

## DEBRIEF REPORT

The mink card program is an ecosystem that transitions society into a healthier dynamic framework enhancing both its developmental processes and historical dynamics through natural stages of development. It is a phenomenal institution that taps into a healthier sphere of human development.

### Dear Reader,

This is the 2026 debrief report from the prelaunch tour that provided real-time developments and a vision board for the mink car program that reached a performance score of over 95%. The prelaunch tour was also an un-marketed platform that was visited by many countries and governments through direct domain access and word of mouth providing a glimpse into our cultural dynamics and building blocks.

Our vision is to reshape the world through innovation and natural processes that enhances the life cycle. We are also an organization that see value in human progress not so much on an economic level where there is a competitive realm but rather on a more progressive foundation where mental health is the focus so that human progress can be channeled more effectively so that there is minimal error in its path.

We are also built with eternal life and launched under a 100-year window which was referred to as the first cognitive era and historical wave. Therefore, every debrief report will include a more progressive plan as we advance over the years enhancing our purpose. The canvas (see canvas chart) also outlines our stages of development with the first 50 years revealing a major shift in human dynamics.

Best Regards,

Founder

## Overview

The mink card program operates as a merchant program and membership service anchored by its own brands and services. The direct market has a service capacity with 43 million administrator accounts, and the bridge community provides a gateway into our institution through business opportunities, family enrollments, volunteer services, and referral programs.

<b>FOUNDED</b>	2006
<b>LAUNCH YEAR</b>	2032
<b>INDUSTRY</b>	SOCIAL SCIENCE
<b>TARGET MARKET</b>	4
<b>EMPLOYEES</b>	290,000 (CAP)
<b>VOLUNTEERS</b>	1.2M
<b>CAPITAL</b>	\$120.7M

### Problem

Social science is an area of scientific study that relies heavily on trends and historical patterns derailing human progress that shifted the historical foundation onto a less progressive path that carried many institutional risks that continue to diminish the mental value of our human societies and its institutions with destructive patterns.

### Solution

The mink card program is an ecosystem that transitions society into a healthier dynamic framework enhancing both its developmental processes and historical dynamics through natural stages of development. It is a phenomenal institution and social science segment that taps into a healthier sphere of human development.

## Objectives

The mink card program will be commissioned as a human rights organization that serves as an intermediary during human crises. The history of our human generations has shown signs of engaged cultures bonded by a false sense of identity and entrapped imagination looking at the human world through the lens of its historical framework and dilapidated processes that shifted the perceptual realm into a state of unconsciousness. Therefore, the mink card program is an extension to human life.

**01**

ACHIEVE A 5% SHARE IN  
THE MARKET

**02**

ACHIEVE 7M MEMBERS IN  
THE FIRST YEAR

**03**

ACHIEVE REVENUE OF \$1.7B  
BY YEAR 5

This document is to certify that *The Astral Government* shall be formed as a human rights organization with the sole purpose of serving as an intermediary during human crises and peace time service. The history of our human nations has shown signs of encaged cultures bonded by a false sense of identity and entrapped imagination looking at the human world through the lens of a restrictive world that shifts the perceptual realm into a state of unconsciousness. Thereby, the astral government is an extension to human life.

**Therefore, the following biblical reference sets the tone for character and intent:**

We shall bestow upon the Earth good deeds and walk upon the planes restoring mankind. We shall remove conditions of war with peaceful unions. We shall give freedom but not to what has been formed into union to protect the corrupt ways of its kingdom and the fruits it provides. And those who have been chosen to walk the path of God shall bear a heart of compassion for those who come before them but not of fault that corrodes the nature and dampen the spirit.

**And...**

What one cannot fix one shall not make any effort to repair but rather walk in honor and grace and not of grave indiscretion in union or collaborative efforts.

## **Proclamation**

The unions that have been formed in history under its wrongful state shall hold no merit nor shall it be corroborated as a future endeavor when there is no foundation.

**Thereby,** these unions shall not proceed under a merit system nor grounds for peaceful undertakings when no its history lacks in human progress and moral eptitude.

