Executive DBA

PROGRAM OVERVIEW

Designed for rising leaders and experienced executives, the EGS DBA program is an ideal fit for experienced leaders seeking to advance within an organization or transition into a consulting career or higher education. This DBA is designed to equip executives and senior managers with methods to address complex industry and organizational challenges. It aims to develop its students into experts who make significant contributions to both theory and practice in the field.

The Executive DBA program is primarily online with on-campus sessions one weekend per month. It will challenge you to take your thinking and performance to a new level. You will become a recognized expert and contributor to the most important business and societal challenges.

The goal of the Program is to prepare you to address real-world organizational issues and disruptive trends by developing applied executive-level research skills enabling you to solve complex organizational problems and create innovative business solutions.

With an applied dissertation, which can be leveraged to solve an existing organizational problem, this prestigious degree will distinguish you in your field by preparing you to implement research projects to impact organizational strategic decisions in an efficient and innovative manner.
