

CRAFTSMAN COLLECTION

Direct Glazed vs Shaker

Craftsman (Direct Glazed)

Glass insert is directly glazed into frame, offering the homeowner a wider viewing area with an authentic look that will complement the contemporary, modern, craftsman and mid-century style homes. Direct Glazed doors have an ovolo edge design for enhanced performance, and features no screw holes, plugs or doorglass framing system.

- Glass insert is directly glazed into frame
- No screw holes, plugs or doorglass framing system
- Ovolo panel sticking

Craftsman (Shaker)

Glass insert utilizes a doorglass framing system. Capturing clean lines and a timeless look, the Craftsman framing system is designed with architectural style in mind. The broad flat-profile frame is designed to blend with the finishing details of the door and home; featuring a square edge doorglass frame profile. They are manufactured with high-performance resin, which requires less long-term maintenance, and are engineered for superior durability.
