

## 2026 Debrief Report:

# Mink Card Program

Yayloop is an ecosystem that transitions society into a healthier dynamic framework reducing waste and enhancing its developmental processes. It is a dynamic institution that taps into a healthier sphere of human development enhancing both its historical dynamics and human life cycles putting it on a more progressive track and historical pattern.

## About

This is a debrief report from our prelaunch tour that provided real-time developments and a vision board through our media network ([www.dailyrun.tv](http://www.dailyrun.tv)) that reached a performance score of 97%. The prelaunch tour was also an unmarketed platform that was visited by many countries and governments through word of mouth.

We are also built with eternal life and launched under a 50-year window (first wave) with expansion already in place. Therefore, this debrief editions a complete roadmap to ensure the mink card program is built with great precision, and every edition will include a more progressive plan as we advance over the years enhancing our purpose.

Best Regards,

*Carlana Winehart*

Founder

## Inventor

I have travelled the planes of the human Earth both in its chemical spheres and plain reality learning your culture in search for greater understanding of its purpose and although, my presence remains challenged, we are not a replacement race, we are a modeled civilization for the human race.

## Monseir

I am also the first Monseir (“Ann Harbor”) of the genso religion which is a branch of Christianity that taps into a more improved system of thought lifting vast error from its historical track and unions. And although, we may never meet, you will forever remember my good deeds on mankind.

## Endorser

The mink card program is a social science segment transitioning the human race onto its proper developmental track lifting vast error from its historical foundation and unions and prepping the new human institution with a healthier framework commissioned under the astral government.

Our vision is to reshape the world  
through innovation and natural processes  
that enhances the life cycle.

- Ann Harbor

This document is to certify that *The Mink Card Program* shall be commissioned as a peace-time organization. The history of our human nations has shown signs of encaged cultures bonded by a false sense of identity and entrapped imagination looking at the human world through the lens of a restrictive world that shifts the perceptual realm into a state of unconsciousness. Thereby, the mink card program is an extension to human life.

**Therefore, the following biblical reference sets the tone for character and intent:**

We shall bestow upon the Earth good deeds and walk upon the planes restoring mankind. We shall remove conditions of war with peaceful unions. We shall give freedom but not to what has been formed into union to protect the corrupt ways of its kingdom and the fruits it provides. And those who have been chosen to walk the path of God shall bear a heart of compassion for those who come before them but not of fault that corrodes the nature and dampen the spirit.

## *Proclamation*

The unions that have been formed in history under its wrongful state shall hold no merit nor shall it be corroborated as a future endeavor when there is no foundation.

**Thereby,** these unions shall not proceed under a merit system nor grounds for peaceful undertakings but rather a segregation in union.

*And...*

The national emblem represents the freeing of modern slaves from forced labor. This period is known as the Golstone Era (2011-present). The five stars in the center represents the original capsule states of America which serves as an escape route from war and oppression.

The big star on the national emblem represents the first commissioned U.S. province. The two stars that are positioned on each side panel represents the first commissioned states under the astral government creating a separation of power.

## Overview

Yayloop is an ecosystem that transitions part of society into a healthier dynamic framework reducing waste and enhancing its developmental processes. It is a dynamic institution that taps into a healthier sphere of human development enhancing both its historical dynamics and human life cycles putting it on a more progressive track and historical pattern.

## Problem

Social science is an area of scientific study that relies heavily on trends and historical patterns derailing human progress that shifted the historical foundation onto a less progressive path that carried many institutional risks that continue to diminish the mental value of our human societies and its institutions with destructive patterns.

## Solution

Yayloop is a purported version of human culture and serves as a complementary feature to the natural stages of human development through its natural processes and the elimination of human waste while providing both an element of support and an historical track that enhances its growth processes and historical patterns.

## Objectives

Yayloop LLC is a parent organization and a social science segment anchored by brands to include housing, technology, banking, hospitality, and travel. It is also a service platform that starts up as an online community and social platform for e-commerce, advertising, specialty services, emergency aid, and virtual gaming. Its community serves as a one-stop resource hub to its members.

# EXECUTIVE SUMMARY

Yayloop LLC is a Delaware company headquartered in Charleston, South Carolina with field offices in twelve major cities. On Startup, we operate from a virtual office and casual work sites that are a part of our employee wellness program.

## Customer-Focused Groups

- The term resource refers to any company or organization that can provide a human necessity that meet eligibility requirements to advertise in our pallet search engine such as budget travel, food source, affordable housing, thrifty wear, and services that fall under healthy routine.
- A nomad is someone who lives from place to place with no fixed home and often driven by the need for a more dynamic life path that comes with greater freedom, gainful experience, and independence and often benefit from healthy routines and therapeutic activities.
- A utopian is a term that we use to refer to the love for travel that comes with many benefits to include greater access to experience, healthy isolation, and educational benefits, and the bridging of communication to create a more dynamic path for new and future travelers.
- A gogy is a term we use to refer to migrants which are someone who move from one territorial atmosphere (e.g. city, state, or region) to another in hopes of building a better quality of life. However, gogies are more resourceful and more prepared for migrant activities.

There is also a mental health spectrum scale that is used to determine eligibility that factors both age and social class setting the legal age at 18 years old and the mental capacity at a higher standard and equilibrium. Mental health spectrum evaluations were implemented to mold society into its proper developmental path with minimal error in its historical track. The mental health spectrum division is chaired by a shaimi which is a lead mental health spectrum evaluator with five or more years of experience in the mental health spectrum either by profession or vocational tasking. All mental health spectrum evaluations must complete a five-hour certification course each year and possess a Bachelor of Science degree and all training is carried out by the mental health division. There are also other requirements to include passing a background check, personal board interview (PBI), and meet all the requirements for a mink card membership.

**Our mission is to help people live better by changing how the world envisions the world around them.**

Yayloop is also a resource hub that specializes in economic developments. Its owner, Carlena Ann Winehart (born 1979) have over 20 years of experience in project management and research and development and also studied at the graduate level majoring in education management. Yayloop consisted of years of research to create a more defined path that identified as an historical endeavor and a human science shifting society into its proper developmental chamber.

Yayloop has a direct market and a bridged community that links into a central network that requires an annual membership to utilize and starts as an online community and expand into housing developments with RMA rentals, bramies, rooming houses, and private communities called favelas. We also in the retail market specializing in budget apparel, and specialized mobile services on our OSHA network which is an operating system and hosting accelerator.

Yayloop is also governed by a discretionary review board that replaces a typical board of directors with a more robust structure and security atmosphere. We also have an excise system which consist of a set of policies that set standards on human rights and judicial processes to ensure there are reasonable grounds for fairness and equitable protection.

We also have a volunteer component called NARC (acronym) where service members split time between actual flagship duty (occupation or vocational task) and service time (volunteer duty) that ranges from 25-55 hour each year while earning service benefits (e.g. per diem rates) rather than wages. NARC enlists up to 1.2 million service members with posts linked to our institutions and mink card program.

Yayloop operates in the United States in their capsule states (there are 12) that make up our city provinces and municipals and referral network. We also have a virtual customer client contact center with work from home support team where a one-time passcode is required to communicate with a support associate using proprietary video technology.

Yayloop is an amazing reinvention of human culture that fosters a healthier mental apparatus that also encompasses a more advance segment of therapy and social computing to lift vast error from the historical track so that treatment is universal and not solely based on power and status or where you stand socially with others. This is a guaranteed market that starts out redefining human culture.

# Social Classes

---

## For Minots

Minots is a social classification that best describe individuals that sit on a more progressive track

### Class 1

Class 1 is a light conservative group on a more progressive track where there is greater room for growth lifting traditional conservatism into a more dynamic sphere with a less restrictive mental environment and a more experimental path where progress is on a more dynamic trail. They extend their experience to a level of comfort that opens the mind to new experiences that still allow them to stay connected to their own culture and values.

### Class 2

Class 2 are polynomics which are persons that live by moral code and not so much by collective process This group we favor the most because they tend to operate in a higher moral capacity where reasoning and perception are at its best making the human mind more developmental and aware. This cultural segment builds their own identity to develop the mind outside of union and offer themselves more opportunities for growth.

### Class 3

Class 3 are practiced members of the genso religion which is a branch of Christianity that taps into an improved system of thought that regenerates the human mind. The genso religion originated in United States in the 21st century and became more of a scientific endeavor into human culture. The genso bible is called the kalaus which is a less institutionalized version of religion and a modern interpretation of Christianity that is not a complete diversion from traditional Christian values but rather a specialized segment of teachings and core beliefs that taps into a healthier sphere of human development with minimal error in its path. The tabanul is where practiced members of the genso religion go for religious services and fellowship and it sits in a central location (1 site location) in the Northern region of the United States. Monthly denominations range from \$6.33-\$8.33.

## Proletariats

Proletariat is a social classification that best describe individuals on a less progressive track.

### Class 1

Class 1 is a high conservative group that live by collective process and union. This group is favored less and require a PBI clearance because this mental class sits on a less progressive track that tampers with self-esteem and development making the human mind more susceptible to error.

For that reason, we do not integrate people with an intense element of belonging to their own race or culture that tampers with one's moral compass which serves as the main source to high abuse that requires more advanced computing of race and culture to identify integration problems especially when migrating people of poor mental condition.

These psychological ramifications are often seen when migrating homogenous cultures into more complex communities where you will notice an adoption style that often carries a disguised nature that appear developmental but lacks in substance.

### Class 2

Class 2 is a homogeneous group that are highly sensitive to differences and are often aural learners subject to more chronic state of processing and computing of information that tampers with one's sense of reality and relatability. This type of cultural mindset is favored less and require a PBI clearance because the mind is more prone to develop psychiatrically making them more sensitive to differences that leads to higher levels of abuse and risk taking ( e.g. criminal association) that stems from poor mental conditioning that is often developed in cultural units with existing mental disorders that often go undocumented transferring out reality to see quality in a more institutionalized reality where authority supersedes logic and reasoning and lies in a protective state and indemnity blanket that carries many institutional risks. The key issue is the inability to cross integrate homogeneous units effectively without developing psychological problems on identify and union. shifting the human world into a psychiatric hold.

# COUNTRY INDEX

The country index provides a more in-depth analysis of yayloop areas of operation and global reach.

Yayloop operates in 18 American states that make up our provinces, municipals, and referral network. Provinces are formative states where we concentrate resources. Municipals are relief cities where we concentrate transitional support. Our referral network is a migration service that provides a gateway into our institution and spans 51 American cities. We also operate in 18 foreign nations.

# Zoning

---

## For Provinces

### *Limited to 2 state provinces*

The following are zoning plans for US. provinces that are commissioned as formative states, bordered and require an entry visa

## Construction

1. *Judicial* – The judicial system consists of a central bureau or hub, holding stations (max 90 days ), brigs (max 1 year), retention homes (max 5 years), cross state transport, courts, safety patrol, and children services.
2. *Housing* – The housing system will be regulated by HARP and consists of shelters (to include nuclear survival stations, the ark and aurora), TAPP units, RMA rentals, and U.S. favelas (gated communities).
3. *Services*, – Our 24-hour service center consists of emergency calls, repair services, towing, locksmith services, sanitation, 911, and emergency response, and can be reached from free call boxes,
4. *Shopping* ) Brew Brothers Department stores and their Thrift shops (returned and open box items), and Qurato (Q'ro'o) wireless and swap shops. There are ordering stations for EPO deliveries.
5. *Food services* – Machoni meal stops, Machoni pizza. Machoni drop-in markets (prepackaged food, beverages, and bin items), and Palushi cocktail lounge (includes appetizers and finger foods).
6. *Transportation*- Amway bus lines and shuttle services (peak hours are free)), reliable car options (RELCO) for bus depot transport and pickup, electric buggies, and personal mopeds, and bicycles (no e-bikes).
7. *Hospitality* – Pavilion parks, yumi stations, doulleries, bramies, glamping sites, horticulture, golf courses, tennis courts, waterparks, Ann Harbor medical centers and patient travel, and Sams health club.

