A LEGACY OF INNOVATION WHICH CONTINUES TODAY.

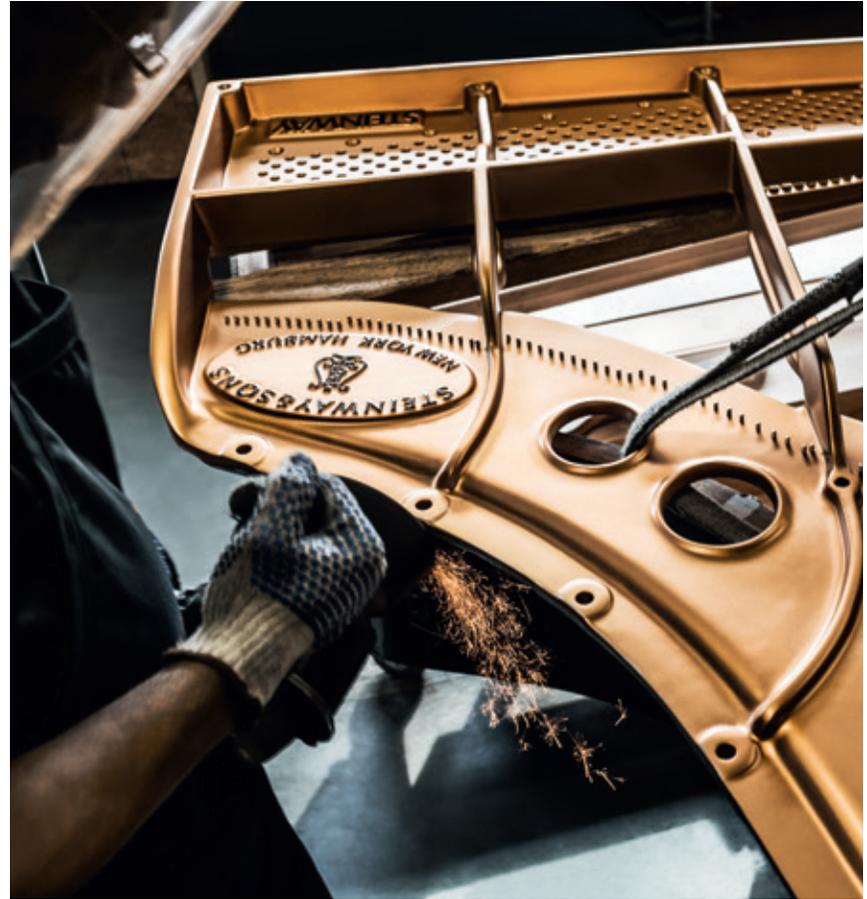

2 STEINWAY & SONS

Steinway & Sons was founded in New York City in 1853 by German immigrant Henry E. Steinway and his sons, who essentially laid the foundation for modern piano building. The first Steinway patent was granted in 1857, and since that time the company has been granted more than 135 additional patents, positioning the Steinway as the piano by which all others are judged. For more than 165 years, the company's innovative designs, attention to detail, and superior quality materials have established the Steinway piano as the world's finest.

TODAY'S STEINWAY:
THE BEST WE'VE
EVER BUILT.

Today's integration of old-world building methods with state-of-the-art technology and investments in new machinery and conditioning rooms have resulted in a Steinway with the widest range of tonal colors and the most responsive touch of any instrument we have ever built—by far. Over the past decade, we've added 12 patents to our portfolio. Our culture of continuous improvement has resulted in greater precision, uniformity of touch, and sound quality—ensuring that today's Steinway is the best Steinway yet.

SUPERIOR MATERIALS CREATE SUPERIOR SOUND.

THE RIM

The one-piece continuous bent rim is one of the most important technical innovations in piano building. It provides the foundation for the beauty, stability, and quality of each Steinway grand piano. The rim is comprised of up to 20 layers of hard rock maple—with both inner and outer rim being pressed together in a single operation. The unique one-piece continuous bent rim construction has been an integral part of every Steinway grand piano since it was developed and patented by Steinway & Sons in 1878. Within the last ten years, we have vastly improved our rim presses and the conditioning process of our hand-bent rims. Today's Steinway rim has the best design, shape, and strength—which allows our unique soundboard to vibrate more freely.

