VACCINATED PEOPLE are JUST
AS LIKELY TO SPREAD DELTA
Variant, Year-Long Study Finds - Lancet

“The only time children were hospitalized was when they showed severe symptoms and they dont get any treatment. Children that do not have systems dont need treatment.”

“Kids should not be vaccinated, it offers no benefit.”

“The Virus does not transmit asymptotomatically”

“Natural Immunity is Robust, complete and durable, and can not be approved upon with vaccination.”

“Of those who died, 65% were fully vaccinated.”

-Dr. Peter McCullough, Cardiologist, V.C of internal medicine Baylor.