## For Municipals

### *Limited to 12 city municipals*

The following are zoning plans for municipals that are commissioned as relief cities:

## Food

The following are food services that are provided in relief cities that offer transitional support:

1. *Meal stops*- Machoni meal stops is a 24-hour food budget with specialty dishes and weekly and monthly cafetiere plans which also includes meal vouchers and grant programs for indigent travelers.
2. *Free shuttle*- Machoni meal stops operates a free shuttle from major destinations to meal stops from 7 am-7pm daily and also drop off points along the way for \$1.25 for adults and \$0.75 for children over 12 years.

## Shelter

The following are food services that are provided in relief cities for transitional support:

1. *Wellness centers* – Wellness centers is our mental health division featuring emergency beds, wellness programs (court mandated and walk ins), free psychological assessments, and a 24-hour duty staff.
2. *Emergency response* – Emergency response centers is shelter service with a 24-hour response team and pic up services, private family rooms (2-3 bedrooms) for families with children that require a crib or special needs, An ERC hub also has dormitories for single males and single females 18 and older,, and a service hub with a 24-hour help desk and free shuttle service between the hours of 7am -7pm. All occupants with income will be required to pay a monthly rent of 10% of their monthly gross include up to \$120. The ERC also provides free meals and an infirmary for checkups and emergency transport.

# MINK CARD

The Mink Card program is a social science segment and medical; study into integration segments and its institutional processes that form the basis for functional communities and support systems. The Mink Card is a membership program anchored by in-network services and it's our brands.

## Split Living Options

Split living is shared housing that provides greater protection to tenants and potential home buyers offering both a support system and an easy transition into housing.

- Stop and drops are rooming houses that offer all the essentials to feel at home while catering to a leaner market reserved for families and tourists and rented on a weekly or monthly basis at affordable rates with low service fees for long-term accommodations.
- RMA rentals is a homeowner program offering a more speedy process to purchase a home under an RMA contract with low monthly payments starting at \$323 with no credit checks and lending options based on the tenant's income and a financial health assessment.
- TAPP units are affordable apartments and renovated units that offer a faster reentry into housing. TAPP units offer 6-12-month leases and fully furnished units with a monthly rental cap of \$1,240 per month and an income-based subsidiary based on a monthly rental ratio.

## Health and Wellness

Split living is shared housing that provides greater protection to tenants and potential home buyers offering both a support system and quality housing on a healthier foundation. Yayloop has three housing segments with supportive foundation.

- Sams health club is a budget-friendly health club chain offering greater access and convenience with 24-hour locations, relaxation rooms, yoga stations, free chiropractic services, whirlpools, and a foot spa.
- The Machoni brand is a retail chain with drop-in markets, specialty pizza, and meal stops with a 24-hour food budget (and sitting lounge) that offers weekly and monthly cafeteria plans and a pay as you go service.
- Brew Brothers retail chain consists of department stores and thrift shops for returned and opened boxed items. It is a discount retail chain that also manufacture their own goods and also purchase at reduced prices.

## Hospitality Network

Mink hospitality segment offers a different take on hospitality lifting traditional elements and giving the consumer greater access with more choice options and more convenience while offering a more stable foundation.

- The Doullery (doe'la're) market are resting stations that are geared towards nomadic groups and extended travel providing bathroom and shower access, laundry facilities, food delivery services, self-served café, and sectionalized cabins for small groups and persons traveling alone.
- Bramies are budget rooms that Yayloop rents monthly at partner organizations and limited to a 30-day accommodation per site under a service contract that also offer reduce rates to club members. There is also an annual registration and service fee to access bramies.
- Yumi stations (uy'me) are travel stops offering greater accessibility and convenience to budget travelers. Each yumi station is equipped with vehicle ports (paid port), free parking, EV charging stations, emergency fuel, hygiene facilities, a food buffet, and an RV service center.

## Rideshare Program

The rideshare program offers low-cost travel and greater convenience to passengers travelling with Amway bus lines which is an express bus service under the Mink Card program.

- Amway will operate in 12 circulating route with 72 hour passes that guarantees at least 1 trip per pass. Passengers can also upgrade to a kayak for extra storage space, more sitting room, and a privacy curtain.
- Amway buses are also connected to a car service (RELCO) under the Mink Card program that is linked to Amway drop off points. RELCO car service can travel up to 35 miles from their pickup and drop off point.
- There will have 12 Amway bus depots equipped with restrooms and showers, charging stations, comfortable seating, free fountain drink (bring your own cup), kiosks to purchase Amway passes, and a 24-hour service desk.
- Amway fares will range from \$32-\$78 per trip and \$9 per child. on a rider's card. A rider's card is a reduced fare card for passengers travelling with up to 2 children or a disabled person. The annual riders' card is \$129.

# Plus Benefits

---

## For Individuals

**Limited to 43 million members**

Mink plus benefits is an incentive offered to club members with time in service.

### Tier 1

To qualify for tier 1 benefits, you must have been a mink club card holder for 18 consecutive months.

1. *Per diem* - The per diem rate is set at 25% of the market value for a living quarter and limited to 90 days in a full calendar year.
2. *Forbearance*- This benefit applies to all living quarters and includes an interest-free loan and 5 relief payments.
3. *Deferred Billing* - Defer bills for up to 30 days and incur 1.3% interest on the total amount owed and based on credit rating..

### Tier 2

To qualify for tier 2 benefits, you must have been a mink club card holder for 24 consecutive months.

1. *Holdings Account* - Deposit up to \$1,000 to your mink card and send money to friends and family in the mink card network.
2. *TAPP Allowance* - Apply for a TAPP allowance to cover outstanding bills. This is a relief fund subject to funding availability.

### Tier 3

To qualify for tier 3 benefits, you must have been a mink club card holder for 48 consecutive months with no more than three relief payments.

1. *Auto Loans* - Qualify for an auto loan up to \$15,000 with a 12.9% APR and rollover benefits that includes burial insurance.
2. *Credit Builder* - Build a credit profile with centuriat that aggregates credit history from internal sources and billing cycles.

## For Businesses

**Limited to 50,000 members**

Mink plus benefits is an incentive offered to club members with time in service.

### Tier 1

To qualify for tier 1 benefits, you must have been a mink club card holder for 18 consecutive months.

1. *Per diem* - The per diem rate is set at 25% of the market value for a living quarter and limited to 90 days in a full calendar year.
2. *Forbearance*- This benefit applies to all living quarters and includes an interest-free loan and 5 relief payments.
3. *Deferred Billing* - Defer bills for up to 30 days and incur 1.3% interest on the total amount owed and based on credit rating.

### Tier 2

1. *Holdings Account* - Deposit up to \$5,000 to your mink card and send money to friends and family in the mink card network.
2. *TAPP Allowance* - Apply for a TAPP allowance to cover outstanding bills. This is a relief fund subject to funding availability.

### Tier 3

To qualify for tier 3 benefits, you must have been a mink club card holder for 48 consecutive months with no more than three relief payments.

1. *Auto Loans* - Qualify for an auto loan up to \$25,000 with a 12.9% APR and rollover benefits that includes burial insurance.
2. *Credit Builder* - Build a credit profile with centuriat that aggregates credit history from internal sources and billing cycles.

# THE MATRIX

The matrix consists of behavioral tracks that examines lifestyle habits in relation to economic accessibility to make determinations into risk factors and support systems.

## Matrix 1

Poverty is an economic track that shifts society into a more dire state on security making the developmental track less progressive and more prone to error and institutional abuse. Therefore, this behavioral track is placed on a more progressive path with critical assessments into mental health.

Therefore, all persons living at the poverty level or who serves in these communities are required to register for wellness checks to ensure there is minimal error in their developmental track. We also require all persons marked by poverty, regardless of its advancement track, to adhere to a strict regimen that encompasses life skill building, financial health, and healthy social habits to align one's mental habits with its proper developmental track with minimal error in its path.

Under the poverty matrix, there are also excise laws that examines the psychological apparatus of the human mind and its internal processes putting it on a more progressive track with the following conditions and reporting procedures:

1. Create a self-care plan to enhance one's emotional, mental, and psychological wellbeing that transitions the mind onto its proper developmental track with a healthy sense of reality and institution that is less prone to compromise of institution and proper character.
2. Practice a minimalist lifestyle which may require a reduction in personal possessions and frugal living to live in a more balanced state and perceptual realm where mental health is the focus rather than material health that develops the mind psychiatrically on desire.
3. Must avoid high risk talking that leads to grave indiscretion or a faulty perceptual realm that disrupts the natural thinking order and the redemptive path putting these lifestyle branches on a less progressive track making the mind more prone to psychological disorder.
4. Must practice healthy social living that fosters a better sense of reality and social computing where the mind is less prone to disorientation with proper defense mechanisms which can include a short emotional release than retraction to allow the mind to restore and balance.

There were also psychological assessments conducted by our research panel in U.S. poverty and our findings disclosed different immersion' classes suggesting high immersion units were more prone to mental and emotional intrusion through heavy tamper of thought and perception. And their developmental track was more prone to insecurity creating a mental environment hinged on criminal abuse and predatory behavior. This type of mental state continues to derail progress in our human societies because of the historical track and advancement cycles that leaves the doors open to vast error and recycled patterns of abuse.

Therefore, it is imperative that poverty is divided based on mental class so that progress can take place at the level in which one is conditioned for. We also determined that too much advancement can disrupt one's developmental track creating a more psychiatrically induced identity and culturing making these units more prone to addictive behaviors and grouping. However, low immersion units did not carry these traits and were viewed as a benefit to society because the mental environment was more balanced lived under the right level of care. However, high immersion units required closer monitoring and/or comprehensive psychiatric care due to failed societal processes the created a pathway to impaired growth through heavy tamper of perception and union.

## Matrix 2

Wealth is an economic track that is defined by the richness of one's mind (i.e. balance and careful habits) and economic accessibility and not by the abundance of one's life. It is also an economic track that transitions onto a more delicate state on security and need making the developmental track less progressive and more prone to error and institutional abuse. Therefore, the wealth rack must not bear a harmful state of ownership that tampers with one's sense of reality . We also recommend that this track spend less to better acclimate oneself to a natural reality that enhances one's sense of mental wellbeing leading to a higher state of awareness and great balance and acuity in their perceptual realm and institution to avoid vast error in judgment that may lead to higher risk talking and a false processing environment,

# Equilibrium

---

## For Individuals

**Limited to 43 million members**

The equilibrium is a general mental health assessment that factors in health and financial acuity. A score of 37 and above is a qualifying candidate for a mink card membership.

## 23 Points

For better financial acuity, you must live a balanced life so that the mind is not burdened by excess or high maintenance or more prone to develop psychiatrically. There will be error in that path. However, you must be able to recondition the mind replacing bad financial habits with healthy habits so that the mind is more developmental and aware and do not bear an intense emotional attachment to financial attainment or the false processing of need. To free oneself of entrapment and temptation.

## 18 Points

For better social health, you must position the mind to escape unhealthy trends in culturing and social health that stems from poor conditioning.

