

Our veterinarian has recommended the following vaccinations and medications for our particular breed of dog in our location as follows:

2 weeks of age: Pyrantel wormer

4 weeks of age: Pyrantel wormer
Toltrazuril

6 weeks of age: Fenbendazole wormer (3 days in a row)
Toltrazuril

8 weeks of age: Vanguard +5 (first puppy shot)
Fenbendazole wormer (3 days in a row)
Toltrazuril

Puppy shipped/picked up at 8 weeks. You may worm as your veterinarian suggests.

Here are our suggestions for boosters and worming.

12 weeks of age: Vanguard +5 (second puppy shot)
Panacur C - 3 days in a row
(Grams determined upon puppy weight)

16 weeks of age: Vanguard +5 (third puppy shot)
Panacur C - 3 days in a row
Rabies

6 months of age: Heartworm preventative
(dosage and frequency to be administered
as per your veterinarian's instructions for your area)

1 year of age: Booster of Vanguard +5 (annual)
This vaccination may be different according to your area