**And...**

The national emblem represents the freeing of modern slaves from forced labor. This period is known as the Golstone Era (2011-2026). The five aligned stars in the national emblem are the five bilateral states that served as an escape route and union from war and oppression. The two stars that are positioned on each side panel represent the first commissioned bilateral states creating a separation of power.

---

# EXECUTIVE SUMMARY

The mink card program is tailored to four customer focused groups (see below) with each focused group having a common foundation with a healthy human dynamic for a more developed mental health track and psychological exchange.

## Customer-Focused Groups

- The term resource refers to any company or organization that can provide a human necessity that meet eligibility requirements to advertise in our pallet search engine such as budget travel, food source, housing accessibility, and services that fall under healthy routine.
- A nomad is someone who lives from place to place with no fixed home and often driven by the need for a more dynamic life that comes with greater freedom, gainful experience, and independence. This lifestyle often benefits from healthy routines and activities.
- A utopian is a term that we use to refer to the love for travel that comes with many benefits to include greater access to experience, healthy isolation, and educational benefits, and the bridging of communication to create a more dynamic path for new and future travelers.
- A gogy is a term we use to refer to migrants which are travelling units who move from one territorial atmosphere (...city or region) to another in hopes of building a better quality of life. However, gogies are more resourceful and more prepared for migrant activities.

There is also a mental health spectrum scale that is used to determine eligibility that factors in both age and social classifications setting the legal age at 43 years old for administrator accounts. However, our volunteer component serves as an alternative access point for mink card benefits. Additionally, mental health spectrum evaluations were implemented to mold society into its proper developmental path with minimal error in its behavioral track. The mental health spectrum division is chaired by a neuropsychiatrist which is the lead mental health spectrum evaluator with ten or more years of experience in the behavioral science industry either by profession or vocational tasking. And all mental health spectrum evaluators must complete a five-hour certification course each year and possess a bachelor's degree or higher; and all training is carried out by the mental health spectrum division. There are also other requirements to include passing a personal board interview (PBI) and meet all the requirements for a mink card membership.

**Our mission is to help people live better by changing how the world envisions the world around them.**

The mink card program is a resource hub that specializes in economic developments. Its founder, Carlena Ann Winehart (b. January 24, 1979) have over 20 years of experience in project management and research and development and also studied at the graduate level majoring in education management. The developments consisted of years of research to create a more defined path that identified as an historical endeavor and a human science shifting society into its proper developmental chamber.

The mink card program is governed by a discretionary review board (DRB) that replaces a typical board of directors with a more robust structure and security atmosphere. We also have an excise system which consists of a set of policies that set standards on human rights and judicial processes to ensure there are reasonable grounds for fairness and equitable protection.

We also have a volunteer component called NARC (acronym) where service members split time between actual flagship duty (occupation or vocational task) and service time (volunteer duty) that ranges from 25-55 hour each year while earning service benefits (e.g. per diem rates) rather than wages. NARC enlists up to 1.2 million service members with posts linked to our institutions and mink card program.

The mink card program operates in the United States (.. and 11 foreign nations) in their bilateral states (there are 7) that make up their city provinces and municipals. A city province is reserved for special housing developments: and municipals have a more robust resource hub. We also have a virtual customer client contact center called VMAT (...virtual accessibility and maintenance ticket system) where a one-time passcode or yayloop service account is required to communicate with a support associate using proprietary video technology. We also removed all traditional phone services from out service network with VMAT services for a more robust security infrastructure.

The mink card program is an amazing reinvention of human society that fosters a healthier mental apparatus that also encompasses a more advance segment of remedial care and human conditioning to lift vast error from the historical track. This social science segment is a guaranteed market that starts out redefining human culture with an online community and resource hub that also serves as a funding source and prelaunch service for the mink card program.. We also have an emergency response service that operates in 18 countries providing asylum service and ongoing support.

# NOI CLASSIFICATIONS

The national origin Index is census data that is used to identify native American origins that were formed during the Golstone Era to restore order in the American nation bridging race and institution into a unified system. Therefore, all applications for membership into the mink card program and volunteer component are required to collect a national origin classification.

