Supply Chain Management

**The Better Way To start
Your Business**

Line Management Solutions

Overview

students will understand business logistics from the perspective of the integrated supply chain process. Logistics refers to all activities that move product and information to and from members of a supply chain. The supply chain provides the framework for bringing products from businesses to suppliers to customers efficiently. The programme aims to train and develop future leaders and managers in the fast-growing Supply chain sector. A highly integrated programme where students will acquire knowledge and understanding of multiple facets of supply chain business including purchasing, materials management, supply-chain management, transportation, customs regulations, foreign exchange, international trade and information technology among various other aspects.
