

EVERYDAY CONTACTS

Wetting Technology

HydroPhil-CL wetting technology is a unique coating that covers the moisture repellent effects of silicone in silicone hydrogel lens resulting and increased wettability and preventing bare silicone from interacting with the eye and causing discomfort.

USAN	Pending
Base material	Silicone Hydrogel
Modality	Daily Wear
Wetting Technology	HydroPhil-CL
Device Classification	II
Light Transmittance	>95%
Water Content	60%
Refractive Index	1.39
Oxygen Transmissibility (Dk/t)	65
Diameter	14.2
Base Curve	8.6
Optical Design	Spherical

Disclaimer: EveryDay Contacts daily disposable lenses are not currently on the market and are pending completion of clinical trial and FDA approval. The information above is for informational purposes only.
