## WHY IGGYTRAP™ OF FLORIDA?

IggyTrap™ of Florida is the true innovative leader in providing an Iguana mitigation solution. We specialize in developing true long-term solutions for neighborhoods/HOAs, golf courses, recreational areas and parks, and municipalities. We don't believe shooting is a viable long-term solution; too many instances have occurred with public safety events and failed shootings resulting in injured, disabled iguanas. We will be as humane as possible at all times.

The Iguana problem cannot be solved overnight. However, with commitment to a long term, sustainable plan, it can be solved! If no action is taken, the problem will get exponentially worse.

IggyWrap™

## IggyWrap™ is the next level in tree wrap for Iguana prevention:

- Stops Iguanas from climbing trees. They look to trees for food and safety. Without it they'll move to a different location.
- Takes away access to rooftops- Iguanas access roofs and cause tens of thousands of dollars in damage.
- Fits trees of all sizes.
- Prices start as low as \$25/tree.

IggyWrap™ is a lightweight, durable, clear polymer that prevents Iguanas from climbing trees. As Iguanas climb the trees, they'll run into IggyWrap™. Their claws will be unable to catch the tree and they cannot stretch/reach beyond it to continue climbing. They have no choice but to turn back to the ground. You have now taken away their food and shelter!

IggyWrap™ is clear and colorless and will not distract from the beauty of your landscape, unlike aluminum tree wrap. IggyWrap™ will not harm your tree; It allows the natural sunlight to penetrate and offers no shelter for bugs and insects.

Each piece of IggyWrap™ is custom fit to each tree provides the best esthetics. IggyWrap™ is completely weatherproof and will withstand the elements.

## The #1 Commercial Iguana Trapping Solution—Bar None!

IggyTrap™

IggyTrap™ is specifically designed for the live and humane trapping of all the different invasive species of Iguanas currently overwhelming South and Central Florida. IggyTrap™ will:

- Catches dozens of Iguanas in a single unit
- Designed to catch Iguanas of all sizes
- Traps juvenile Iguanas well before they're ready to reproduce, reducing the "breeding population"
- Quiet operation and camouflaged for optimum discreetness
- No on-site euthanasia
- Traps ONLY Iguanas - no "non-target" animal captures
- Commercial construction for years of performance
- Designed for temporary or semi-permanent installation offering 24/7/365 operation

## IggyTrap™ - The Humane Solution to Trapping Iguanas

- Water access for trapped Iguanas
- Limited handling during transportation
- No on-site handling or euthanasia
- Quick on-site servicing
- Maintains continuous operation of the main trap
- Locking ground anchors to secure the trap from weather or theft, if necessary