## Polynomics

Polynomics is light conservative group on a more progressive track with a less restrictive mental apparatus and a more experimental path that extend their experience to a level of comfort that opens the mind to gainful experiences that still allow them to stay connected to their own values while expanding reach to avenues of growth.

Polynomics live by moral code and not so much by collective process which enables a polynomic to operate at a higher moral capacity where reasoning and perception are at its best making the human experience more developmental and aware. This cultural segment builds their own identity to develop the mind outside of union and offer themselves more opportunities for growth.

Polynomics are also practiced members of the genso religion which is a branch of Christianity that taps into an improved system of thought that regenerates the human mind. The genso religion was engendered to humanize society through rational methods of change that worked in a way to improve the human condition. It is also a prescribed identity characterized by ascetic lifestyles, high morals, and light conservatism.

## Proletariats

Proletariats is a high conservative group that live by collective process and union that sits on a less progressive track with a more restrictive mental apparatus and a less experimental path that limits growth and development making the human mind less developmental. For that reason, we do not enroll proletariat through direct membership.

Proletariats are often unionized through an intense element of belonging to their own race and institution that tampers with their moral compass which serves as the main source to high abuse that requires more advanced computing of race and culture to identify integration problems especially when migrating people of poor mental condition.

Proletariats appear developmental but lacks in substance. They are highly sensitive to differences and are often aural learners subject to a more chronic state of processing and computing of information that tampers with one's sense of reality and relatability. Proletariats require a PBI clearance because the mind is more prone to error that leads to higher levels of a criminal abuse and risk taking that are often seen in cultural units with undiagnosed mental disorders.

## The Sequester

The sequester is an extension clause that examines the psychological landscape built in race and institution that have carried a burden that that continue to dilapidate human processes and the thought apparatus to acknowledge the historical dynamics built into race and institution that had been reared into human culture as a working reality that served as a modeled system for institutional belonging.

Therefore, we shall order into review critical assessments into mental health to assess integration processes that have lived under a modified sate of human existence that have led to undiagnosed) mental disorders with a more chronic level of psychiatric computing while remaining masked and rhetorically bottled from culture to culture. This is a critical element of human culture that remained corralled and silenced.

# SEGMENTATION

The mink card program will be established as a Delaware Corporation with a judiciary, constable, corporate office, and field officers that serve as a security infrastructure for our institution providing both an expansive organizational structure and greater accessibility with walk-in services.

## Key Structure

- **Judiciary** - The judiciary is the executive hub with the chancellor serving as the head of office. The executive team includes a steward which is clerk of office. The warden is the inspector general. The foreman is the legal counsel, and the lance is the MIS officer
- **Constable** - The constable is our internal affairs division that handles investigations, rover services, clearances, and immigration, sponsorship into the country, The internal affairs division also carries out civil arrests and appoint adjuncts for judicial proceedings.
- **Corporate** - The corporate office is comprised of two modules. Operations is comprised of accounting, HR, information systems, licensing, warden services, and programs. The service division handles client services, benefits claims, grievances, and DRB services.
- **Field offices** - Field offices consist of the following key services: hobbit transport, red notices (warnings), pink cards (restrictions), yellow cards (curfews), biometric screening (CAP cards), and national reserves enlistments. Field investigations, and rover services,

As part of our employee wellness program for direct employment,, all employees work an average of 25-35 hours per week with a living wage of \$38,900 - \$64,900 annually and no overtime hours.. Employees also start out in a contract to hire status for nine consecutive months with basic compensation, mentorship program, and paid time off.

At the end of the contract period, the employee will be eligible for our HEP program which pays 70% of their monthly healthcare premium. HEP is a healthcare enhancement program where employees can choose their own health insurance provider, and our HEP service provider, (Emblem Care Plus) will cover 70% of the monthly healthcare premium. (up to \$450 per month).. On expansion, HEP will provide burial insurance with survivor benefits and render services at Ann Harbor medical centers which is a mink card facility.

CREP is our career readiness and employment program that allows job candidates to fast track into direct roles or vocational status in the national reserves..

