

DURA-EDGE

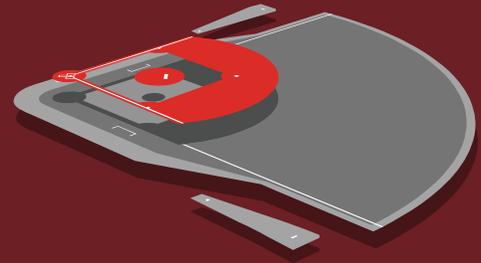

PRO SLIDE[®]

ENGINEERED CONDITIONER

PROFESSIONAL

Typical Calcined Clay Issues:

- Migration and buildup
- Breakdown/Contamination
- High application rate

The ProSlide Professional Solution:

- Greater hardness means less breakdown and increased durability resulting in longer lasting particles
- Larger particles are screened out for professional appearance
- Reduced amount of fines provides more of an even coverage with less contamination

Use as a stand-alone conditioner or combine with ProSlide Professional expanded shale topdressing for greatest infield playability and predictable absorption percentages to fit your needs..

Delivery Options:

- 50 lb. Bags
