

## ***Black Widow***

You crawled in from my back window  
and invaded my home  
Got comfort from my favorite pillow  
and stole my shadow

Now that you're stuck to my web  
You want to climb out of our bed

I must have forgotten to mention,  
That my true name is black widow

Perhaps for good luck,  
You should rub your best elbow

If you can safely cut yourself  
off the threads of my web

I'll spare you my poison