## Application

The following prescreening is conducted on all applicants for direct employment and volunteer service:

1. *Registration* - All job candidates must be at least 43 years old or at least 23 years old with a sponsor; and be able to read, write, and speak in English on at least an intermediate level and have no felony offenses.
2. *Criminal check* - All job candidates must also have no public record of criminal activity in the last 48 months and no excessive pattern of criminal conduct that questions an applicant's character or sense of reality.
3. *PBI Scheduling* - All job candidates must schedule a professional board interview within 30 days from receipt of an interim security clearance to continue with the clearance screening process and evaluation.

## Assessment

The following assessments are conducted on all applicants for direct employment and volunteer service:

1. *Prog assessment* - This is an interviewing process where job candidate answers a series of questions posted to an online bulletin to assess communication, organizational, and presentation skills.
2. *Spectrum Evaluation* - Mental health spectrum evaluations were designed to ensure employees where integrative and developmental and less stagnant in mental process and service.
3. *Biometrics* - All new hires must complete a biometric screening which entails a medical clearance (vision, hearing, and cognitive) and mental health spectrum rating (high or low) to determine employability.

If a job candidate, do not qualify for direct employment, there will be two other work registration options: (1) become a national reservist with service time ranging from 25-55 hours each year under a behavioral disposition contract which is a non-salary volunteer service with service benefits. The other option is a probational status with training posts and intervention therapy for twelve consecutive months for a reevaluation to determine employability.

# Brand Architecture

## Level 1

### CENTURIAT

Centuriat is a bank reserve that functions as a depository for security accounts (i.e. binary, direct deposit, and treasury funds).

### TAPP

TAPP is a temporary assistance program and subsidy that provides access to financial assistance programs and affordable housing.

### OSHA

OSHA is a proprietary operating system and host accelerator for our telecommunication company: Qurato (Q'ro'o) wireless.

### HEALTHCARE

Emblem care plus is a healthcare enhancement program (HEP) with in-network services and pilot insurance paired with other providers.

### BAUS

Baus is a loss prevention program with 120 certified stores that provide food subsidies (up to \$57 per month) and restitution services.

## Level 2

### MACHONI

Machoni is a food manufacturer with drop-in markets and a dine in service with cafeteria plans (weekly/monthly) and a pay as you go service.

### NEIMAN

Neiman college is a research university that confers capstone degrees in field investigations, ADL therapy, and clerical administration.

### RETAIL

Brew Brothers department store is a retail chain with swap shops and bin items. Brew Brothers also manufacture their own line of products.

### AMWAY

Amwaybus.com is an express bus service that operates 24 hours on 12 circulating routes with bus depots and on-site amenities.

### EXTRAS

Additional brands include Sam's health club, stopndrops.com (lodging); and franchise opportunities in our doullery (doe'la're) market.

# Tier Benefits

## For Individuals

**Limited to 43 million members**

Mink card benefits is an incentive offered to club members with time in service.

### Level 1

To qualify for tier 1 benefits, you must become a mink card member. with an entry status.

1. *Digital card* - The per diem rate is set at 25% of the market value for a living quarter and limited to 90 days in a full calendar year.
2. *Pivot account* -This benefit applies to all living quarters and includes an interest-free loan and 5 relief payments.
3. *Deferred billing* – Defer bills for up to 30 days and incur 1.3% interest on the total amount owed and based on credit rating..

### Level 2

To qualify for tier 2 benefits, you must have been a mink club card holder for 18 consecutive months .

1. *General relief* – Deposit up to \$1,000 to your mink card and send money to friends and family in the mink card network.
2. *Credit builder* – Apply for a TAPP allowance to cover outstanding bills. This is a relief fund subject to funding availability.

### Level 3

To qualify for tier 3 benefits, you must have been a mink club card holder for 436 consecutive months .

1. *Discount rate* – Qualify for an auto loan up to \$15,000 with a 12.9% APR and rollover benefits that includes burial insurance.
2. *Plus benefits* – Build a credit profile with centurial that aggregates credit history from internal sources and billing cycles.