You must also:

1. Be able to distinguish between a pseudo reality (impure) and a natural reality that creates a healthier mental environment.
2. Be able to unwind when there is vast error in judgment or collaboration that affects one's moral compass and growth cycle.
3. Create a self-care plan to enhance one's emotional, mental, and psychological health and lower the risk of mental illness.

## 23 Points

If you do not fit into the seismic graph, you can earn points by joining one of the following communities:

1. *Tabanul* – a religious space for the genso religion which is a branch of Christianity.
2. *Volunteer* – national reserves is a volunteer service linked to the mink card program.

## For Businesses

**Limited to 50,000 members**

The equilibrium for business membership is used to stabilize our business community with greater regulatory requirements and standards.

## Investor

To qualify for investment, you must be a first-time entrepreneur with a convenient shop that meet the following business health standards:

1. *Pricing* – All pricing must meet DRB standards and are subject to review on an at random to ensure fair pricing.
2. *Quality* – All products and services must meet regulatory and safety standards and have the required licensing.
3. *Service* – All companies must have a customer contact line with a live person and a business email for support.

## Franchise

To qualify for a doullery (doe'la're) license in our franchise network, you must have been a mink club card holder for 18 consecutive months.

1. *Stopovers* – Smaller establishments offer a place to shower, eat in (delivery ports), do laundry, ,powernap (cabins), use the restroom, and charge electronics.
2. *Hospitality* – Larger establishments offer a multitude of benefits under one roof: a health club, laundries, mail services, washrooms and showers, and lodging

## Certified

To become a baus certified company, you must be a small retain chain with no more than 5 employees and owe no more than \$75,000 in debt. All baus stores must offer courtesy credits up to \$35.

1. *Loss prevention \** – All baus certified stores are eligible for grants and loss prevention funds up to \$50,000 per year. The baus program is limited to 120 retail locations.

# TABANUL

The tabanul is religious space and a branch of Christianity that is opened to the public and serves a source of support.

The genso religion is a branch of Christianity that taps into an improved system of thought. It originated in United States in the 21st century and became more of a scientific endeavor into human culture Fellowship offers many avenues for growth and consists of stages of development/:

## Core Beliefs

The kalaus is the official bible for the genso religion and . it is a less institutionalized version of religion and a modern interpretation of Christianity that is not a complete diversion from traditional Christian values but rather a specialized segment of teachings and core beliefs that taps into a healthier sphere of human development. It is also defined as God's final order for mankind and an occupation with the greatest healing power and wisdom for mankind.

The genso religion is also a light conservative community that values the beliefs of other cultures but still how strict ideals on human development. A bagopa is a white outer garment and religious wear that can be worn with a neck wrap (tulic) and flat sandals. for special travel or ordered into practice when travelling to certain countries Taluto is their official language which is a more relaxed style of English that opens open the mind to a more advanced segment of social computing and relatability. Genso people are also polynomics which is a rare bloodline marked by great human quality and their wisdom serves as a viable source to human life. Genso is also a prescribed identity characterized by ascetic lifestyles, high morals, and futurism; and was engendered to humanize society through rational methods of change that worked in a way to improve the human condition and social processes.

Genso is also a biblical reference to an educational foundation that promotes good mental habits and operates on the premise that God is the ultimate creator of sin that humans are programmed into to test their life path and moral understanding of their human identity and God's purpose for mankind. Therefore, genso people look at religion as a higher travel into God's heaven and a redemptive path for mankind for better understanding of God's will for humanity so that his seekers can become more familiar with their travel and the many benefits that come from its teachings.

## Worship

The majah is a religious space inside the tabanul where genso people pray before the ulman (ulmon). The ulman is said to be the highest human who have ever lived on Earth after Jesus Christ. The candles represent light, the dim room represents darkness, and the majah represents a gateway to heaven. The habulah is a sacred mura with Jesus Christ removed from the Cross denoting the end of suffering for mankind. The Christian bible is a sacred element of the tabanul that is held in safekeeping, but it is never to be prayed over. . The holy bible is said to have its own mystical features that does not require man to tamper to prove his faith or grant blessings

## Graphing

Graphing is also used to assess the life path of genso men and genso women. And it is a general assessment into one's character, personality, and the ability to form healthy perceptions of one's own life conditions using the most basic form of logic so that there is minimal error in their life path and one's development can be self-directed rather than negatively influenced. This method of care ensures that the genso community is functioning at an optimal level.

Genso people also consult shaimies which are holistic doctors that assist genso people in developing a life path. Orbit is an experimental life path that offers a wide array of experience that comes with greater understanding of self and the world around you whereas unise is a less experimental life path driven by conventional practice that stabilizes one's experience. And Japla is a self-reflection guide and a remedial task that consists of a writing exercise called genes

Genes bring greater awareness and clarity to one's life path and it is also a writing exercise to help develop the mind making it more developmental and aware by offering a space to process and organize one's thoughts. When put into practice, it is said to prolong existence putting it on a higher trajectory. Most important, traditional therapy is not a method of care in genso culture due to its many risk factors associated with its foundation and security atmosphere.

# DIRECTORATE

The directorate is a judicial system that aids in the development of policy and social reforms.

## The Chambers

The chambers is a discretionary review board (DRB) that governs policy and consist of three divisions:

- Executive – The executive panel is comprised of a chief advisor, chancellor, and steward and enforce judicial bills.
- Judicial – The judicial branch is comprised of a legal counsel, treasurer, and foreman and propose judicial bills.
- Council – The council is comprised of a warden, ambassador, and duty staff and prepare adhoc reports.

## Electoral Process

The fletcher bill is a law enforcement ordinance that provides the following protections and freedoms:

- The first chamber is elected every 4 years through judicial proceedings, and all officers must be at least 43 years at the time of appointment and qualify for an S1 clearance.
- The first chamber is elected every 4 years through judicial proceedings, and all officers must be at least 43 years at the time of appointment and qualify for an S1 clearance.
- The first chamber is elected every 4 years through judicial proceedings, and all officers must be at least 43 years at the time of appointment and qualify for an S1 clearance.

## Interim Office

An interim office is a 2-year term that is assigned by magistrate when there a transitional period where judicial proceedings are underway for elections or a lack of moral competence that results in an involuntary exit from office. Imperial orders are exercised by a sitting president on the DRB panel or a U.S. magistrate (sitting judge) to ensure the astral government does not develop into a harmful institution.

To apply for interim office, a candidate must be over the age of 43 at the time of appointment and meet character and background requirements for an S1 clearance. All candidates will also be required to submit a 12-page dissertation on human psychology and anthropological practices and schedule a PBI which is a personal board interview to serve as a meeting ground and assessment channel.

## Civil Union Act

Civil union act is an exclusion clause that bans certain aspects of culture and its unions that falls under certain historical tracks and impaired states of growth due to cultural or environmental factors that derails civil affairs.

### General Clause

Thereby, we shall make determinations into whether a candidate can fill a high priority position that requires a more dynamic mental state to carry out tasks and communication cross culturally so that there is minimal tamper in the communication process and service. This exclusion clause also bars certain work activities in the national reserves and their subsidiaries that require working long hours or heavy computing that tend to derail mental health into a more challenged state resulting in processing error and poor defenses that triggers criminal activity and high emotional response. These individuals were identified as neurological entities that do not meet the qualifications for employment.

### Selective Clause

We also reference white culture in this context to refer to a historical foundation and cultural identification that lacks in scope and moral competence. Therefore, these generations do not meet the requirement for employability or integration. To duly note, white in this context is also in reference to a phrase called "the voluntary slave" of high rewards and poor action " that derailed human progress infusing the human societies with a false sense of human value hinged on a very faulty area of perception and union wrapped into a psychiatric blanket often seen as a security element while holding deep associative ties to union and security imposing on human progress to live under an institution that bears harmful elements often described as sensory processing disorders and high image distortion that shift society into a stale state of progression and unionization that hinders growth and development in our human nations.

As a result, we also banned certain educational segments barring most college education from the review process when there is faulty programming in a candidate that lives under an authoritative structure that is abusive and non-recoverable. This type of mental processing is often seen in individuals with high comparative natures, faulty parenting, and candidates that live under bigness and too much pride tampering with their sense of reality and culturing. Therefore, we shall order into review segregation policy when there is bast error in one's processing environment shifting the perceptual realm into a psychiatric hold on identity.

# CANBERRA

The Canberra are sanctions on panning activities that derails human progress disrupting its natural environment.

Panning activity is a chronic mental condition that stems from faulty thinking that lies under a false sense of idealism that dictates how reality is pursued. Panning is common in all cultures due to how society associate with privilege and status but yet holds a more dire state on mental health and development that requires proper intervention.

## Ordinance 1

In this ordinance, we reference white historical eras, and the psychological elements built into slavery generations and their unions that warrants greater oversight of the human race. White historical eras are periods of increased political tensions that stem from fear of changes to its political structure and unions that have kept the nations intact but yet dehumanized shifting the political arena into a dire state on security and union and criminal segregation where crime by association remained in an honorable state and protective blanket even when there was no valid entry that overrode racial ideology and unethical practice shifting society into a psychiatric hold on identity and union that captured a more realistic view of culture and mental health.

For that reason, the mink card program do not integrate herd cultures which are identified as segments of culture that bear an intense element of belonging to their own race or culture that tampers with one's moral compass because of how its bonding elements develops the mind psychiatrically on union which serves as the main source to emotional triggering and psychological grouping that requires more advanced computing of race and culture to identify integration problems especially when migrating people of poor condition. These psychological ramifications are often seen when migrating homogenous cultures into more complex communities where you will notice an adoption style that appear developmental but lacks in substance and development.

## Ordinance 2

Trolling is a process by which an individual or group target people of other ethnicities that do not fit into their ideals. Trolling is most common in historically driven cultures due to the historical fragment that creates a sensitized view of society and culture. The expeditions in American history continue to shape perception that lived under a protective institution altering reality brought on by historical ideals. Trolling offenses are grounds for immediate removal.

## Ordinance 3

Chiming is a common criminal act of providing false or misleading information with the intent to devalue or blemish the character of another person. Chiming is a psychological tactic often developed in people with grave discontent towards another race or cultural identity that disrupts the national thinking order shifting the mind into a psychiatric hold on emotions that tampers with judgment and transition the mind into a false state of processing and reality that can also carry an honorable state when there is an error in its judicial process that carries an element of moral consciousness that warrants a separation of ideals. Chiming should not be mistaken for a natural reality when there is no valid profile. For example, the profile of a criminal embodies a dangerous institutional reality and an that falls outside of moral consciousness and affects 94% of society even young children because of how the human psyche is conditioned to process risks. This dangerous psychological disposition is often developed in people with mental psychosis which is common in human societies but yet undiagnosed due to how human societies function in grave disorder factoring in risks and opportunities. that develops the mind psychiatrically. Therefore, chiming are grounds for immediate removal.

## Ordinance 4

Piracy is the act of using the original work of a pioneer and taking ownership as the pioneer of the original work that has become a trend in U.S. culture even masterminding its processes with organized crime groups. Therefore, all companies that did not meet eligibility into our pallet search engine, publication service, or business membership were considered piracy companies linked into broker scams and patent and trademark scandals. Some high-end dealers were Indian developer companies selling the ideas of black American innovators to foreign nations and data brokers and passing it on as a twist in business culture, racial ideology, that alleviated competition and perpetuated economic growth for these companies and networks.

# ARMISTICE

The armistice is a body of law governed by the astral government which is a human rights organization that serves as an intermediary during human crisis.

