

Safeguarding and Welfare Requirement: Health

6.5 Food and drink

Policy Statement

Our provision regards snack and meal times as an important part of our day. Eating represents a social time for children and adults and helps children to learn about healthy eating. We promote healthy eating using resources and materials from the Pre-school Learning Alliance. At snack and meal times, we aim to provide nutritious food which meets the children's individual dietary needs.

Procedures

We follow these procedures to promote healthy eating in our setting.

- Before a child starts to attend the setting, we ask their parents about their dietary needs and preferences, including any allergies. (See the Managing Children who are Sick, Infectious or with Allergies Policy.)
- We record information about each child's dietary needs in our Registration Forms and parents sign the form to signify that it is correct.
- We regularly consult with parents to ensure that our records of their children's dietary needs – including any allergies – are up-to-date. Parents sign the up-dated record to signify that it is correct.
- We display current information about individual children's dietary needs so that all staff and volunteers are fully informed about them.
- We implement systems to ensure that children receive only food and drink that is consistent with their dietary needs and preferences, as well as their parents' wishes.
- We plan menus in advance.
- We display the menus of snacks for parents to view.
- We provide nutritious and varied food for all snacks.
- We include a variety of foods from the four main food groups:
 - meat products;
 - dairy foods;
 - grains, cereals and starch vegetables; and
 - fruit and vegetables.
- We include foods from different cultural backgrounds, providing children with familiar foods and introducing them to new ones.
- We take care not to provide food containing nuts or nut products and are especially vigilant when we have a child who has a known allergy to nuts.
- Through discussion with parents and research reading by staff, we obtain information about the dietary rules of the religious groups to which children and their parents belong, and of vegetarians and vegans, as well as about food allergies. We take account of this information in the provision of food and drinks.
- We require staff to show sensitivity in providing for children's diets and allergies. Staff do not use a child's diet or allergy as a label for the child, or make a child feel singled out because of her/his diet or allergy.
- We organise meal and snack times so that they are social occasions in which children and staff participate.
- We use meal and snack times to help children to develop independence through making choices, serving food and drink and feeding themselves.
- We provide children with utensils that are appropriate for their ages and stages of development and that take account of the eating practices in their cultures.
- We have fresh drinking water constantly available for the children. We inform the children about how to obtain the water and that they can ask for water at any time during the day.