THE SOUNDBOARD

The soundboard lies at the heart of a Steinway, which is why great care is needed in its design and in the selection of the wood. Only superior Sitka spruce with a regular grain and minimum number of annual growth rings is acceptable. The Steinway Diaphragmatic Soundboard is based on an innovative patent to achieve optimum performance in dynamic range and maximum sustain. Under this patent, the soundboard is gradually tapered from the center to the edge, permitting freedom of movement and creating a sound of unparalleled richness, sonority, and sustain. Since 2008, we have implemented state-of-the-art machinery and conditioning rooms to better meet the specifications of our soundboard design.

THE BRIDGES AND PINBLOCK

The better the materials, the better the sound. Steinway & Sons constructs its soundboard bridges exclusively from vertically laminated hardwood with a horizontal grain, capped with solid maple. Each bridge is notched by hand for precise, individual string-bearing. This design ensures optimal sound transmission from the strings to the soundboard, resulting in a sustained, resonant tone. The Steinway Hexagrip Pinblock, based on an innovative patent, is engineered to enable pianos to hold their tuning longer and with incredible precision.

THE CAST-IRON PLATE

Up to 20 tons of string tension is being exerted within a piano at all times. It is the function of the cast-iron plate to accommodate this extraordinary force and provide strength and stability throughout the life of the piano. Steinway & Sons uses its own “bell-quality” casting to support this string tension and reduce vibration, which in turn enhances the sound. This component is so integral to the construction of a Steinway piano that Steinway & Sons owns and operates its own foundry, which produces cast-iron plates to its exacting specifications. Thanks to major investments in new machinery, our improved plates are one of the reasons why the pianos we build today sound and play better and last longer than the ones built only ten years ago.

A woman in a red dress is sitting on a black Steinway piano bench. She is looking up and to the right with her arms raised, as if in the middle of a performance or a dramatic gesture. The piano is a black grand piano with the Steinway & Sons logo and name visible on the side. The background is a warm, golden-brown wall with decorative elements. The floor is light-colored wood.

97% OF SOLO PIANISTS
CHOOSE STEINWAY.

STEINWAY SETS THE STAGE

CROWN JEWEL COLLECTION®

Each Steinway Crown Jewel is an original work of art. Crown Jewel pianos are encased in your choice of magnificent woods, prized for their exquisite color and grain, and gathered from around the world—from East Indian Rosewood to African Pommele. Steinway & Sons artisans meticulously match the grain from one end of the piano to the other—even across the beveled edge of the lid. Steinway & Sons is a benefactor to the Hardwood Forestry Fund, whose purpose is to promote hardwood timber growth, management, education, and environmentally sound uses of our forest resources, including the beautiful woods of our Crown Jewel Collection.

KEWAZINGA BUBINGA

LIMITED EDITIONS

Steinway & Sons has collaborated with some of the most notable artists and designers of our time to create a special series of pianos that reimagine what uncompromised expression looks like. Custom built at our Steinway New York and Hamburg factories, our Limited Edition collections combine classic Steinway craftsmanship with inspired and meaningful designs—making each Limited Edition Steinway both a majestic musical instrument and a completely unique work of art.

THE JOHN LENNON "IMAGINE" SERIES

INTRODUCING SPIRIO

THE GREATEST ARTISTS IN YOUR HOME

The Steinway Spirio is the first high resolution player piano worthy of the Steinway & Sons name. A masterpiece of precision engineering, technology, and artistry, Spirio provides an unrivaled musical experience.

With the touch of an iPad®, Spirio brings your Steinway to life. The soft trills, delicate pedaling, and thundering fortissimos that distinguish the world's finest artists are reproduced with unparalleled

accuracy on a Spirio. Thousands of performances from the world's greatest Steinway Artists invite you to enjoy life's greatest musical moments. The Spirio music library, with performances captured at the Steinway Studios, is regularly and automatically updated. The library features everything from Bach to Irving Berlin to Billy Joel, and delivers music to your living room that is indistinguishable from a live performance.

SPIRIO | *r*

Spirio | *r* is the world's finest high resolution player piano capable of live performance capture and playback. A revolutionary blend of artistry, craftsmanship, and technology, Spirio | *r* provides powerful new tools of expression and new ways to access, share and experience performance—enriching connection and intimacy.