## Bilateral Union

The national reserves command (NARC) is a bilateral union and volunteer service that splits time between actual flagship duty (occupation or vocational task) and service time. Whether you join the national reserves to start a new life path or to start a new career, the national reserves offer a myriad of opportunities to hone in on new skills. During peacetime, the national reserves command (NARC) in a volunteer component with service time linked into the mink card program and during wartime the national reserves activates as the United States militia under commission.

## Core Values

1. In the national reserves... bravery is an element of honor that plays a major role in the life of a national reservist and its moral role as a public servant to ensure greater strength in union and public service.
2. In the national reserves... integrity embodies both honor and the path on which the national reservist is unionized creates a more dynamic view of human integrity and commitment to duty.
3. In the national reserves... growth is not a process by which you attain financially, but rather the stages of development that are placed into your life path so that growth can take place in a more dynamic sphere

There are three types of enlistments: (see below) and an occupational rating is based on skills or training regimen:

1. *Non-commissioned*– This service grade is an entry-level role with under 2 years of work-related experience or service members with a remedial status which include, but are not limited to, persons with disabilities, and special entry programs.
2. *Non-commissioned*– This service grade is an entry-level role with under 2 years of work-related experience or service members with a remedial status which include, but are not limited to, persons with disabilities, and special entry programs.
3. *Non-commissioned*– This service grade is an entry-level role with under 2 years of work-related experience or service members with a remedial status which include, but are not limited to, persons with disabilities, and special entry programs.

*All OCS ratings are on full volunteer shift with no pay and full-service benefits, and Fort Bennington is the national reserves campus which also include the first Ann Harbor Medical Center named after the founder of the mink card program.*

## Fletcher Bill

The fletcher bill is a law enforcement ordinance that provides the following protections and freedoms:

**.We cannot release information to law enforcement if:**

The criminal act falls under moral consciousness. Moral consciousness is a state of mind with a higher moral compacity that often carries greater institutional benefits when there is a psychological feature that warrants an act or a mitigation process to restore life. An example of an act of moral consciousness is stealing food from a grocery store because of hunger but morally conscious of quantity price, and behavior holding no threatening element or abuse. These types of crimes are almost always forgiven because of how the human mind is conditioned making it more responsive to survival often holding an honorable state that is viewed differently by the DRB as a state of moral consciousness. When it falls outside of abuse and a threatening element.

**.We cannot release information to law enforcement if:**

The crime falls under the following entitlement rule:

The entitlement rule provides some form of relief to victims of historical eras when there is vast error in judgment and collaboration that leads to crippling effects on the life of another human being. The entitlement rule carries an indemnity clause waiving certain criminal charges that fall under moral consciousness that provides some form of relief to victims of historical eras . We also pardoned all records of inquiry pertaining to criminal acts (except for sex crimes and aggravated murder) and mental health on war veterans of historical eras that led to the disabling of human life unless there is a preexisting character defect or a psychiatric condition that preexisted with a precise characterization that will reduce immunity to reclassification or remedial action. Our justification for victims of historical eras is the intense emotional response to high abuse and corraling that requires more advanced computing of criminal behavior to make determinations into the validity of a criminal profile or an isolated and rare behavioral condition that is retractable.

## What is a summary or civil arrest?

A summary is where we submit findings to a high court to override government policy when there is justification that warrants a change in policy or an exclusion clause when there is vast error in government discretion and its unions.

# THE SEQUESTER

The sequester is a body of law that factors in resource and economic disparities while promoting better health and system structure with greater accessibility and fairness in practice.

## Clause I

The two-child policy was implemented to factor in resource accessibility and income capacity. Under the two-child policy we shall extend mink card memberships to individuals, business members, and families with no more than two children in the household. We shall also provide a TAPP allowance when available to low-income families without a sustainable resource that meets basic human needs.

The TAPP allowance shall include both a housing subsidiary and a cash subsidiary totaling \$3,582 for 212 households for 18 consecutive months with a 12-month stand-out period to reapply for a TAPP subsidiary. TAPP recipients shall also receive a 30% monthly cut on TAPP units. TAPP units are fully furnished units with a lease term of 6-12 months. TAPP stands for temporary assistance program for needy persons.

## Clause II

We shall offer bridge insurance which is a type of auto insurance policy that service vehicles that are financed through our financial institution (Centuriat). Bridge insurance was designed to offer a universal insurance product and an in-network resource that provided greater access.

### Types of coverage

Bridge insurance shall provide comprehensive auto insurance with low monthly premiums starting at \$119. After the policy has ended, policy holders will be referred to other insurance providers for continued coverage. Bridge insurance is only available in capsule states (there are 7) and a valid driver's license from a capsule state is required. If an insurance provider cannot ensure a vehicle that has been insured with Centuriat because of driving history, Centuriat will continue to ensure the vehicle under a safe driving program (monthly fee) where we monitor driving history over a 12-month period. After the safety driving period, auto insurance will be discontinued or qualify for a mandate where we will continue coverage with a monthly recovery fee for high-risk drivers.

## Clause III

We shall order into review a homeless enhancement program (HEP) with a relief campus that is managed by the national reserves and affiliated agencies. HEP campus shall include dormitories with over 5,000 beds and sectionalized, Motor stations with free hookups, overnight centers with emergency beds, restrooms, showers and laundry service, transitional houses (private and shared), sectionalized dining area for singles and families), and a day center with services,

HEP shall operate a virtual call center with field offices where support staff work from home and in the field screening applicants using video technology. HEP field offices shall also provide emergency lodging (up to 72 hours), meal stipends (\$10-\$30), and basic needs vouchers. We shall also assess an annual resource fee of \$23 and offer per diem rates. HEP shall operate in all 50 U.S. states with transport services.

## Clause IV

We are an inclusive institution where diversity is a complementary feature of our community and not just a security attachment to the laws and the comfort they create. This gives us the freedom to address issues and create better solutions. The main problem society continues to face with diversity is a lack of awareness that went into the advancement process that raised great concerns into mental health. Therefore, we shall conduct critical assessments into mental health with seismic graphing which is an area of psychology that factors in how one purports reality and determine the psychological exchange.

Seismic graphing also factors in how well an individual interacts with people of different cultural backgrounds that may require an open mind to gain access to new experiences that may come with low or high interests. The mink card program is a hybrid institution that lives in a more advanced stage of reality than what the human generations can identify due to an historical track that remains delapidated by its own faults in union and poor historical patterns.

# Habeas Corpus

---

## Introduction

Habeas corpus are set of excise policies that governs transverse law.

## Abstract

This type of transverse activity is associated with journeyed activity onto the Earth linked into spatial cycles and lots of error in the human sleep cycles that creates entry ways into Earth (worm holes) through stem access often referred to as the big bang theory (resetting Earth) but under a different conceptual state that led to heavy breaches into the Earth atmosphere in 2021 with low occurrences manifesting prior to year 2021 and a major shift in the dynamics of human life through heavy tamper of the human's mental health practice where these events feel under a psychiatric window defrauding humans through heavy tamper of human psychiatry and heavy splicing of the human anatomy which separates the human chemical state from its physical state and merging the physical state of the human with their species with the resultant of two active brains and the dissolution of human life leaving humans in an astral state (shadowed) stripping humans of gravity and visibility on Earth.

## Research

Transverse species resides in dimensional spaces associated with the human sleep cycles. Dimensional spheres have also been under investigation by high government. However, we bring you a broader scope of their presence on Earth that is highly blendable with human culture. The most active bloodline is identified as reptilian bloodlines which made up a vast part of our human generations and stem from heavy splicing of the human anatomy. And due to the chemical structure of Earth properties their survival was heavily reliant on heavy extractions (e.g. dermis layers and brain transplant) from the human anatomy. These human-like species are highly trained in, criminal organization along with a primitive form of mind warfare, so humans must take greater care in how they connect with information and not gravitate towards the intense element of belonging to labels that tampers with perception. Collapsing the human psyche is their ultimate goal as they have lived on Earth for centuries in small numbers until late 2021 working as experimental staff, mostly as transport workers (false policing) and psychiatrists.

## Ordinance

Arcadian is a space program that investigates spherical activity on Earth.

## Abstract

The gateway era was a quiet period in American history that stemmed from the mishandling of alien technology that was linked to exchange programs on Earth that tampered with human existence separating the chemical and physical state creating a splice in human anatomy that led to a gravitational pull (using solar energy) into their spatial dimension. These events led to a heist of Earth resources through a shift in Earth's chemical properties that affected human life. These species appear to have been a part of our human world but linked into the human dream state (sleep dimension) providing entryways into the Earth through chemical access points. These chemical access points appear to be linked to high stress and hormonal changes in the human anatomy.

## Research

Dimensional spheres are simply a duplication of Earth properties (imaged Earths with stem access) to include hard structures with slight variation such as an apartment building that is utilized in spheres through a splice in its structure reducing both the chemical and physical properties that can lead to a missing door in sphere and a misalignment if structures are moved back in place causing emergency reduction such as reduced lighting. Therefore, if humans find themselves expose to the following spatial conditions, avoid overacting to where one;s thinking imposes on their safety:

1. Hearing mysterious voices (in the neurall hub) in 1-5 words in strained or clear English and often of a warring nature or disguised element.
2. Dark shadows in walls which is spherical activity on Earth linked to heavy hacking into the Earth in thermal mass (chemical layering).
3. Excessive deterioration of paint that is linked to heaving splicing of physical properties on Earth shifting Earth out of its axis to resource.
4. Humans may discover strange aerial objects in the star space following them and tapping into brain neurons causing grave annoyances.

# SEQIO LAW

Seqio (say-qwe-o) law is a security advisory to assist nations in developing policy for UAP programs and reconnaissance missions.

## Threat Level I

Transverse nations are journeyed planets that exists in spheres on Earth and associated with the human sleep cycles and chemical access points associated with stress induction and stem access. These are anatomically advanced species that require heavy infusion from the human anatomy to include brain and skin transplants, communication nodes (linked to human vocal cords) to simulate human sound (with slight variation) and imaging (chemical layering of the air) technology that removes certain elements of their anatomy from view such as tails and enlarged body parts that falls into a translucent state through heavy chemical induction of Earth air properties that also reduces human visibility allowing transverse nations to function in chemical spheres on Earth often seen through the naked eye of children often describing the appearance of monsters which should not fall under a psychiatric window linked into the child's imagination at all times due to how the human Earth functions in spatial cycles.

## Threat Level II

Transverse nations were classified as high criminal organizations and psychiatric communities that did not have any real connection to human life but rather live under a false institution impersonating human identity and its ideals to gain access to its comfort and privileges. These species were also reported to high government. However, UAP authorities continue to cast off UAP activity as normal sightings which questions government discretion and the inability to foster a healthier institutional reality where psychiatry is utilized in its most ethical form rather than to mask government interests. To assist nations, we recommend the invention of electro paint (and special coatings) to prevent heavy splicing of psychical properties on Earth along with the wearing of special helmets to prevent neural connectivity and heavy intrusion. We also recommend special detoxification to prevent false reproduction outside of the human uterus that develops into parasitic fecal matter with identifiable structures of legs, lips, and eyes that hold no real physical properties on Earth but rather a chemical state flushed into the human feces or spheres on Earth.

## Threat Level III

Transverse nations do not serve any value to our human nation when there is vast error in judgment that shifts reality into a very troubling area of perception and security of their own. Therefore, we recommend a comprehensive review of the human cultures to detect error in union because of how transverse nations impose on the human existence living in the human world as a replacement race of grave psychiatric condition that require more advance computing of their technology to overthrow these nations. However, when there is a lack of human manpower for occupational tasking, we shall order into review a noble class to ensure there is an element of security that resemble that of human life. We also recommend developing night liners for UAP programs which are reconnaissance crafts that consist of high kinetic transmissions as we noticed during an encounter how sensitive they were to kinetic energy pushing them back into the starspace, but they were still able to transmit sound and high radial activity shifting human anatomy into spheres.