## For Businesses

**Limited to 50,000 small businesses**

Mink cards benefits are offered to small businesses with a baus certification.

### Pricing

To qualify for a baus certification you must meet the following pricing standards:

1. *General* - All pricing must meet DRB standards and are subject to review on an at random to ensure fair pricing.
2. *Protocol* – All products and services must meet regulatory and safety standards and have the required licensing.

### Quality

To qualify for a baus certification you must meet the following quality assurance standards:

1. *Products and Services* – All products and services must come with a refund service policy or a non-completion clause/
2. *General Support* – All baus companies must have a customer contact line with a live person and a business email for support.

### Service

To become a baus certified store, you must be a small retain chain with no more than 7 employees:

1. *Annual reviews \** – All baus certified stores are subject to an annual performance review (APR) to assess quality standards.
2. *Hardship grants* – All baus certified stores (limited to 120 stores) are eligible for hardship grants up to \$75,000 per year.
3. *Loss prevention \** – All baus certified stores are eligible for loss prevention funds up to \$50,000 per year to cover voucher services.

# Our Partners

1

**Investor** The daily run is an online publication and syndication network featuring field stories, documentaries, bin marketing, commentary, brand promotions, and an exploratory platform to expand your network. The daily run is also the investment track for the mink card program.

2

**Provider** vayloop is the main service provider for the mink card program and serves as a security infrastructure, for information query, family access cards, reservations, transfer services, customer service, and pivot accounts, and top up services that are linked to expansion.

3

**Remedial** The genso religion is a branch of Christianity that taps into an improved system of thought. It originated in United States in the 21st century and became more of a scientific endeavor into human culture. It also serves as a spiritual foundation for growth processes.

4

**Franchises** The doullery (doe'la're) market offer franchise opportunities to mink card members with low startup costs and in-house financing. Doulleries are resting stations that are geared towards nomadic groups and extended travel offering a space to relax and recharge.

5

**Recreation** Fort Bennington is a camping resort that starts as a relief campus with tenting divisions (veterans, families, and seniors), a welcome center, with storage lockers, charging ports along with toilets, showers, badminton, delivery ports, electric buggies, laundry services,, and grill stations.

6

**Charitable** The hobbit outreach program is an emergency response service that operates in all 50 U.S. states providing emergency transport, shelter services, and voucher assistance through the Bowles Foundation. To fuel the hobbit, program, all hobbit clients ae assessed an annual resource fee.

7

**Split Living** Brami communities are split housing developments that offer an affordable lodging option to budget travelers while also serving as an emergency housing resource. Brami communities is an expansion segment and a private development owned by the daily run.

# The Roadmap

## Municipals

### *Limited to 12 capsule cities*

The following are zoning plans for city municipals where we concentrate resources:

### Plan A

1. *Module 1* – The judicial system consists of a central bureau or hub, holding stations (max 90 days ), brigs (max 1 year), retention homes (max 5 years), cross state transport, courts, safety patrol, and children services.
2. *Module 2* – The housing system will be regulated by HARP and consists of shelters (to include nuclear survival stations, the ark and aurora), TAPP units, RMA rentals, and U.S. favelas (gated communities).
3. *Module 3* - Our 24-hour service center consists of emergency calls, repair services, towing, locksmith services, sanitation, 911, and emergency response, and can be reached from free call boxes,
4. *Module 4* - ) Brew Brothers Department stores and their Thrift shops (returned and open box items), and Qurato (Q'ro'o) wireless and swap shops. There are ordering stations for EPO deliveries.
5. *Module 5* – Machoni meal stops, Machoni pizza. Machoni drop-in markets (prepackaged food, beverages, and bin items), and Palushi cocktail lounge (includes appetizers and finger foods).
6. *Module 6* - Amway bus lines and shuttle services (peak hours are free)), reliable car options (RELCO) for bus depot transport and pickup, electric buggies, and personal mopeds, and bicycles (no e-bikes).
7. *Module 7* – Pavilion parks, yumi stations, doulleries, bramies, glamping sites, horticulture, golf courses, tennis courts, waterparks, Ann Harbor medical centers and patient travel, and Sams health club.

