## Southwest Aerospace Technologies Completes its 16th Engine Project

### Key Highlights:

- Rolls-Royce BR710 Engine Maintenance
- Rolls-Royce BR710 Engine Removal and Installations
- S.W.A.T. Maintenance is growing
- Let S.W.A.T. support your Engine Needs

S.W.A.T. has just completed our 16th Rolls Royce BR710 engine project and is forecasted to complete a total of nine additional engine projects and engine changes by the end of March 2023.

S.W.A.T. began performing Rolls-Royce BR710 engine maintenance in early 2022 when we received our FAA Limited Rating Rolls-Royce BR700 engines. Since receipt of this rating, we have been performing BR710 removals and installations, and expect to complete a total of 19.

S.W.A.T. has assembled one of the best engine teams in the world and is proud to have met all our customer needs. We are currently performing engine maintenance and installations for OEMs, Operators and Engine leasing and sales companies.

### S.W.A.T. Events

- NBAA Maintenance Conference – Hartford, CT- May 2-4 (Attending)
- EBACE– Geneva, Switzerland - May 23-25 (Attending)
- NBAA Regional, White Plains, NY – June 14 (Attending)
- NBAA-BACE Las Vegas, NV - Oct. 17-19 (Exhibiting)

### S.W.A.T. Continues to Grow

S.W.A.T has added an additional 5,000 square feet of dedicated engine storage facility to its existing 13,000 square foot facilities. S.W.A.T. now has nearly 18,000 square feet of property to continue to expand its FAA, EASA, TCCA approved Repair Station and Parts Distribution.

S.W.A.T. continues to support the exciting new ICON A5. As one of ICON's approved service providers in Central Texas, S.W.A.T has performed maintenance on and Returned to Service a total of 15 aircraft to-date.