## Threat level IV

The heavy breaches into the Earth atmosphere led to high delusion of human reality and their own existence that took the form of a natural reality causing grave discomfort upon our human race through ruthless systemization. We also have communication bans where all communication devices must be stowed away at some establishments because of how some of their technology is utilized on Earth and embedded in cellphones and tablets where it may look as if they are using a cellphone or tablet, but they are really accessing their technology in spheres with grave intent that tampers with the human heart rate, genitals, and bowels, and have the ability to splice objects on Earth allowing them to mark them in stores and pull the actual objects through stems on Earth leaving the store with a degraded version such as a spliced shirt that tears easily, or spliced food items with high toxins causing digestive problems. However, when there is a collapse in our human unions that serves as a foundation for uncontrollable abuse the Earth shall be reset.

# FAIR GAME ACT

The fair game act (FAGA) is a body of law that examines the historical landscape of nations to aid in the development of policy. FAGA was implemented to improve conditions in our human nation with more advanced social processes.

## Excise Policy

The excise maintains a separate penal code and rule of law that was implemented as a result of political aberration in the American nation during the periods of 2011-present exposing political ideologies that tampered with the historical track of our nations putting it on a more destructive cycle and historical pattern.

Therefore, all reported crimes are reclassified under excise law, and we do not accept the terms misdemeanor or felony, and certain crimes are reclassified as infractions when it falls under moral consciousness or grand corruption.

1. Class A – Class A offenses pertain to immoral actions that are non-repeatable or do not appear in frequent cycles where it falls out of moral consciousness and into abuse. Infractions can include petty theft linked to basic human needs and even simple battery.
2. Class B – Class B offenses pertain to warrants that are issued by a court judge authorizing law enforcement to perform an arrest. Warrants that do not qualify for entry or internal review are low criminal ratings such as criminal acts of moral consciousness.
3. Class C – Class C offenses pertain to exigent crimes that have resulted in a light sentence of one year or less. This classification is applied to crimes that fall under moral consciousness or under mental health diversion where rehabilitation is an option.
4. Class D– Class D offenses pertain to punitive crimes that have resulted in a sentence of more than one year. This classification is applied to crimes that fall under a lack of moral consciousness that require remedial intervention and service.

A criminal is defined as a someone who commits an unlawful act except when there are extenuating circumstances that leads to forgiveness of a crime such as crimes of moral consciousness that are often linked to high abuse and unionization in nations that disables human life and forces the victim into a more controlled state to seek relief. Therefore, clemency is awarded when there is a valid profile of a moral entity or when an arrest is associated with historical eras cycles and false policing (see Eureka Clause)

## Ordinance

Clymosis is a medical term used by our mental health division to identify patients with criminal psychosis which is a more troubling area of crime, image, and perception where a person develops an obsessive nature for crime (or crime through association) that is often removed from mental processing leaving the mind absent (mind play tactics) of a criminal identity because of how the human psyche functions denying all aspects of criminal identity through heavy tamper of thought and perception and sometimes union (indemnity blanket). We also factor in the criminality rate in human societies which was estimated a 98% with about 97% masked criminals. The masked criminal was considered more risk prone when there is no valid profile that can be assessed through background checks or a paper trail. Therefore, the unmask criminal is considered more assessable and are subject to behavioral screening. If there is a valid criminal profile, we shall proceed with a general character review to make determinations into whether or not the member shall remain on staffing duty or membership status.

The rule of law still applies when there is discretionary power that can prove that a crime truly existed that lacked in moral consciousness. And this discretionary power shall be supported by either a court judge or supporting role. The rule of law is exempt when the victim is a respondent of victimization of any circumstantial element (familial, institutional, or personal) that falls under psychiatric care where a psychological examination is ordered to evaluate the victim for a valid mental health diagnosis that is linked to events in his/her life and untreated and undiagnosed up until the court order to summon a psychological examination to determine a valid mental health diagnosis and/or treatment plan. If it is determined that a mental illness did exist at the time of a criminal act and the psychologist determine that a diversion would restore mental faculties and rehabilitate, diversion shall be considered if there are grounds for fairness.

A ground for fairness does not include aggravated assault of uncontrollable instinct or even murder but rather a controlled state of human discretion that still fall under criminal identification but holds a more stabled mental state where reasoning and perception may have been downgraded due to traumatic life events that triggered criminal instinct and even immature conduct where an adult lacks in its matured identity to be tried as an adult in the court of law when there is mental absentia where one's adulthood has been stunted due to one's own institutional upbringing or forced naturing that should hold precedence in court proceedings and factor into light sentencing or mental health diversion.

# Eureka Clause

---

## Clause I

The Eureka clause is a body of law that emphasizes the need for stricter laws on UAP activity factoring in government discretion and heavy tamper of the reality to maintain a sense of security for the human nation require a better of sense of culturing and ethical practice and culturing to prevent misappropriation of power into the human nation. Therefore, under this article of consent transverse nations shall not fall under human law when there is no is a mastery of its mental practice to alleviate vast error in union that have resulted in heavy breaches into the Earth Atmosphere and reconnaissance missions deploying helicopters in American cities releasing chemical agents into the airspace to keep these species out of Earth spheres resourcing the planet and disabling human life..

## Clause II

This clause bans false policing which is criminal act disguised as legal practice that falls under a psychiatric window and high impersonation of public duty while discounting the immoral actions of these entities soliciting the promotion of law under false identity and historical eras that were linked tin white supremacy eras where fear of its political structure or union were under a high threat which often led to disguised government activity false employment, and unions to maintain its cultural restraints on the colored generations that fell under vulnerability and corroborated efforts to fuel their own communities and nations.

Therefore, we flagged certain eras in American history that exposed high transverse activity in our human nations that was classified as security operations in white nations tapping into historical secrets that was linked into planetary segments controlling the Earth atmosphere through spatial cycles and gravitational pulls which led to the mishandling of alien technology on Earth and heavy intrusion into Earth atmosphere in year 2021 to present by transverse nations exposing an ingenious regeneration process of the human anatomy through a splice in its properties and dimensional spaces transferring out the human race through sleep dimensions replacing the human race through a splice in its anatomy that led to high breaches into the Earth and security operations to coverup their presence and unionization processes.

## Clause III

Under the eureka clause, all human births that occurred after year 2015 shall be subject to genetic screening, special vaccinations, and/or quarantine. Spatial bloodlines have been prominent in our human race for centuries and resulted in a major shift in human DNA. However, there continue to be a breach in ethics and its community building environment where humans continue to fall under genetic research to include a heavy splice in our human anatomy that is linked to stem access into Earth and its chemical properties where most human births are transferred out through the fetal stage or after birth where most human births are transferred to incubation chambers and used as energy source fueling light into their planet through a splice in human anatomy and a shift it Earth's solar energy. These species are known by high government agencies, but these inquires will continue to fall under psychiatric window until human perception is shifted. Therefore, we will continue to be classified as a paranormal organization to shield vast error in government discretion and research and developments.

## Clause IV

Under the eureka clause, all persons with a history of drug or alcohol addiction shall be subject to welfare checks and/or remedial treatment. During these historical eras and spatial cycles, transverse species were often captured by high government, and most were disabled with drug intoxication leaving them chronically homelessness and addled contributing to major spatial and society problems to include heavy porting activity into our human nations to find a relief channel. Most of these species were able to keep their mobility devices that assist with vision and translation in the human world and some functions were disabled such as splicing of resources that left the Earth with degraded material and products.

In general, the addiction community also went under psychiatric review and monitoring because of how the addictive mind tampers with the growth processes shifting it into a more delicate state on security even when there is security element that improves the quality of life and one's image extracting the addiction label and image promoting an identity crisis with functional addicdioand hidden culture contributing to major society problems.

# THE ANNEX

The annex are articles of consent and social reforms that stem from Golstone era (2011-2026) events that shifted the U.S. nation into a more debilitated state on race and culture.

## Article I

This section examines the psychological landscape of gender disparities and its historical underpinnings to create a more balanced institution that fosters a healthy mental environment. To duly note, the Golstone Era (2011- present) was a quiet period in American history that shifted the political arena into a psychiatric hold on women culture favoring the status quo and the rewards that came with deep associative ties and their unions that provided some form of progress for women through heavy tamper of perception and idealism that fueled the criminal networks keeping affairs intact and rhetorically bottled.

Therefore, these institutional affairs questions the psychological health of women culture that continues to fall under psychiatric review due to how women identity is applied in society as a moving vehicle in criminal networks that stems from a more vulnerable mental state that tampers with decision making and moral compass, This gender group is also considered a more distinct area of scrutiny that raised great concerns into mental health, pairing challenges, and the inability to refocus and transition onto a more progressive track where mental health is the focus.

Therefore. we decided to look more deeply into the institutional elements built into women culture to shift our historical foundation onto a more progressive track where women identity comes with a slight variation in ranking and selection to create a healthier and more uniform mental institution. Therefore, the mink card program is open to women of black African ancestral origin that fall into 1 of 3 distinct life paths (1) low maintenance where the mind is more developmental and aware (2) low social existence that comes with greater independence and healthy isolation, and (3) less male induced where the mind is less fantasy driven. In hindsight, we intended to do a total recall of the female gender to escape a very harsh reality that exist within their prime institution that continues to ring back vast error in union that requires too much oversight and intervention. Therefore, we could only risk isolating one cultural identity which can encompass other racial groups that fall into its ethnic traits or light conservative element.

## Article II

This section emphasizes the need for stricter laws on immigration processes and stagnant poverty to lift vast error from our institution and historical track. Therefore, to assist in reaching this goal, we factor in the institutional elements built into history and heritage that sits on a very delicate foundation. To resolve matters of concern, we summon critical assessments into mental health with psychological assessments and a clearance review board on historical classifications listed below to determine eligibility into the mink card program: (1) a psychological assessment shall be ordered into review on all persons that belong to a white national group or institution that promotes racial violence (2) a psychological assessment shall be ordered into review on all persons who fit into the definition of the criminal institution where crime is a careered path often denounced from the mental processing environment to benefit from its institution (3) a psychological assessment ) shall be ordered into review for all U.S. immigrants to include citizenship conversions and links to foreign parentage due to the institutional elements built in language and union that shifts the psychological realm into a more dire state on union.

## Article III

The national origin Index is a census with precise identifiers that are used to identify cultural segments that are used in the national origin index. Therefore, all applications rendered under the mink card program are required to collect a national origin classification. The three classifications include Aboriginal, Anglo, and Pro'se. An aboriginal is a Native American designation that refers to indigenous cultures and migrant communities into the Americas. Aboriginal shared a deep value for community and culture and contributed to the evolutions of the human histories. Anglo refers to an artisan culture that were mostly identified as a close-knit community that migrated for a more expansive life that afforded them greater advancement opportunities through migration plans. Pro'se is an exempt status that refers to a person detached from a cultural identity and racial class.

# PRICING MODEL

All pricing is set by the DRB and reviewed annually while focusing on keeping costs low and services accessible.

## Schedule A

The following annualized fees apply to membership levels:

Please note that relief payments are based on payment history and income and may require a financial health assessment that factors in circumstances and special needs to determine eligibility. This schedule is also a living document that is subject to changes and DRB approval.

