

HARRINGTON ELECTRICAL SERVICES

CAPABILITY STATEMENT

UIE: Y91MXJJKT2D7

CAGE CODE: 9YK40

ABOUT US:

Harrington Electrical Services is a C-10 licensed electrical contractor based in Northern California, proudly serving government agencies including the United States Postal Service, FEMA, and US Coastguard since 1992. Our team brings years of practical experience in these regions, along with in-depth familiarity with USPS facilities throughout the area. For over 20 years, Harrington Electrical Services has successfully supported USPS facilities with a wide range of electrical projects, including installations of lighting, fire alarm systems, power distribution upgrades, EV charging stations, and CCTV systems.

Differentiators:

Harrington Electrical Services strives for prompt responses to all work order requests. Our technicians investigate all reported issues and compile a scope of work for repairs per USPS and code requirements. We follow clear, well-established procedures for all electrical work, based on the National Electrical Code and USPS specifications. These procedures are integrated into our workflow to ensure consistency and safety on every job.

We currently monitor and service the fire alarm systems for over 60 USPS locations throughout the Bay Area and Sacramento area including major processing and distribution centers like San Francisco, Oakland, San Jose, and West Sacramento
