

Hydrostatic Testing

CalTex Energy Group is proud to introduce its hydrostatic testing and spec torquing services. Safety, Compliance, and Service are the backbones of CalTex Energy Group, LLC and our goal is to ensure that our customers are safe while staying compliant in all phases of their projects.

Features:

- ◇ 250 HP engine
- ◇ 20,000 PSI working pressure
- ◇ Ceramic plungers
- ◇ All certified hoses and parts
- ◇ Calibrate crystal digital gauge and chart recorders
- ◇ 10,000 PSI Torque Tool Package
- ◇ High Torque Wrenches and two powerpacks per unit (portable and on unit)
- ◇ Large, 200GPM water filter
- ◇ 225 gallon water tank
- ◇ Dual rupture disc assemblies prevent extreme over-pressurization
- ◇ Fully-guarded moving parts

Sample Applications:

- ◇ Pipeline construction and pipeline maintenance
- ◇ Drilling and Workover rig BOP torque and test
- ◇ Completions Christmas tree torque and test
- ◇ Refinery post unit maintenance (gas cylinders, boilers, evaporators, etc..)
- ◇ Wherever hydrostatic pressure and torquing is required
