

RM Products Ltd.

Retrofit Of An Existing Facility's Influent Works - A Case Study

RM Products modular fiberglass enclosures were required to house a 3mm aperture Claro fine step screen-in-tank system on the upper channel.

RM also manufactured a cover for the treated screening drop chute and an enclosure for the treated screening bin and Claro control panel at grade level.

Because of RM's modular system we were able to supply an easy to assemble system for the contractor that made the covering of the Claro equipment possible.

RM Products can design and manufacture the perfect equipment enclosure no matter what industry you service.

Features & Benefits:

Modular Design - Portable - Quick Assembly Time - Easy Shipping and Off Loading - Minimal Site Preparation Mold & Mildew Resistant
Long Term Durability - Insulated Buildings - Virtually Maintenance Free
Light Weight - High Strength to Weight Ratio - Easy to Repair
Spray Washable Inside & Out - Ability to Assemble in Difficult Locations Where Construction is Constrained - Electrics, Lighting and HVAC Options Are Available
Meets Building Codes Throughout North America
