

FOR IMMEDIATE RELEASE

**Anime Village Announces the 1st of Four Genre
Inspired Characters and Manga Titles**

Carmel Indiana, February 4, 2022 – Anime Village, a social Metaverse company built for fans of Anime, Manga and gaming, is exciting to announce the upcoming release of its all-original Manga series, *Adamanto the Unbreakable*.

The first of four genre-inspired titles, which include *Action*, *Adventure*, *Supernatural* and *Slice of Life*, Adamanto will be featured in his own digital Manga title as well as NFTs, Anime Village's *My Anime App* and several other online destinations.

"We're building this company for several reasons, but the biggest is we're huge Anime and Manga fans ourselves," says Anime Village CEO and Founder, Gary Phillips.

"Realizing that there are no mixed reality social platforms or other online destinations that are tailor-made for this type of content, we wanted to create something for fans to really experience what they're passionate about, letting them customize it to their exact needs and wants."

Anime Village's plans include Metaverse and Web3 functionality, as well as the release of five innovative apps — the already mentioned selfie-taking *My Anime*, along with four others that will tie in social networking, live events and even one that's dedicated to self-publishing for aspiring creators.

“This is a dream come true for anyone who loves Anime, Manga and great storytelling,” says Anime Village Chief Lore Officer and Founder, Bryan Soroka. “These original characters and worlds...and merging social, gaming and augmented reality to let fans engage with them how, when and with who they want...it really is revolutionary.”

Adamanto is planned for release in Q2, 2022, with the following genres being launched throughout the remainder of the year. In the meantime, you can check out the teaser and reveal videos, along with other content on the company's [YouTube](#) channel.
