

NOVACROWN

Going Where Crown Moulding Has Never Gone Before

Now There is an Alternative

...to expensive, hard-to-install mdf, wood or gypsum mouldings that is economical enough to apply throughout an entire development.

Constructed from a cellular styrene core permanently bonded to a drywall paper wrap, NovaCrown™ Mouldings are crisply-detailed, consistently profiled, fast and easy to install - and very inexpensive.

Feather-light NovaCrown™ mouldings are designed to be handled, cut and installed by one person. Nailing is not required so they are easily applied to any substrate, even directly to concrete walls - without the need to locate studs.

Features & Benefits

- Significantly faster and less expensive installation compared to other mouldings
- No fasteners, keeper nails, filling/sanding nail holes
- Attach simply with taping compound simultaneously with corner beading and taping
- Finishes up just like drywall
- Compresses slightly for a tight neat fit every time
- In a Retro/Renovation attach and seal with Alex Plus
- No cracking or warping
- Flame Spread Classification: 35. Smoke Developed Classification: 20