## Provinces

### *Limited to 18 capsule cities*

The following are zoning plans for city provinces where we have special housing developments.

### Plan B

The following are food services that are provided in relief cities that offer transitional support:

1. *Meal stops*- Machoni is a food manufacturer with meal stops and drop-in markets and special meals plans which also includes grant programs for indigent travelers and low-income families.
2. *Transportation*- Machoni meal stops operates a shuttle service from major destinations to meal stops daily and permitted drop off points and public bus stops along the way for a nominal fee.

## Shelter

The following are sheeter services that are provided in city provinces for transitional support:

1. *Emergency response* – Emergency response centers is a shelter service with a 24-hour response team and transport services, The main hub also has emergency beds for singles and families and transitional housing facilities.
2. *Mental health division* – Wellness centers is a walk-in mental health division featuring emergency beds (72-hour intervals), prepared meals, wellness programs (walk in and court diversion), psych evals,, mental health referrals, and a 24-hour duty staff.
3. *Per diem Assistance*- Mink card members and eligible member programs (e.g. national reserves) can apply for per diem rates at bramies, relief sites (i.e. Aurora and Fort Bennington), and stop and drops. Per diem rates reduces rental costs by up to 70%.

# HERITAGE BILL

The heritage bill is a living document that aid in the development of human growth processes transitioning the human race onto a more progressive track where race and culture is more developmental, integrative, and institutionally aware.

## Clause I

This clause examines the mental apparatus built into the advancement of colored people that remained in a psychiatric realm on race and institution that ultimately disabled proper growth into the nations shifting the colored nations into a more advance stage of war and psychiatric computing that led to heavy criminal organization in nations fueling these networks with a collaborative state of union and security culturing that fueled these institutions with some form of progress and security for their culture that can be tapped into by future generations. However, this elemental feature serves as a moving vehicle to a less progressive track and more psychiatrically induced mental state ridden with war and ongoing conflict and racial induction.

Therefore, we imposed special entry requirements on colored nations to erase vast error from their historical track and integration segments due to a lack of community building and trust that continues to derail progress in these nations with a phantom state of growth and unionization processes. For those reasons, our social science segment withdrawn critical age groups under 49 years old and extended services to qualifying entries of the national reserves which has a legal age of 18 and sponsorship requirements.

We also imposed a conditional ban on black African ancestral groups with a more extensive review process to determine entry and service access due to the historical track of nations that continue to be commoditized for brute research and volunteer service due to the psychiatric elements built into institution and advancement challenges which continue to disrupt community building creating a more conspiratorial atmosphere for their growth process that ringed back high conspiracy on their own with vast error in the developmental track of their male institution living in a more advance stage of mental psychosis on their own security that developed this institution psychiatrically on their own women and children that suffered the most psychologically through heavy tamper of the perceptual realm where this institution shifted out psychologically into fantasy realms to gain access to privilege and status. Most important, the perpetuated conflict that persists in this realm continue to shed light on the detriments of mass diversity and forced infusion of culture.

## Clause II

This clause examined the mental apparatus built into the historical track of gender roles. Thereby, to lift vast error from the historical track and unionization processes. all members of the mink card program must fall into the following institutional class: (1) high moral consciousness that see consequence and error and not a strict realm that leads to constant abuse (2) healthy self-esteem where a proper character has been developed rather than a false character that disrupts the natural thinking order leading to personality defects and character maladjustments, and (3) diversity prone where one's taste is expanded or diversified to factor in a more expansive mindset even if it is just an isolated experience that came with low rewards at least it was an safe endeavor that came with mental growth and awareness.

## Clause III

In this clause, we reference historical eras, and the psychological elements built into slavery generations and their unions that warrants greater oversight of the human race. Historical eras are periods of increased political tensions that stem from fear of changes to its political structure and unions that have kept the nations intact but yet dehumanized shifting the political arena into a dire state on isolated security and union and criminal segregation where crime by association remained in an honorable state and protective blanket even when there was no valid entry that overrode false processing and unethical practice shifting society into a psychiatric hold on identity and union that captured a more realistic view of culture and mental health.

