

CD8 PROJECT EIS

Fact Sheet

ConocoPhillips Alaska, Inc. has submitted a Clean Water Act Section 404 permit application (number POA-2025-00203) to the U.S. Army Corps of Engineers (USACE) to further develop hydrocarbon infrastructure in the Colville River Unit by constructing the CD8 Project. The project would construct a drillsite, gravel road, pipelines, and ice roads east-northeast of Nuiqsut.

USACE has prepared an Environmental Impact Statement (EIS) to identify alternatives to the Project and analyze impacts. The EIS will be used as a basis for the permit decision in compliance with the National Environmental Policy Act and the Clean Water Act.

Alternatives Comparison

Project Component	Alternative B – Applicant's Preferred Alternative	Alternative C – Northern Alternative	Alternative D – Northwestern Alternative
Drillsite distance to Nuiqsut	2.1 miles east-northeast	3.1 miles northeast	2.5 miles northeast
Total gravel footprint	67.3 acres	46.9 acres	62.3 acres
New gravel road	6.1 miles	3.6 miles	5.0 miles
Ice road	27.2 miles	22.5 miles	24.4 miles
Alpine/Western North Slope ice road reduction per year	6.9 miles	4.4 miles	6.3 miles
Waterbody crossings	400-foot multi-span bridge at Lake L9324 4 culvert or culvert battery water track crossings	- Bridge same as Alternative B 5 culvert or culvert battery water track crossings	- Bridge same as Alternative B - Second 60-foot bridge at Lake M9606 5 culvert or culvert battery water track crossings
Pipelines	- Pipeline on new vertical support members: 2.5 miles - Pipeline on existing vertical support members: 21.5 miles	- Pipeline on new vertical support members: 1.8 miles - Pipeline on existing vertical support members: 14.1 miles	- Pipeline on new vertical support members: 3.1 miles - Pipeline on existing vertical support members: 18.0 miles

Schedule

Submit Comments by November 16, 2026

The most useful comments are specific and:

1. Identify missing or inaccurate analysis
2. Suggest additional alternatives, or
3. Identify information that would meaningfully inform the analysis.
