# World Travel & Leisure Sector

- The aviation industry has been on the rise the last two decades with the demand and desire for new air planes. Companies such as Boeing and Air Bus are constantly seeking ways to increase the delivery time for future new airplane orders. This demand continues to persist as the volume further expanded this has impacted the sector significantly. The cost of a flight two decades ago has been reduced to help the middle and lower class pool enter the sector.
- This trend will help us understand what the travel and leisure sectors have to work with. For example, if we look at the older hotels and resorts that offer the lowest rates. They benefit from this sector in general. Working on more affordable prices delivering results for demand. Over 80% of these consumers purchase electronic insurance products. Due to their economic status.
- Reducing operating expenses can be challenging at times. Using refurbished systems will reduce the cost of a total or partial loss.