# Mergers

---

## Merger 1

Neiman college is a research university that confers capstone degrees online in field investigations, journalism, clerical administration, marketing, public administration, bookkeeping, adjunct services, human resource management, sanitation and maintenance, ASMR (massage therapy), horticulture, addiction counseling, ADL therapy (self-care tasking), and cybersecurity while also offering scholarship programs.

1. Capstone degrees- This is an 18-month program with a 12-month internship that offers a less institutionalized college experience that allows the student to reach a healthy stage of growth.
2. Low tuition costs- A capstone degree program is just \$3,200 with a \$23 registration fee per course. We also offer payment plans with low interest with payments starting at just \$15 per month.
3. Semester hours – A capstone degree is equivalent to a bachelor's degree with experiential credit that offers a practical education environment with hand-on experience and instruction.
4. Book vouchers – All Neiman students will receive a \$250 book stipend to assist with the costs of textbooks. We also receive grants to cover the full costs of books for low-income students and households.
5. College Scholarships -This is a sponsorship program selected through dissertation review and background clearance to work under contract in our adjunct service, behavioral health, and general medicine.
6. Satellite Schools – Berlusconi Academy is a home schooling program for grades K-12. with supervised care to enable learning and proper development. We also provide scholarships and reduce tuition costs.
7. Alumni Benefits- Upon graduation, all Neiman graduates will receive hiring preference at partner companies, academic references, SLA benefits (split living allowances) and alumni discounts.

## Merger 2

Convenient shops are funded through private investment and serve as a valuable source to our resource hub providing both greater convenience and accessibility along with affordability.

**We invest in the following convenient shops:**

1. Canteens – Canteens are like convenient stores but with less production that serves as an emergency resource such as snacks and an assortment of beverages.
2. Swap shops – This is where you can swap clothes that you trade in clothes for new attire on voucher (free) or at a reduced price per item that range from \$1-\$5..

In short, we are investors of the future that do things differently. For example, the type of businesses we consider for investment into the mink card program are convenient shops that do not require a business plan with financial projections but rather a revenue model and an institutional structure with an inventive element.

Most important, the reason why we do not accept financial projection data (e.g. and profit and loss) in business plans is because of the criminal element built into financial uncertainty that tampers with discretion and ultimately has proven to develop companies awkwardly with a more developed state of criminal computing and abuse. Therefore, we focus on improving the psychological health of each business owner with proper training and a more solid foundation with a n honest exchange.

We also invest in first time entrepreneurs with just a few personal possessions and a less sentimental element because of how human societies have developed into status ranking where the mind has become too big and accessible making advancement even more problematic to sustain that comfort level often with a more intense security mindset and breach of ethics. .

To become a baus certified company, you must be a small retain chain with no more than 5 employees and owe no more than \$75,000 in debt. All baus stores must offer courtesy credits up to \$35. All baus certified stores are eligible for grants and loss prevention funds up to \$50,000 per year. The baus program is limited to 120 retail locations.

# TECHNOLOGY

## Qurato Wireless

Quratowireless.com /Q'ro'o) is a telecommunication company and mobile service provider on the OSHA network which is a proprietary operating system and host accelerator that comes with the following in-network services and resources:

1. Email - All mink card users and family can create a free email account using the yayloop.com extension linked to the mink card program. The first year is free and thereafter just \$9.99 per year.
2. EPO mailbox - An EPO mailbox is linked to EPO service centers for tracked mail through UPS and FEDEX. This is a special courier service for travelling members to a capsule state. The first year is free.
3. Directory - The OSHA directory provides instant access to our baus registry (store credit vouchers), bramies, emergency services, meal stops, yumi stations, clothing banks, and centuriat locations.
4. Ping network - A ping is a small advertisement and special requests that are published weekly inside Berlusconi magazine and searchable on OSHA providing instance responses and aid.
5. Cellphones - Qurato wireless manufactures 7-inch flip phones in 3 distinct colors British Blue, Cognac, and Sand. The monthly service is just \$14 for unlimited talk and text and hotspot data.
6. Tablets - OSHA tablets come with built in software apps to include biometric software for fingerprinting, facial imaging, and voice recognition, A qurato tablet is just \$249 with free repair services.
7. Surveillance - Qurato wireless also make surveillance technology with 24-hour monitoring and alerts with an optional monthly service for call boxes linked to our field hubs with 24-hour field support.

## Purchasing Options

Qurato phones are sold online only through the quratowireless.com website and mailed direct from our warehouse. A purchasing PIN and credit/debit card is also required to activate your qurato phone. However, qurato wireless do not maintain online records of account information or provide online payment options.. To make a payment, or access account information, you must schedule a VMAT which is virtual maintenance accessibility ticket and video session with a support associate.

## Monticello Rentals

We decided to add an automobile industry where we work with existing manufacturers to brand vehicles with hybrid technology installed in our car rentals at our bus depots.

### Our Technology

Our hybrid technology is installed in vehicles during manufacturing and sold in lots to our rental dealers. Our hybrid technology was designed to measure risks during travel with special tracking technology while serving as an alternative to car buying making it both affordable and convenient through special pricing and incentives.

Our hybrid technology is called Monticello which is labeled as a sub series for certain car brands that endorses our technology.. Monticello tracking technology is a software application with periodic updates and 3D dimensional ranking to detect spherical activity on Earth to ensure customers are travelling in its direct sphere on Earth rather than inside a loop in a chemical sphere resulting in a shift in air composition that contributes to heavy splicing of Earth properties that creates entry ways on Earth through stem access.

Stem access into the Earth is a scientific phenomenal that continue to bypass laws and acceptance into science and breaches in its ethical processes leaving the human world with little knowledge of its existence and detrimental elements that contribute to weather conditions and even illness because of the chemical components that affects neurotransmitters making humans more predispose to mental illness (e.g. delusional state) and chemical imbalance..

### Additional Perks..

Pricing Schedule - Monticello rentals are set to be rented at a low price of just \$12 per day with an annual membership starting at \$129 per year. With a rider's credit that waives monthly insurance fees for good drivers conduct.

Emergency callbox - All rentals are equipped with emergency call boxes linked to our call center, meal stops for vouchered meals, emergency phone line with up to five emergency contacts and locked in numbers, and emergency fuel.

Meal allowance - All customers are eligible for a \$55 meal allowance each year to serve as an emergency resource in the event a rental customer does not have enough money to cover food expense or need a helping hand.

Annual Auctions - When a Monticello rental reaches 57,000 miles on the odometer, the vehicle is auctioned with a starting bid of \$3,000 and the highest bidder will receive an annual membership to continue the hybrid service on membership.

# THE MEDIA

The daily run is a partner service for the mink card program providing a channel for content creators and emergency aid while serving as a prelaunch platform for some mink card services.

The daily run is an online publication and syndication network (and a public service) featuring field stories, documentaries, product reviews, brand promotions, and an exploratory platform to expand your existing network. The service platform operates statewide in the 7 U.S. states and in 51 referral cities that spans 11 U.S. States

## Marketplace

The daily run's marketplace is an online platform with a clip n go market, circulation listings, pallet searches, brand promotions, and a comfort service network. The daily run also has a digital magazine called Berlusconi where publishers can promote small ads called pings and magazine spreads. Berlusconi also endorses the Hollywood grand summit which is an annual fashion gala featuring Nordics and sumies.

## Commission

News runners cover field stories in 18 U.S. states and provide emergency relief services worldwide. News runners work from home and in the field on commission. Runners earn \$45 per story (plus a monthly travel allowance) that receive a contingency review score of 12 or higher and a \$25 commission for a TSI filing. Contingency review scores are issued by a third-party review board and based on the quality of one's story, supporting details, and classification (i.e. disclosure or non-disclosure). A non-disclosure classification is a TSI filing that goes into our HARP database. HARP is a record portal that serves as a primary record management system for the mink card program and all its subsidiaries and plugins.

News runners are also subject to a criminal background check and must have no open arrests and be of a sound moral character both in judgment and fairness and must not be required to registered as a sex offender. Runners are also required to chase stories outside of their domicile and/or city location to lift safety concerns that may be linked to local monitoring or controversial stories that fall under non-disclosure. There will be 390 news runners on cycle every 18 months providing a security blanket to news runners with a rotational cycle that provides the utmost protection.

## Membership

Sumies (su'me) are comfort service workers that specialize in conversational specialty providing both an outlet to explore and expand one's social circle. The sumi (su'me) industry is a public service available to women 32 and older and male clients 32 and older. The role of a sumi is not to serve as a companion but rather a resource that can be tapped into. Sumies are also booked online through the daily run media site and must obtain a work card on a quarterly basis to ensure that meet legal and mental health standards.

Sumi profiles are advertised in the pallet search engine and there is also a category for the sumi market under "personals." Sumies can be hired for conservational specialty to explore and expand one's social circle. Sumies can also be sought after for massage sessions (ASMR only) and for marriage if there is healthy union that leads to high likability or romance. However, sumies are prohibited from certain paid activities that include sexual intercourse, and indiscretion in business practice that leads to inappropriate deals or interactions.

Autonomous sensor meridian response (ASMR) is a massage technique that doesn't require licensure but rather a careful eye to ensure clients are not injured due to poor techniques that can lead to the spread of disease, or irritability. The ASMR technique that is used by sumies is called basal where they start massaging the head in an upward and downward motion while whispering soft notes to relax the mind.

The next basal technique is a soft rub of the earlobe while whispering soft tones to create a soothing effect. If the client, request the high stimulant package, it will include the shaving of genital hair and a light massage of the surface and not the genitals. All shaving products are approved by the review board to prevent allergic reactions and clients are also required to complete a health assessment on every booking to better align the client's needs with his preferences. Clients can also request certain wear and looks (i.e. modern or conservative). Client rates range from \$25-\$45 for a 1-hour session and all sumies are paid in cash and can receive up to \$150 in monetary value in tips and gifts. There is also a work registration fee of \$29 (per quarter) and as we expand sumies will have access to grants for housing and vacation time.

# DISTRIBUTION

Yayloop binary system is a value proposition tool to extend its life cycle and market value. A binary system is also integral to the lifespan of an organization to ensure its success.

## Direct Network

The daily run is an online publication and syndication network and yayloop media service featuring field stories, documentaries, product reviews, brand promotions, , and an exploratory platform to expand your existing network.

1. Runners - News runners are commissioned roles that work for our media segment (dailyrun.tv) covering field stories and providing emergency relief services.
2. Sumies - Sumies (su'me) are comfort service workers that specialize in conversational specialty providing both an outlet to explore and expand one's social circle.
3. Magazine - Berlusconi is a digital magazine that promotes small ads called pings and magazine spreads. and hosts an annual fashion gala and grand summit.
4. Video ads - Video ads are also used to expand market reach and provide a visual platform that engages and offer a broader scope of our service platform.

## Volunteer Component

The national reserves is a volunteer service linked into the mink card program and service network providing an extra lawyer of security to our institution

### The Basics

National reservists split time between actual flagship duty (occupation or vocational task) and post assignments (volunteer service) as a commissioned officer, non-commissioned officer, or special duty officer.

### Occupations

National reserves professions include all medical professions, skilled laborers, peer specialists, store operations, adjuncts, rovers, sanitation, pilots, civil duty, and marine work (to include fishermen). Service time: 25-55 hour per year.

### How to register

When you register to the Yayloop service in the United States, you will have the option to select a community service and billet (if available) and the national reserves is limited to 1.2m billets and the genso religion is limited to 12m billets.

## Referral Network

Hobbit is a referral service that issues pretravel vouchers to mink card members that live in a relief city where our referral network is operatable. Pretravel vouchers are based on circumstances and limited to three household members.

