

April 15, 2026

I'm a national franchise owner and have been working with Top Drawer Development for over 15 years to build out our multiple Sport Clips locations in the Portland Metro market. TDD has made each new-store construction easy and smooth. As with any construction, materials delays, permitting issues, and unknown surprises frequently pop up. When this happened, TDD kept our projects on schedule with meeting our projected grand opening day – even if it meant working the final stretch 24/7. TDD has also been great for major upgrades and repairs within our stores. And, due to TDD's stellar reputation and knowledge with the Sport Clips fixtures and building process, I know of many Sport Clips owners in Oregon, Washington, and Idaho who have used TDD's skills and expertise in their new store constructions.

Opening and operating multiple locations is demanding enough without added construction headaches. Partnering with Top Drawer Development gave me peace of mind and the confidence that I had chosen the right team. They handled the details so effectively that I could stay focused on running my stores and preparing for a successful opening.

I happily recommend Top Drawer Development to other franchise owners of all types. Their reliability and expertise have earned them a trusted place on my team. When the time comes to update my other locations, I'll be turning to TDD again without hesitation.