Spirio | *r* stores and plays music and videos directly from the instrument, with immediate response and uninterrupted playback. Spirio | *r* captures the most nuanced musical passages, precisely reproducing the loudest, softest, and fastest notes.

OUR PIANOS

MODEL D CONCERT GRAND

The pinnacle of concert grands and the overwhelming choice of concert artists and institutions throughout the world. Also available as a Steinway Spirio | r.

LENGTH 8'11 ¾" (274 CM)
WIDTH 61 ¼" (156 CM)
WEIGHT 990 lbs (450 kg)

MODEL B CLASSIC GRAND

A piano designed for spacious homes, smaller recital halls, auditoriums, and broadcasting, recording, or professional studios. Also available as a Steinway Spirio or a Steinway Spirio | r.

LENGTH 6'10 1/2" (211 cm)
WIDTH 58" (148 cm)
WEIGHT 760 lbs (345 kg)

MODEL A SALON GRAND

Reintroduced in 2005 due to popular demand, this legendary piano was first designed by C. F. Theodore Steinway in 1878. It is known for delivering a grand sound in a medium-sized piano.

LENGTH 6'2" (188 cm)
WIDTH 57 ¾" (147 cm)
WEIGHT 695 lbs (315 kg)

MODEL O LIVING ROOM GRAND

The largest of the “small grands,” the Model O offers remarkable depth and resonance, yet requires less space than full-sized grands.

LENGTH 5'10 ¾" (180 cm)
WIDTH 57 ¾" (147 cm)
WEIGHT 616 lbs (280 kg)

MODEL M MEDIUM GRAND

A grand piano with full tone, yet small enough to fit in any home or apartment. Also available as a Steinway Spirio.

LENGTH 5'7" (170 cm)
WIDTH 57 ¾" (147 cm)
WEIGHT 606 lbs (275 kg)

MODEL S BABY GRAND

A small grand suitable for the home or apartment where space is at a premium.

LENGTH 5'1" (155 cm)
WIDTH 57 1/2" (146 cm)
WEIGHT 540 lbs (245 kg)

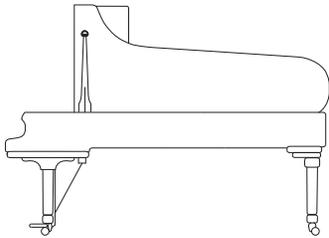

MODEL K PROFESSIONAL UPRIGHT

Steinway uprights are made in the same factory as our grands, using the same materials, techniques, conditioning processes and artisans. Introduced in 1903, this piano features a soundboard larger in area than many grand pianos for a larger and more resonant voice.

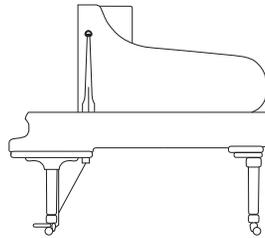

HEIGHT 52" (132 cm)
WIDTH 60 ¾" (154 cm)
DEPTH 26 ⅜" (67 cm)
WEIGHT 600 LBS (273 kg)

A photograph of a Steinway piano technician working on a grand piano in a workshop. The technician is seated at the piano, which is open, and is focused on the internal mechanism. The workshop is filled with various tools and piano parts, and large windows in the background provide natural light. The overall atmosphere is one of craftsmanship and precision.

CERTIFIED PRE-OWNED

Steinway & Sons has been making the world's finest pianos since 1853. The Steinway is still handcrafted to founder Henry E. Steinway's guiding principle: "Build the best piano possible....Make no compromise in quality."

CERTIFIED PRE-OWNED GUARANTEE

When considering a pre-owned Steinway, insist on the Steinway & Sons Certified Pre-Owned guarantee, a promise that Steinway & Sons stands behind the quality and integrity of your piano.

THE STEINWAY & SONS CERTIFIED PRE-OWNED PROGRAM PROVIDES:

- full three-year Steinway & Sons factory warranty.
- a comprehensive 74-point inspection by factory-trained Steinway technicians to verify authenticity, condition, and quality.
- confidence that a Certified Pre-Owned Steinway ensures an instrument of the highest quality backed by the original builders.

“I HAVE LONG ADMIRERD STEINWAY PIANOS FOR THEIR QUALITY OF TONE, CLARITY, PITCH CONSISTENCY, TOUCH RESPONSIVENESS, AND SUPERIOR CRAFTSMANSHIP.”