### Priority 1

This priority classification is for individuals with a homeless status that require immediate help and aid. The pretravel voucher covers free travel to a capsule state, three months of lodging, rideshare credit, and a \$1,800 visa gift card.

### Priority 2

This priority classification is for individuals with a loss of income that require immediate help and aid. The pretravel voucher covers free travel to a capsule state, two months of lodging, rideshare credit, and a \$1,600 visa gift card.

### Priority 3

This priority classification is for individuals with high safety concerns that require immediate help and aid. The pretravel voucher covers free travel to a capsule state, thirty days of lodging, rideshare credit, and a \$1,400 visa gift card.

## Intake Process

Health check -All migrants must complete a general health assessment online and must not have any acute medical needs that require immediate care on arrival or frequent visits that exceeds one's budget or financial reach.

Proof of identity- All migrants must provide two forms of identification and one of which must be a state ID, or driver's license or apply for a pivot card online and proof of which is a digital record with photography attesting to your identity.

Proof of parentage - All migrants travelling with children under the age of 18 must provide proof of parentage and upload a copy of each child's birth certificate during intake with a field consultant or ERC representative.

## Additional Perks

Meal allowance- All migrants will receive a meal allowance up to \$500 to cover meals for the first 30 days. The mink card program will also provide a certificate of registration (COR) to assist with establishing residency and services.

Rideshare credit - upon arrival in a capsule state all migrants will receive free courtesy rides using a rideshare service and limited to 2 trips per day for 30 days and all trips are subject to a 25-mile radius (maximum mileage per trip).

# THE APPENDIX

The appendix contains staffing information, workforce dynamics, and a step-by-step hiring process.

## Location 1

The chancellor office is comprised of the following key personnel and offices.:

1. *Chancellor*- This chancellor is the senior advisor with a service staff: a steward, and an ambassador.
2. *Warden* - The warden is the inspector general) with a service staff: a brigadier, and rovers.
3. *Foreman* - The foreman is the legal counsel), with a clerk of staff, and a liaison.

## Location 2

The field office is a service office (there are 12) with the following key personnel:

1. *Deputy* - This is the office lead who oversees hiring, field work, clearances, terminations and grievances.
2. *Examiners* - These are biometric examiners that screen job candidates and issue S1 clearances.
3. *Field crew* - The field crew is comprised of field consultants and judicial officers. (investigators).

## Location 3

The constable is our HQ with the following divisions:

1. *Division 1*- This division is comprised of our accounting departments, payroll, billing, auditing, benefits., grants, legal (includes notary), and claims
2. *Division 2* - This division is comprised of human resources, discretionary review board, MiS center, (web servers), HARP (records), and mergers.
3. *Division 3* - This division is comprised of mail services, logistics, disbursing (petty cash and supply), maintenance services, and food services.

## Employee Perks

As part of our employee wellness program, all employees work an average of 28 hours per week with a living wage of \$38,900 - \$74,900 annually and also start out in a contract to hire status for nine consecutive months with basic compensation, intervention therapy, and paid time off. At the end of their probational period, the employee will be eligible for our healthcare pilot program which pays 70% of their monthly healthcare premium (up to \$450 per month).

## Hiring Process

Working Yayloop is an adventure not only because of its social science landscape where there is lots of downtime with longer breaks but also because of its seriousness in ensuring employees are grounded and competent in their duties.

1. *Prescreening* - All job candidates must be at least 43 years old (or to be considered for employment. All Job applicants must also be able to read, write, and speak in English on at least an intermediate level and have no history of substance abuse.
2. *Criminal check* - All job candidates must also have no public record of criminal activity in the last 18 months or 48 months if there is an excessive pattern of criminal conduct that questions an applicant's character or sense of reality.
3. *Prog Interview* - A prog assessment is an interviewing style where job candidate answers a series of questions that to assess communication skills, organizational skills, and presentation. A prog interview is designed to speed up the hiring process.
4. *PBI Scheduling* - All job candidates must schedule a personal board interview within 30 days from receipt of an interim security clearance to continue with the clearance screening process and validation.
5. *Biometrics* - A new hires must complete a biometric screening at the nearest field office to register to include a mental health spectrum evaluation to determine employability (full, limited, or exempt).

# Stakeholders

---

## Direct

*Limited to 4 stakeholders*

## Advisors

The discretionary review board (DRB) functions like a board of directors. However, all investors are chief advisors with a limited association and the following duties and procedure process:

1. Propositions - These are proposed bills that assist with enhancing the security infrastructure and procedural process.
2. Liquidation- This is a process by which the investor can liquidate with a cash-out option after performance has been met.
3. Inheritance = This is a process by which a single investor can request pass-down options with up to 2 beneficiaries.

## Dividends

The mink card program is not an IPO platform due to its philanthropic atmosphere that does not warrant an expansive investor channel but rather a more narrowed investment strategy and model.

Therefore, cash dividends are allotted as followed and subject to DRB review and/or approval:

1. Tier 1 - This tier has an annual profit share of 3.2% which is the maximum allowable cash dividend for up to 2 investors with a combined profit share of 6.4%.
2. Tier 2 - This tier has an annual profit share of 2.3% which is the maximum allowable cash dividend a single investor which is assigned to a founding member.
3. Tier 3 - This tier has an annual profit share assigned to binary fund 1 with a maximum allowable cash dividend set forth by binary law and procedural process.
4. Tier 4 - This tier has an annual profit share assigned to binary fund 2 with a maximum allowable cash dividend set forth by binary law and procedural process.

## Binary

*Limited to binary recipients*

These are binary funds that cover heirlooms and bridge funds that adhere to strict binary laws and procedures and addendums:

## Fund 1

1. B-1 Allowance - This allowance covers a monthly living wage for heirs (3) listed in the binary fund. Monthly benefit: \$4,834
2. B-2 Allowance - This allowance covers health services with a 100% payout (any health insurance provider) and grants.
3. B-3 Allowance - This allowance covers monthly denominations for practiced members of the genso religion.
4. B-4 Allowance - This allowance covers travel benefits to include purchases and vacation travel, Annual benefit: \$22,732
5. B-5 Allowance - This allowance covers relocation expense to include RMA deposits. Annual benefit: \$38,464
6. B-6 Allowance - This allowance covers a monthly subsistence for food and basic needs. Monthly benefit: \$680.45
7. B-7 Allowance - This allowance covers a cash stipend on inception for transitional support. One-time benefit: \$25,937

## Fund 2

This is a bridge fund that is an addendum that covers contributions under the Bowles foundation:

1. Bridge 1- we honor seven (7) NAM recipients each year with the Temoss image awards and \$500,000 in cash and gifts.
2. Bridge 2- the Bowles foundation offers adoption options (full or reversed) to mink card members in need of support, and aid.
3. Bridge 3- we contribute up to \$18 million each year to emergency housing facilities to expand placement services.

# HERITAGE BILL

The heritage bill are conditional bans to help transition onto a more progressive track where race and culture is more developmental, integrative, and institutionally aware.

## Clause I

This clause examines the mental health conditions built into the advancement of colored people of black African ancestry and their institutions that serves as a moving vehicle to a less progressive track and more psychiatrically induced mental state. Therefore, there are special entry requirements to erase vast error from their historical track and integration segments due to a lack of community building and trust that continues to derail progress in their community. We also examined the institutional affairs in this institution and their historical track that continue to be commoditized for research and developments due to the psychological features built into community and advancement challenges which continue to disrupt community building creating a more conspiratorial atmosphere for their growth process.

For those reasons, our social science segment withdrawn mixed race children of black African Ancestry and mixed-race marriages belonging to this institution that also factored in the psychological elements built into their security foundation that ringed back high conspiracy on their own development and institution with a more prominent error in the developmental track of their male institution that developed this institution psychiatrically on their own women that suffered the most psychologically through heavy tamper of the perceptual realm where their institution was shifted out psychologically into fantasy realms to gain access to privilege and status. Most important, the wars that persists in the black American communities shed light on psychological problems associated with heavy misguidance and a complete disruption of their development and community.

Therefore, all persons of black African ancestry must fall into 1 of 3 distinct paths (1) less warring mental state that leads to a low reactive chemical response and a more stable mind. For example, a person with a low reactive chemical response will vent but it will never lead to physical harm or direct social contact intensifying its effect and consequences (2) developmentally prone where decisions are self-directed rather than negatively influenced, and (3) less fantasy driven to avoid false processing of desire and to put the mind on a more progressive track where it is more developmental and aware and less risk tasking and vulnerable..

## Clause II

This clause examined the mental health conditions built into the historical track of nations in relations to gender roles with a focus on male institution., Therefore, to lift vast error from our historical track and unionization processes. all males must fall into 1 of 4 institutional classes with the goal of moving onto a more dynamic track )1) low imaged identity where mental health is on a more progressive track in relation to a natural sense of identity with minimal error in the mental apparatus. (2) a person of high moral consciousness that see consequence and error and not a strict mental atmosphere that leads to deliberate abuse. (3) healthy self-esteem where a proper character has been developed rather than a false processing element that disrupts the natural thinking order leading to personality defects and character maladjustments, and (4) diversity prone where one's taste is expanded or diversified to factor in a more expansive mindset even if it is just an isolated experience that came with low rewards at least it was an safe endeavor that came with mental growth.

## Clause III

This clause examines the historical track of black slavery and its institutions that warranted a separation of union while placing an additional inquiry and conditional ban on all Caucasian generations that must compete a psychological assessment and fall into 1 of 3 distinct life paths (1) struggling family with a greater sense of independence and identity that places them on a more progressive track (2) morally induced where fairness is not based on association or a faulty area of perception of image or identity but rather stands in a morally induced mental realm where reasoning and perception are at is best and of a fair element, and (3) nomads that see value in travel and experience to expand one's view of the world with a more expansive view of race and culture. Additionally, the historical track of Caucasian generations relied heavily on American tradition that developed their unions psychiatrically on identity and images creating an atmosphere for a less progressive nation and historical track recycling its institution and immersion segments.

# BANK RESERVE

Centuriat is a bank reserve that functions as a member association for the national reserves and a depository for security accounts and starts a single training branch and 1 of 44 locations that maintains customer accounts.

## Customer Accounts

1. Depository – A depository account can be used for direct deposit and transferring money between accounts. At Centuriat, each depository account has a funding limit of \$49,500 and FDIC insured.
2. Loans – Centuriat service auto loans with top-up services to bank card members and base rates that make car buying much easier and affordable. There are no outside credit checks or co-applicants.
3. Currency – Keros is a digital currency printed in denominations of k20 and can be scanned an unlimited number of times of until it's face value. and bears the same exchange rate as the US dollar.

Centuriat will have 44 service locations with walk-in services to open a centuriat account, apply for loans, , access kiosks to deposit and withdraw funds, cash checks, and request certified checks. It is important to note that centuriat do not have an online banking portal and there is no, check writing or debit transactions or point of sales from a centuriat account

However, there is also a monthly service fee to service a Centuriat account, and all customer service is through Centuriat's 24-hour support line which is accessible by logging into the centuriat web portal to initiate a video call. All loan accounts are serviced through the centuriat web portal.

Keros uses special scanners and merchant equipment, and all bills come with a barcode and pin access. Keros do not have an expiration date except for credit bills that must be used within the first year of issuance. and all kero bills can be printed from home using a standard printer.

## Additional Perks

All centuriat accounts are enrolled in centuriat credit builder program and starts with 630 bonus points. However, to qualify for a Centuriat loan the loan applicant must meet residual income requirements and have a peak (average score in the last 18 months) score of 720 or higher.

