

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

**Monitoring Requirements Not Met for
BAKER COMMUNITY SERVICES DISTRICT During June 2022**

Our water system failed to monitor as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were OR will be taken.

Containment	Required Sampling Frequency	Number of Samples Taken	When all Samples Should have been taken	When Samples were or will be taken.
Total Coliform Absent/Negative	Number: 1 Sample every Month	1 June 2, 2022	June 2, 2022	July 7, 2022 Absent/Negative Result

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

Baker Community Services District received a violation for the month of June 2022. The violation stated the monitoring requirements were not met during June 2022. In the best interest of the Baker Community, Baker Community Services District performed water samples at multiple locations/elevations within our community. According to direction received from David Lopez-San Bernardino County Environmental Health Specialist, all water samples must be administered from the Baker Community Services District office only. The sample we collected June 2, 2022 was administered from Well #1 at Baker’s Wells field location. Baker Community Services District agrees to follow all direction from San Bernardino County Environmental

Health, all future water samples will be administered from Baker Community Services District office unless further guidance is provided by San Bernardino County Environmental Health Offices. Attached are the results of the June 2, 2022 water monitoring report.
