

JOLLY PHONICS TEACHERS AND KIDS COURSE

"A journey of a thousand miles begins with a single step and your child's journey to becoming a proficient English speaker and reader begins with Phonics."

VISION

Jolly Phonics is a synthetic-phonics programme. It teaches the children, in a simple and multi-sensory way, how the English reading and writing system works. That is to say, it teaches children to use the basic alphabetic code to work out unknown words before expecting them to read books for themselves or to write independently

MISSION

Phonic skills need to be developed in a vibrant, innovative and systematic approach so that irrespective of their ability or circumstance, they grab the opportunity to embrace, enjoy and understand the various components of spoken and written English

AIM

The programme aims to get children reading as quickly as possible by teaching them the most commonly occurring sounds in the English language. Children learn the 42 sounds through Jolly Phonics first so that they are already familiar with them by the time they begin reading.

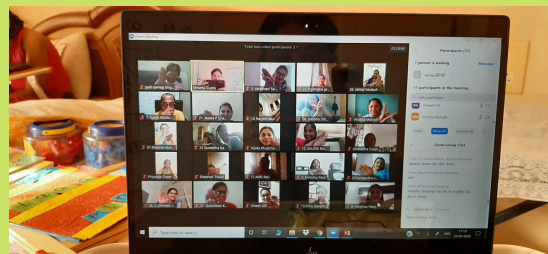

WHY JOLLY PHONICS

- Jolly Phonics teaches how to connect the sounds of spoken English with letters or groups of letters
- Students are introduced to new sounds and vocabulary through delightful Phonics Friends and mascots (inky mouse, Snake, Bee and phonics), practice activities, engaging sing-along songs, captivating stories, educational games ensure that child will enjoy actively participating in the reading process
- Jolly Phonics is a boon for visual and hearing impaired kids as it involves use of sounds and actions to learn read and write.

STRUGGLING KIDS

When the student deals with issues such as ADHD, visual processing, hearing problems, lack of motivation or self-esteem, these can have a negative impact on reading as well.

At twinkling Phonics Academy, we give full emphasis on dealing with them on a special note.

METHODOLOGY

- The Phonics curriculum by TWINKLING PHONICS ACADEMY focuses on decoding, encoding and reading comprehension strategies, using multisensory activities to present a systematic approach. Activities are specifically tailored to teach children and allow students to practice phonemic awareness, sound / symbol recognition, syllabification, word formation, sentence composition, story reading and kinesthetic / tactile memory to build a richer understanding of oral and written language.
- Each Level is taught a focused group of sounds until full confidence using the sounds both in their reading and writing is accomplished. The program's fiction and non-fiction reading books are all designed to support the sounds that the children are learning at that time.
