## **Round Grab RG-SAFELOCK**

The clamping force of the claws is maintained fully in all cases, even if the carrier is operated incorrectly.

- Gripping and laying concrete pipes.
- Patented safety locking system: When lifting the product, the grab generates tension on the pipe, which is maintained even when the product is set down.
- One-man operation
- With adjustable height supports, which can be adjusted with a scale using the external pipe diameter. This guarantees an optimum grab position.
- Slim design allows joint-sleeve pipes lying close together to be picked up onto the lorry loading area and used in very narrow trenches.
- With handles to guide the claw.
- The eye runs in a setting with 2 hanging positions. One is used for locked grabbing, the other for releasing the catch and for empty lifting. This allows operation with only one person.

**RG-20/85-SAFELOCK:** Increased grip width and increased working load limit as with RG-20/80. Besides concrete pipes, **stoneware pipes** can also be laid.

Easy adjustment of the outer diameter by means of a scale and a central lock pin. Rubber grippers.

Polyamide-coated height adjustment bracket.

Durable surface protection by galvanizing.

RG-75/125-SAFELOCK: Easy, continuous adjustment of the external diameter by means of a scale using threaded spindles. Crank included in the delivery.

Replaceable steel grab clamps with a reliable grip.

Optionally available: rubber gripper jaws to prevent surface damage.

Durable surface protection by galvanizing.

RG-100/150-SAFELOCK: Easy, continuous adjustment of the external diameter by means of a scale using threaded spindles. Crank included in the delivery.

Replaceable steel grab clamps with a reliable grip.

## **Round Grab RG**

Due to the ultra slim design the grab can be used in very slender trenches.

Exchangeable gripping elements to prevent concrete pipes from damage.

- With adjustable opening width by spring loaded bolts.
- With crane eye for attaching to crane hook.
- I With automatic release mechanism which means no additional operating personnel are needed.
- With height adjustment bars.
- Durable surface protection by galvanizing.

RG-8/40: Besides concrete pipes, vitrified clay pipes can also be gripped safely.
