

RM Products Ltd

Fiberglass Equipment Enclosures

- RM buildings are portable and can be easily assembled in remote locations.
- RM's fiberglass buildings' structural integrity won't be compromised if holes or extra openings need to be cut.
- RM has technical personnel who can work with the design engineer to provide CAD drawings and engineering and licensed electricians for installation of electrical options.
- RM's products meet the International Building Code.

RM Products will design, manufacture and assemble our modular fiberglass enclosures and equipment covers to suit your needs.

- RM Products non-metallic, non-conductive fiberglass buildings provide a natural safety barrier for personnel and equipment.
- RM's enclosures are easy to ship, components only or pre-assembled.
- RM's buildings are assembly only - no construction needed.
