

RM Products Ltd.

Dock Level Warehouses

Reduce Maintenance Costs

- No rust, rot or mildew
- Virtually maintenance free

Reduce Product Loss

- Fiberglass panels are resistant to insects and pests
- Unique panels reflect heat, maintaining lower interior temperature in the building, reducing possible heat damage to the products stored in the enclosure.
- Insulated or un-insulated panels are available.

Reduce Relocation Costs

- RM's modular design allows the unit to be expanded as your needs grow. If required the entire building can be easily relocated to a new site.

Reduced Depreciation Costs

- Long life span of the fiberglass construction means the capital expense of the building can be amortized over a longer period of time.

Reduce Site Costs

- Optional adjustable jack stands allow the unit to be set on existing grades with minimal site disruption.

Increase Handling and Efficiency

- Door heights and heights of the building are flexible and can be built to suit your companies needs.

Features & Benefits:

Modular Design - Portable - Quick Assembly Time - Easy Shipping and Off Loading - Minimal Site Preparation - Mold & Mildew Resistant - Long Term Durability - Insulated Buildings - Easy to Repair - Virtually Maintenance Free - Light Weight - High Strength to Weight Ratio - Spray Washable Inside & Out - Ability to Assemble in Difficult Locations Where Construction is Constrained - Electrics, Lighting and HVAC Options Are Available - Meets Building Codes Throughout North America
