

RM Products Ltd

Ice Protection

The ice shield is designed to cover RM Products Modular Fiberglass Buildings. The ice shield provides protection from ice falling off of towers for example.

RM Products Ltd's prefabricated ice shield extends beyond the building to protect the HVAC.

The RM building shown below was used at a radio tower site.

RM Products Ice Rake

RM Products Ltd.'s ice rakes are custom made for our modular buildings. The ice rakes break the ice up if it falls from the roof of the building.
