WORK HISTORY

Health & Safety Manager – Carpi Canada, Inc | 2025

- Managed sitewide HSE operations during 12-hour daily shifts, conducted consistent field presence across all work fronts, identifying hazards, coaching crews, and maintaining a positive safety culture seven days a week.
- Reported directly to the Company President/Project Director, providing daily safety performance updates and corrective action recommendations.
- Coordinated incident investigations, documentation, and follow-up actions.
- Oversaw worker onboarding, site orientations, pre-shift briefings, and verification of safe work permits and confined space forms.

Safety Advisor – Forgen Canada, Ltd | 2025

- Delivered third-party HSE services to support Imperial Oil compliance requirements for the North Slurry Wall project.
- Completed daily field inspections, hazard assessments, and safety documentation in accordance with Forgen and Imperial Oil standards.
- Supported Prime Contractor requirements through JHA review, FLHA verification, and safety documentation audits for all subcontractors.
- Coordinated with site leadership to identify trends, track HSE metrics, implement corrective actions, and enhance worker engagement around safe work practices.

Safety Advisor – PTW Energy Services | 2023-2024

- Maintained a visible field presence to promote a healthy and positive safety culture by interacting with workers 3-5 times daily
- Offered advice on how workers could improve hazard identification by encouraging them to spot 3 items around them that could be used for a BBO.
- Collaborated with client's HSE team and other contractor HSE members to promote a secure and safe work environment for all our workers.
- Supported incident investigations and executed corrective actions.