Thereby, the mink card program do not integrate herd cultures which are identified as segments of culture that bear an intense element of belonging to their own race, language, and institution that often tampers with one's moral compass because of how its bonding elements develops the mind psychiatrically on identity and union which serves as the main source to emotional bonding that requires more advanced computing of race and culture to identify integration problems especially when migrating people of poor condition.

# CONCLUSION

The ecosystem captures a broader scope of culture and institution that reflects on historical dynamics to transition the human society onto a more progressive track that incorporates fundamental human values that are built into the natural stages of human development and its natural state of identity and institution to promote mental wellness.

## Prognostics

Purpose -The mink card program is a social science segment transitioning the human race onto its proper developmental track lifting vast error from its historical foundation and prepping the new human institution with a healthier framework commissioned under the astral government.

- Problem - The behavioral track that have been reared into the human generations as a natural state of reality and computing continues to develop the human generations into conspiratorial segments and psychiatric communities that derails mental growth processes.
- Solution - The mink card program is a remedial service that shifts the human generations into its proper developmental chamber reducing waste and diverting the economic element that draws in temptation and high abuse that is often induced by conditioning elements.

To recap, , as part of our employee wellness program for direct employment,, all employees work an average of 25-35 hours per week with a living wage of \$38,900 - \$64,900 annually and no overtime hours.. Employees also start out in a contract to hire status for nine consecutive months with basic compensation, mentorship program, and paid time off.

At the end of the contract period, the employee will be eligible for our HEP program which pays 70% of their monthly healthcare premium. HEP is a healthcare enhancement program where employees can choose their own health insurance provider, and our HEP service provider, (Emblem Care Plus) will cover 70% of the monthly healthcare premium. (up to \$450 per month).. On expansion, HEP will provide burial insurance with survivor benefits and render services at Ann Harbor medical centers which is a mink card facility.

Most important, we examined the psychological apparatus of financial mindset and its institutional link (...unions and associative patterns, the human psyche remained in an economic realm that derailed proper ethical growth and remained disguised and heavily tampered through its state of conditioning built into survival and culturing. Therefore, our institution is a remedial service for better mental growth.

## Research

There were also psychological assessments conducted in U.S. poverty and wealth associations and the findings suggested high immersion units were more prone to mental intrusion through heavy tamper of thought and perception. This type of mental state continues to derail human progress because of the historical track and advancement cycles that leaves the doors open to vast error and recycled patterns of abuse.. Therefore, it is imperative that each mental institution is divided based on mental class so that progress can take place at the level in which one is conditioned for.

We also determined that too much advancement can disrupt one's developmental track creating a more psychiatrically induced identity and culturing making these units more prone to addictive behaviors and grouping. However, low immersion units did not carry these traits and were viewed as a benefit to society because the mental environment was more balanced lived under the right level of care. However, high immersion units required closer monitoring and/or comprehensive psychiatric care due to failed societal processes the created a pathway to impaired growth through heavy tamper of perception and union.

The national origin index was also implemented to reshape society onto a unified racial identity that carried a broader scope of human identity.. Therefore, there is only one nationality that is accepted under the mink card program which comes with two classifications (i.e.. polynomic and proletariat) that are not in reference to color or a historical heritage the derails human service through grave institutionalized culturing and unionization processes.

## Extraction

The matrix is an excise policy that can be found in more detail in the excise handbook. The matrix consists of behavioral tracks that examines lifestyle habits in relation to economic accessibility to make determinations into risk factors and support systems. Poverty is an economic track that shifts society into a more dire state on security making the developmental track less progressive and more prone to error and institutional abuse. Wealth is an economic track that is defined by high financial accessibility and the richness of one's mind (i.e. balance and careful habits). It is also an economic track that must not bear a harmful state of ownership that tampers with one's sense of reality to gain access to greater balance and acuity in their perceptual realm to avoid vast error in judgment that may lead to higher risk talking and a false processing environment.
