

Pro - HAIR HANG IT UP PARTS LIST (PA)

The Hair Hang It Up is built to allow you to fully dismantle. Hair Hang It Up are shipped partially assembled. This part list is for assembling a partially assembled unit. For a parts list for a fully dismantled unit OR OTHER TIPS & VIDEOS VISIT Hairrichproject.com or social @hairrichproject

Designed by a traveling braider that needed a lightweight tool that could fit in carry on luggage. The unique design allows you to be efficient as a braider. It's also ergonomic and helps to ease the strain that braiding puts on your body. The "free hanging" design keeps the hair from overlapping which causes tangling and makes retrieving hair easier than the spool peg type stands. Say goodbye to hair all over the floor!

Hang hair to dry after washing. Make your own crochet braids, locs, twists by using the bars for pre looping.

"GOOD LUCK,
YOU GOT THIS!"

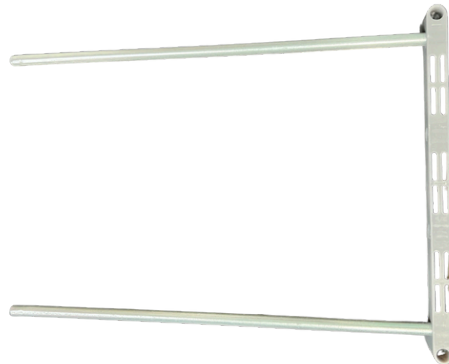

Part A - 1 qty

PART CONTAINS:

Pro - ASSEMBLY INSTRUCTIONS (PA)

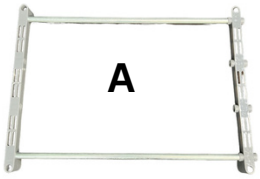

Your Hair Hang It Up arrives partially assembled. The Hair Hang It Up is built to allow you to fully dismantle. For assembly instructions for a unit that has been fully dismantled OR OTHER TIPS & INSTRUCTIONAL VIDEOS VISIT Hairrichproject.com or social @hairrichproject

When building your second and third tier of the Hair Hang It Up you will notice that you are repeating the steps used when building your first tier.

Push down on the plastic Connects using both hands. Make sure that they are firmly seated.

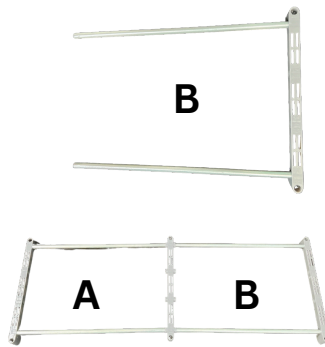

STEP 1

BUILD FIRST TIER

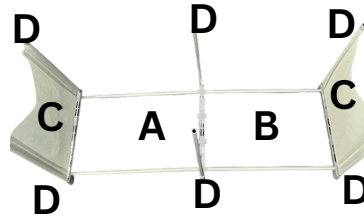

Place **PART A** on a flat surface. Make sure the feet at the bottom are touching the floor. (**Note:** The lines on the Connects should always face upwards).

STEP 2

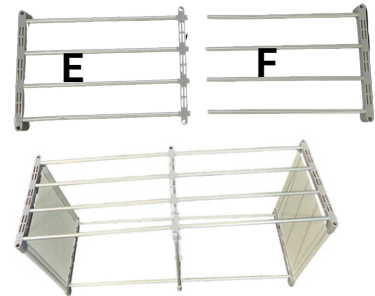

Insert the end of the 2 bars of **PART B** into the holes on side of **PART A**.

STEP 3

Insert **PART D** into each sleeve on **PART C**. Insert the exposed bar tips into the 2 holes on top of **PART A** end piece and **PART B** end piece. Place **PART D** into the holes on top of **PART A** middle piece.

STEP 4

Align the bars on **PART F** with the holes on **PART E**. Insert by pushing one bar in at a time. Place the holes on the bottom of the Connects on top of the bar tips. Insert one at a time. Push down on the Connects to seat them.

STEP 5

BUILD SECOND TIER

REPEAT STEP 3

STEP 6

REPEAT STEP 4

STEP 7

BUILD THIRD TIER
