

Ground Handlers interface

- 1- Keep airlines up to date on their diverting flights or other IRGOPS
- 2- Focus on passenger satisfaction rather than spending time researching and booking hotels and buses

Automatize the process

Create an IRGOPS event and let it:

- Alert staff, management, operations, hotels, buses, medical teams, etc.
- Assign a hotel room and a bus to each passenger
- Send vouchers to suppliers
- Keep track of passengers
- Keeps all stakeholders up to date

We Developped Something

**CREATIVE
TO HELP
YOU
FOCUS**

On passenger satisfaction
