiPAP and ventilator settings for patients experiencing respiratory distress.
- Analyzed and communicated lab results and blood gases, supporting rapid clinical decision-making.
- Managed invasive lines such as Swan-Ganz and arterial lines, ensuring proper placement and monitoring.
- Assisted with dialysis and chelation therapy for patients facing renal and toxicological challenges, coordinating care with multidisciplinary teams.
- Carried out pre-operative and post-operative responsibilities, including patient education and monitoring recovery to achieve optimal outcomes.
- Conducted accurate telemetry interpretation and managed IV sedation protocols within the established scope of practice.
- Functioned as a charge nurse, supervising nursing staff, coordinating patient care, and providing leadership for rapid response and IV teams.
- Administered blood, plasma, albumin, and platelet infusions, ensuring adherence to safety protocols and monitoring for adverse reactions.
- Led recovery efforts for after-hour emergency cases, providing critical care and support to patients in need of immediate attention.
- Acted as a code team leader, coordinating rapid response efforts during cardiac arrest situations and directing the team to ensure effective resuscitation practices.
- Assisted with rapid intubation procedures and provided respiratory therapy support, enhancing patient outcomes in critical situations.
- Collaborated with multidisciplinary teams to develop and implement individualized care plans for patients, promoting holistic recovery.
- Educated patients and families on post-procedure care, discharge instructions, and ongoing treatment options.

- Maintained accurate and timely documentation of patient assessments, interventions, and outcomes in electronic health records.
- Participated in ongoing professional development and training to stay current with best practices in nursing and emergency care.

RN IV Therapist

Dec 1999 - Dec 2000

The Medical Center Beaver

- Administered blood transfusions safely and efficiently, ensuring adherence to hospital protocols and patient monitoring during procedures.
- Specialized in IV therapy, providing hydration and medication administration to patients with varying medical needs.
- Demonstrated expertise in performing difficult IV sticks, particularly in pediatric patients and those with dehydration, utilizing advanced techniques to minimize discomfort and maximize success.
- Conducted large volume phlebotomies, ensuring accurate collection and processing of specimens for diagnostic testing.
- Managed after-hours PICC and central line blood transfusions, ensuring continuity of care and addressing any complications that arose during off-peak hours.
- Facilitated long-term IV therapy medications, monitoring patient response and adjusting treatment plans as necessary to optimize outcomes.
- Collaborated with multidisciplinary teams to develop individualized care plans, enhancing patient safety and promoting effective communication among healthcare providers.

Education

RN- ADN

Aug 1994 - Dec 1996

Community College of Beaver County

In the Associate Degree in Nursing (ADN) program, I gained a comprehensive understanding of both theoretical and practical aspects of nursing. The curriculum emphasized essential nursing concepts, patient care techniques, and critical thinking skills necessary for effective clinical practice. Through hands-on experiences in diverse healthcare settings, I developed my ability to communicate effectively with patients and collaborate with interdisciplinary teams. Additionally, the program highlighted the importance of evidence-based practice and lifelong learning in nursing, equipping me with the tools to adapt to the ever-evolving healthcare landscape. Overall, the RN-ADN course has prepared me to deliver compassionate care and advocate for patients in various clinical environments.

BSN-Nursing

Aug 2003 - Jun 2005

University of Pittsburgh

In the Bachelor of Science in Nursing (BSN) program, students embark on an accelerated path to a Master of Science in Nursing (MSN), allowing them to efficiently transition into advanced nursing roles. This educational journey enhances clinical skills, critical thinking, and leadership abilities, preparing graduates for the complexities of modern healthcare. Through rigorous coursework and hands-on clinical experiences, students gain a comprehensive understanding of patient care, health promotion, and community health. The integration of advanced nursing theories and evidence-based practices equips future nurses with the tools necessary to excel in diverse healthcare settings and to advocate for patients.

effectively. Ultimately, this program not only fosters professional growth but also instills a lifelong commitment to learning and excellence in nursing practice.

MSN- Advanced Practice Nursing

Jun 2005 - Jun 2007

University of Pittsburgh

In the Master of Science in Advanced Practice Nursing (MSN) program, I gained comprehensive knowledge and skills essential for becoming a nurse practitioner specializing in acute and adult care with a focus on cardiopulmonary health. This course emphasized evidence-based practice, advanced clinical assessment, and diagnostic reasoning, which are critical for managing complex patient populations. I learned to apply advanced pharmacology and pathophysiology principles to develop effective treatment plans, while also enhancing my ability to collaborate with interdisciplinary teams. This program has equipped me with the competencies necessary to provide high-quality, patient-centered care in diverse healthcare settings, ultimately preparing me to address the unique challenges in cardiopulmonary nursing.