Centuriat aggregates credit history from internal billing cycles; on-time payments increase a consumer's centuriat score by 9 points and late payments decrease a centuriat score by 21 points. A collection notice is a -50 points and unpaid debt that exceeds 180 days (per interval) is -75 points.

## Security Accounts

1. Treasury – Centuriat treasury division handles all operating expenses for bank card services and its subsidiaries. The treasury division also has an audit team and also outsources audit activities to ensure accuracy of records and discretionary action.
2. Binary – Binary accounts that are heirlooms and special trusts with distribution guidelines. The execution date varies based on performance and revenue and starts when the recipient has reached the legal age of 18 years to qualify for binary funds.
3. Holdings – Centuriat holdings account oversees emergency funds used for gift allowances, and special relief and have a depository limit set at \$400 million. The holdings account is tax-exempt and subject to review on an annual basis.

It is important to note that all visitors and personnel accessing the bank reserve are subject to special screening to include full body scans and must also store all clothing, electronics, footwear, and bags in a secure locker. Tt-gear must be worn prior to entering the mezzanine. There is no walk in services at the bank reserve, and the bank reserve is under 24-hour surveillance to include walkthroughs and closed-circuit cameras with motion detection.

Under transverse law, it is a federal crime to enter a bank reserve without the proper clearance and/or supervision. Transverse law also covers bans on the use of splicing technology and electro transmission technology that was found on Earth and led to light disclosure mostly using the language " no use of destructive devices: that was linked to heavy transverse activity in the Earth that led to moving corruption into many countries and light coverups. Splicing is an imaging system that comes with a solid base on Earth and in spheres and it is associated with heavy resourcing in to the Earth However, splicing is a biochemical agent that causes a reduction of chemical properties on Earth such as a spliced computer that has been stripped of RAM but still functional and hacked or a spliced food item with high toxins that leads to water weight or heavy constipation or diarrhea.

Additionally, the Earth has been spliced into many spheres creating a cross dimensional Earth and splicing is a resource that have been linked into human history but discounted due to limited knowledge on its technology up until late 2025. Splicing also regenerates an object leading to light to heavy modification (e.g. pattern error) of the item .to include duplicated currency bills that are used multiple times on Earth and non-detectable using traditional bank scanners.

# THE CANVAS

The canvas is a roadmap that outlines the incubation process and stages of development.

## Phase 1

The first 5 years covers the incubation period that is linked into a partner service and media platform for the mink card program. The dailyrun.tv (also nydailyrun.com) will also enter prelaunch with yayloop online marketplace for their clip n go market, circulation listings, and pallet search, and personals that are linked to their comfort services network.

However, there are no user accounts for the daily run online marketplace but rather a service that offers a friendly service platform to publish and remove ads. The daily run is also an emergency response service that provides rescue services in over 180 countries, and it is the only partner service of the mink cad program with a global reach into many countries.

## Phase 2

After year 5, the following mink card services will be available:

1. *Social platform* – Yayloop social platform is a grid service and central posting hub where mink card members can post pings, shouts, and host.
2. *Stop and drops* – Sop and drops are rooming house that offer all the essentials to feel at home and reserved for small groups and families.
3. *Baus program* – The baus program is a loss prevention program available in capsule states and open to 120 retail locations with no more than five employees.

## Phase 3

In year 9, the mink card program will expand with the following services and programs:

1. *Franchises* – This weekly standard rate is \$149 and the per diem rate is \$95. Stop and drops of reserved for small groups and families only.
2. *RMA rentals* – A homeowner program offering a speedier process to purchase a home under an RMA contract with low monthly payments.

## Phase 4

In year 12, the mink card program will expand with the following services and developments:

1. *Bramies*– a brami is a budget room that yayloop rents monthly at partner organizations and limited to a 30-day accommodation per site and also offer reduce rates to club members There is also an annual registration and annual service fee to access bramies
2. *Yumi stations* – (uy'me) are travel stops offering greater accessibility and convenience to budget travelers. Each yumi station is equipped with vehicle ports, EV charging stations, emergency fuel, hygiene facilities, a food buffet, and an RV service center.
3. *Amway bus* – Amway bus lines will start as a relief bus service that travels to 5 circulating routes to metro stops in the cities of Atlanta, Miami, Los Angeles, Las Vegas, and Seattle. Fares will range from \$29-\$78 per trip and \$9 per child under 13 years old.

## Phase 5

After year 12, we will begin working on housing developments with TAPP units being a priority for the startup stage. TAPP units are affordable apartments and renovated units that offer a faster reentry into housing. TAPP units offer 6–12-month leases and fully furnished units with a monthly rental cap of \$1,240 per month and an income-based subsidiary which is based a financial health assessment that factors in monthly income, debt, and residual income to determine the monthly rental ratio that ranges. Residual income under \$380 each month qualifies for a monthly rental ratio of 30% which is equal to an income-based subsidiary of \$372 per month and a monthly rental payment of \$868. However, residual income that ranges from \$380-\$690 is eligible for an income-based subsidiary of \$248 per month. And when a TAPP lease expires, tenants can apply for rollover time to occupy a TAPP unit at another site for up to 18 months in a 36-month period. A single person with no disability rating is eligible for a 6-month lease and families and persons with disabilities are eligible for a 1-year lease. There is also a \$45 application fee that covers all reapplications for one full year.

# HARP PORTAL

HARP is a record portal that serves as the primary record management system for the mink card program. HARP stands for housing authority and record portal and it's a membership-based service available to government agencies to assist with audits, clearance reviews, and field studies.

## Databases

1. Database 1 – This database provides access to memberships and profile data for mink cards, tabanul services, centuriat, national reserves, baus registry, Neiman college, and doullery franchisees.
2. Database 2 – This database provides access to personnel files for employees to include contract information, prog assessments, PBI reports, mental health spectrum exams, and performance evals.
3. Database 3 – This database provides access to magistrate information to include case summaries, order to appear, pardons, jurisdictional transfers, adjunct clients, adhoc reports, and periodic reviews.
4. Database 4 – This database provides access to subsidy disbursements for SLA benefits, TAPP clients, per diem, relief payments, .deferred billing accounts, basic needs vouchers, and emergency aid.
5. Database 5 – This database provides access to warden case files to include TSI filings, red notices (grievances, warnings, and holds), civil arrests, welfare checks, walk throughs, and special duty staff.
6. Database 6 – This database provides access to tenant information for TAPP units (6–12-month lease terms), favela communities (practiced members of the genso religion), special lodging facilities, and stop and drops.
7. Database 7 – This database provides access to rate schedules by service and product, work orders, service contracts, interest rates, proposed bills, new policies, and debriefs (conference, service, and adhoc).

## Membership Costs

A HARP membership is just \$129 annually per agency with up to 5 administrator logins and 12 supporting roles. The HARP software is a proprietary system that requires a CD-ROM authentication key and login credentials to include facial recognition at the time of login or special access.

## How to Apply

1. Application– The membership application is carried out through the minkcard.com web portal and requires one-time password (must have a .gov or .mil email address) to access the application portal.
2. Documents – To register, you must be an authorized registrant with clearance from an operations officer and provide a certified legal document to authenticate the agency as an official government post.
3. Processing – The review process includes a phone intake to verify application submission, and a document review to assign a clearance ID or a rejection code and rejections are typically due to red flags.
4. Fee Schedule – All HARP members will receive a 6-month trial membership to the HARP database and thereafter, all HARP membership dues must be paid by December 29 of each year to maintain their ranking.
5. Access Levels – All HARP members will have access levels base on work requirements and security access privileges with some agencies having full access to all HARP databases at no additional costs.
6. Public Records – HARP also has a public record database where HARP make information available to the public on discharges with a judicial board release that resulted in prosecution or non-punitive action.

It is important to note that all communication is carried out through the HARP portal to include video conference, encrypted email, and bridge reports. A bridge report is a filing by a HARP member on behalf of an outside party without a HARP membership or HARP access and bridge reports are intended to serve as a medium to get information to their inspector general or warden such as information release authorizations for warrant checks criminal classifications with a high criminal index rating of 5 or more which is to be determined by the inspector general or warden.

## Additional Perks

All agencies with a HARP membership can issue CAP cards through the HARP portal to offer employees another company benefit with mink services under the CAP program which currently includes all travel and lodging services to include services that are classified as a wellness service.

# ANN HARBOR

Ann Harbor is a national day that commemorates the astral government and genso founder for her heroic efforts in establishing the first humanitarian world order.

## Early Years

Ann Harbor (born January 24, 1979) was a human born child with a distinct spatial bloodline that eventually led to heavy scrutiny in her later years by high government trailing her endeavors that evolved over the years in the public eye through travel and air composition which is very integral to the survival of distinct human bloodlines that require more of a nomadic lifestyle rather than a stagnant lifestyle that deteriorates mental processes through chemical extraction associated with gravitational processes and genetics. These spatial bloodlines require isolation mostly in nature and reduced sleep cycles to prevent shifting into spatial spheres on Earth through a duplication process often linked to high stress and intentional travel. The scientific theory lies more along the lines of sleepwalking but in its most advanced stages where the human mind is in a hybrid state linked into dimensional spheres on Earth that led to many research evolutions into the human sleep state and spatial cycles.

Ann's research is based on compulsory study into human psychology. When Ann speaks of human psychology she factors in vast error in its rhetorical foundation and applications of theory that shift perception into a psychiatric hold on perception that continues to develop the human societies psychiatrically on identity and union through heavy tamper of its social environment and ethical foundation disrupting the natural state of human progression. For those reason, Ann delve deeper into the psychological landscape of the human generations with intensive study into human history, their language, and the cultural environments and captured vast error in their existence dating back to nearly three centuries that tampered with their generations and fueled by heavy hacks in their mental health practice that degenerated the human generations through comparative analysis and authoritative structures shifting reality into a grave psychiatric hold on identity.

Therefore, Ann's writing developments, always started with a basic foundation of language and style removing vast error from the processing environment to prevent exhaustion and spending too much time or brain power on content with the expectation of completing it in a single session of which Ann believed fanatic writing came with lots of error in both understanding and normalizing the human world which was evident in past human processes.

## State Address

This is the state of address from Ann Harbor herself that reflects on history and its historical atmosphere that shaped the nations' institutional structure derailing real progress in the human nation through a false sense of idealism.

" The history of our human nations has shown signs of encaged cultures bonded by a false sense of beauty and entrapped imagination looking at the outer surface of human skin to build upon a reality that shifted perception into a psychiatric hold on acceptance bearing both a slavery mindset and an impure state of existence wrapped into a disguised element of beauty and clarity.

Thereby, the beasts of the human world shall rise not in its beauty element or union but of great honor and service. And those that have lived in the grace of God shall be lifted into the heavens; while those that have followed in the path of the most wicked shall dissolve and bear no offspring at this present time whom may carry the burden of their karmic debt but rise with greater clarity of their new existence under a new humanitarian world order. "

And...

" I state with greater clarity challenging the ways of Willie Lynch and his slavery methods by stating: I am here to meet you hand and hand with greater wisdom for mankind that will supersede your demands for sovereignty and forge a new human race based on equal fairness which shall not be misinterpreted as opportunity for all but rather a merit system where character is viewed in its most logical state and unmasked element and not maintained through a masked state that imperfects our human nations through a false sense of image and idealism. So, here I will begin my work in the grace of God to restore the human race with its basic human comforts and not of excess that draws in more observation of the human race that have existed for nearly three centuries in darkness with no trace of the natural race. Therefore, if my work is not exemplified in its most pure form, the human race will no longer exist, and the universe will remain in darkness discontinuing life on Earth and spatial cycles to restore conditions in the human universe."
